Building W. B. Yeats's Later Poetry Tomoko Iwatsubo, 2024-09-09 This book explores Yeats's later poetry through the metaphor of the poetic tower where different kinds of building architectural textual political and symbolic were closely interrelated It chronologically examines Yeats's tower poems composed during a period of dramatic personal and national transformation from 1915 to 1932 Within a year after the Easter Rising in Dublin Yeats acquired a half ruined Norman tower in County Galway Ireland which had enthralled him for the past two decades and textually and architecturally constructed it into a focus of his life and work Interweaving the account of the renovation of the actual building and the textual construction in the socio historical contexts the book reveals the evolution of Yeats's multiplex tower as an organizing principle of his later poetry Using the archive of correspondence and manuscript materials of relevant poems including those which have thus far escaped close attention the book offers close textual genetic analyses and a diachronic view of Yeats's tower poetry which with its foundations laid decades earlier he built in the collections from *The Wild Swans at Coole* 1919 to *The Winding Stair and Other Poems* 1933 Highlighting the delicate exchange between poetry and biography as well as between the textual architecture and the actual one identifying a turning point in the making of each tower oriented poem and proposing some draft dating revisions this first book length systematic study on the process of Yeats's creation of the tower casts an unfamiliar light on a familiar yet underexplored landmark in modern poetry and makes his step by step construction work come alive

The Early Modern Travels of Manchu Mårten Söderblom Saarela, 2020-06-19 A linguistic and historical study of the Manchu script in the early modern world Manchu was a language first written down as part of the Qing state building project in Northeast Asia in the early seventeenth century After the Qing invasion of China in 1644 and for the next two and a half centuries Manchu was the language of state in one of the early modern world's great powers Its prominence and novelty attracted the interest of not only Chinese literati but also foreign scholars Yet scholars in Europe and Japan and occasionally even within China itself were compelled to study the language without access to a native speaker Jesuit missionaries in Beijing sent Chinese books on Manchu to Europe where scholars struggled to represent it in an alphabet compatible with Western pedagogy and printing technology In southern China meanwhile an isolated phonologist with access to Jesuit books relied on expositions of the Roman alphabet to make sense of the Manchu script When Chinese textbooks and dictionaries of Manchu eventually reached Japan scholars there used their knowledge of Dutch to understand Manchu In *The Early Modern Travels of Manchu* Mårten Söderblom Saarela focuses on outsiders both within and beyond the Qing empire who had little interaction with Manchu speakers but took an interest in the strange new language of a rising world power He shows how through observation inference and reference to received ideas on language and writing intellectuals in southern China Russia France Chosŏn Korea and Tokugawa Japan deciphered the Manchu script and explores the uses to which it was put for recording sounds and arranging words
