From EC to EU Richard McAllister, 2005-08-18 First published in 1997 Routledge is an imprint of Taylor Francis an informa company

**EC/EU, a world security actor?** Gérard Bossuat, 2007

Making the European Monetary Union Harold James, 2012-11-19 Europe's financial crisis cannot be blamed on the Euro James contends in this probing exploration of the whys whens whos and what ifs of European monetary union The current crisis goes deeper to conundrums that were debated but not resolved at the time of the Euro's invention And Euro or no Euro these clashes will continue into the future

*Monitoring Fundamental Rights in the EU* Philip Alston, Olivier De Schutter, 2005-02 Coherent laws enforced by a central authority are part of the reason why human rights protection works at the national level in Europe But when it comes to the EU these dimensions are lacking The present system for protecting fundamental rights emerged on an ad hoc basis with measures being improvised to respond to particular problems In the next couple of years however this situation is likely to change very significantly The proposed European Constitution incorporates the EU Charter of Fundamental Rights and a specialized EU Fundamental Rights Agency is likely to be established As a result the situation of the EU will more closely resemble that of its Member States

Fundamental rights will occupy a central role and coherent and systematic arrangements will be in place to protect rights using both judicial and non judicial means The Fundamental Rights Agency in particular has immense potential to ensure effective monitoring of fundamental rights in the EU and to ensure a unified strategy for their promotion in EU law and policy This volume is the first to critically examine the proposals put forward by the European Commission in October 2004 on the creation of the EU Fundamental Rights Agency Leading scholars in the field of European and international human rights law analyse the potential significance of this innovative Agency and seek to locate it in relation to various other human rights mechanisms both in the EU's constitutional structure and within Member States They review the tasks which the Agency could be called upon to perform and make proposals as to how it can function most effectively The relationship of EU law to the international law of human rights emerging from both the United Nations and the Council of Europe is examined The authors also address the challenge of ensuring improved coherence between EU law and the other human rights obligations undertaken by the Member States Taken together these contributions address urgent questions facing the EU at a time when the central unifying function of fundamental rights has been recognized but the way forward remains largely uncharted

**The International Relations of the EU** Steve Marsh, Hans Mackensteen, 2014-09-11 In an incisive and lively discussion International Relations of the EU examines both the economic and security dimensions of European Union external relations The book adopts an innovative approach that combines International Relations with International Political

Economy Set against a backdrop of EU enlargement and disarray over military intervention in Iraq International Relations of the EU is a timely contribution to our understanding of the EU's role as an international actor The text is suitable for advanced undergraduate courses in Politics and International Relations

Markovits, 2014-05-22 This volume 1 defines the specific anticompetitive intent lessening competition distorting competition and exploitative abuse tests of illegality promulgated by U S and or E U antitrust law 2 compares the efficiency defenses promulgated by U S and E U antitrust law 3 compares the conduct coverage of the various U S and E U antitrust laws 4 defines price competition and quality or variety increasing investment QV investment competition and explains why they should be analyzed separately 5 defines the components of individualized pricing and across the board pricing sellers price minus marginal cost gaps and analyses each's determinants 6 defines the determinants of the intensity of QV investment competition and explains how they determine that intensity 7 demonstrates that definitions of both classical and antitrust markets are inevitably arbitrary not just at their periphery but comprehensively 8 criticizes the various protocols for market definition recommended used by scholars the U S antitrust agencies the European Commission and U S and E U courts 9 explains that a firm's economic market power or dominance depends on its power over both price and QV investment and demonstrates that even if markets could be defined non arbitrarily a firm's economic power could not be predicted from its market share 10 articulates a definition of oligopolistic conduct that some economists have implicitly used conduct whose perpetrator perceived ex ante profitability depended critically on the perpetrator's belief that its rivals responses would be affected by their belief that it could react to their responses distinguishes two types of such conduct contrived and natural by whether it entails anticompetitive threats and or offers explains why this distinction is critical under U S but not E U antitrust law analyzes the profitability of each kind of oligopolistic conduct examines these analyses implications for each's antitrust legality and criticizes related U S and E U case law and doctrine and scholarly positions e g on the evidence that establishes the illegal oligopolistic character of pricing and 11 executes parallel analyses of predatory conduct e g criticizes various arguments for the inevitable unprofitability of predatory pricing the various tests that economists U S courts advocate using use to determine whether pricing is predatory and two analyses by economists of the conditions under which QV investment and systems rivalry are predatory and examines the conditions under which production process research plant modernization and long term full requirements contracts are predatory

**Adapting to European Integration** Kenneth Hanf, Ben Soetendorp, 2014-09-11 Adapting to European Integration describes how the political institutions in eight small member states and two non members responded to the internal and external demands springing from the process of European integration in general and EC EU membership in particular The study makes a distinction between governmental administrative adaptation political adaptation and strategic adaptation The chapters focus in the first instance on the governmental administrative responses at the level of

central government the organisational adjustments and the changes in institutional capacity to meet the new challenges The authors also look at the willingness of the political decision makers to internalise the EC EU dimension in domestic policy making and the way in which the country's own history as well as the attitude towards European integration facilitate or hinder adaptation and change

**European Integration after Amsterdam** Karlheinz Neunreither, Antje

Wiener, 2000-03-16 European integration is at a turning point with implications for all member states and their citizens The Amsterdam treaty marks a shift towards constitutional issues Integration has involved a continually evolving process of constitution making A group of leading scholars argue that the shift towards constitutional issues is rooted not only in the issues on the European level but also in shifting models of political and economic organisation in the member states

Paradoxically however this push towards integration is accompanied by a number of institutional changes and political decisions which challenge the picture of on going integration and indicate a shift towards a new pluralism in the Euro polity The contributors address questions such as what are the likely effects of the Amsterdam treaty changes in comparison with Maastricht how will these changes effect the complex balance among the governing institutions of the EU and what will be the implications for the lingering quest for democracy

China-Europe Relations David Shambaugh, Eberhard

Sandschneider, Zhou Hong, 2007-09-24 Written by a hugely experienced team of international contributors from China Europe and the US this book takes an innovative and insightful look at one of the most important bilateral relationships in international relations this century

**The National Judicial Treatment of the ECHR and EU Laws** Giuseppe

Martinico, Oreste Pollicino, 2010 Have national judges started treating the provisions of the European Convention on Human Rights the same way they treat the EC law's norms In order to answer this question the editors of this book included scholars from the countries that are members both of the EU and the Council of Europe The book collects the proceedings of an international conference held January 16-17 2010 at the Scuola Superiore Sant'Anna of Pisa

*Britain and European*

*Integration since 1945* David Gowland, Arthur Turner, Alex Wright, 2009-10-30 This book provides both a comprehensive introduction and a perceptive examination of Britain's relations with the European Community and the European Union since 1945 combining an historical account with political analysis to illustrate the changing and multifaceted nature of British and European politics Few issues in British politics since 1945 have generated such heated controversy as Britain's approach to the process of European integration associated with the European Union The long running debate on the subject has not only played a major part in the downfall of prime ministers and other leading political figures but has also exposed major fault lines within governments and caused deep and rancorous divisions within and between the major political parties This highly contested issue has given rise to bitter campaigning in the press and between pressure groups and it has bemused confused and divided the public at large Key questions addressed include Why has Europe had such an explosive impact on British politics What impelled British policymakers to join the European Community and to undertake one of the radical if not the

most radical changes in modern British history What have been the perceived advantages and disadvantages of British membership of the European Union Why has British membership of the European Union rarely attracted a national consensus Engaging with both academic and public debates about Britain and the European Union this volume is essential reading for all students of British history British politics and European politics *European Union Foreign Policy and Central America* H. Smith, 1995-07-17 This book provides an evaluation of the European Community's transformation from a rather uncoordinated small group of member states with a barely visible foreign policy into a relatively cohesive and independent foreign policy actor that is today known as the European Union The EC's extensive and hitherto undocumented intervention in the high profile Central American conflict of the 1980s demonstrates a coherence and convergence around a policy that was different from that of the United States and in the end more effective The book also discusses how four key member states Britain the Federal Republic of Germany France and Spain reacted both to the growing crisis in Central America and to West Europe's conflictual relations with the US The EC's foreign policy success will not easily be emulated in another international crisis While the EU remains a non unitary non state actor it is only in non crises that the EU particularly an enlarged EU will be able to operate an effective foreign policy post Maastricht **The European Union and Member States** Dietrich Rometsch, Wolfgang Wessels, 1996 This work provides a country by country analysis of how European policy is made and applied Its central focus is the involvement in European policy making of national institutions governments parliaments sub national government the courts and public administration Whose Freedom, Security and Justice? Anneliese Baldaccini, Elspeth Guild, Helen Toner, 2007-06-28 This book brings together contributions from some of the leading authorities in the field of EU immigration and asylum law to reflect upon developments since the Amsterdam Treaty and particularly the Tampere European Council in 1999 At Tampere Heads of State and Government met to set guidelines for the implementation of the powers and competences introduced by the Amsterdam Treaty and make the development of the Union as an area of freedom security and justice a reality Since 1999 a substantial body of law and policy has developed but the process has been lengthy and the results open to critique This book presents a series of analyses of and reflections on the major legal instruments and policy themes with the underlying question to what extent the ideals held out of freedom security and justice accessible to all are in fact reflected in these legislative and policy developments Has freedom from terrorism and the spectre of illegal or irregular migration and increasingly strict border securitisation and surveillance overshadowed the freedom of the migrant to seek entry or residence for legitimate touristic work study or family reasons a secure refuge from persecution and effective access to justice In 2004 the Heads of State and Government presented a programme for the next stage of development in these areas the Hague Programme and the Directives and Regulations that have been agreed are now being transposed and applied in Member States legal systems What are the main challenges in the years ahead as the Hague Programme and the existing legislative acquis are implemented **EU Policies**

**in Times of Crisis** Gerda Falkner, 2018-10-11 European integration is in a time of multiple crises which has a profound impact on different EU policies This book presents a major collaborative research project uniting international colleagues in the quest for developing a theory when and how will crisis induce policy breakthrough as opposed to stalemate In this volume a team of renowned authors compare the effects of the recent financial economic and neighbourhood crises on the EU's main policy domains including financial market integration trade health migration research energy foreign and state aid policies This book was originally published as a special issue of the Journal of European Integration

*Europe from Below* Tuuli Lähdesmäki, Katja Mäkinen, Viktorija Linda Aldona Čeginskas, Sigrīda Kaasik-Krogerus, 2021-03-15 In this book Tuuli Lähdesmäki, Katja Mäkinen, Viktorija Linda Aldona Čeginskas and Sigrīda Kaasik-Krogerus scrutinize how people who participate in cultural initiatives funded and governed by the European Union understand the idea of Europe The book focuses on three cultural initiatives the European Capital of Culture the European Heritage Label and a European Citizen Campus project funded through the Creative Europe programme These initiatives are examined through field studies conducted in 12 countries between 2010 and 2018 The authors describe their approach as ethnography of Europeanization and conceptualize the attempts at Europeanization in the European Union's cultural policy

as politics of belonging     Interlocking Constitutions Luis I Gordillo, 2012-04-25 The existence of interactions between different but overlapping legal systems has always presented challenges to black letter law This is particularly true of the relationship between international law and domestic law and the relationship between federal law and the laws of individual federation members Moreover some organisations have created their own supranational constitutional systems the United Nations Charter is the best known and is often referred to as the World Constitution but the European Court of Justice in Luxembourg views the European Treaties as a Constitutional Charter for Europe while the European Court of Human Rights has defined the European Convention on Human Rights as a constitutional instrument of European public order It is in the dynamic relationship between domestic constitutional laws EU law the ECHR and the UN Charter that the most persistent difficulties arise In this context interordinal instability not only provokes strong academic interest but also affects what has been called governance or global government and undermines both legal certainty and individual fundamental rights Different solutions constitutionalist and pluralist have been explored but none of them has received global acceptance In this book Luis Gordillo analyses the interordinal instabilities which arise at the European level focusing on three main strands of case law and their implications Solange Bosphorus and Kadi To solve the difficulties caused by this instability Gordillo proposes a form of soft constitutionalism which he calls interordinal constitutionalism as a means to bring order and stability to global legal governance The original Spanish thesis on which this book is based was awarded the Nicol s P rez Serrano Prize by the Centro de Estudios Pol ticos y Constitucionales for the best dissertation in constitutional law 2009 2010
