Haglund, 2019-04-11 This book provides a detailed overview of the debate about the institutional context of Western European security after the Cold War It discusses various aspects of contemporary European security architecture and explores various aspects of the new transatlantic and European threat environment

Parameters, 1994 **The Western European Union At The Crossroads** G. Wyn Rees, G Wyn Rees, 2019-06-26 This book investigates the institutional and operational development of the Western European Union WEU and its proposed enlargement It assesses the motivations of its leading members and the progress made toward enhancing the WEU's role in the 1996-97 Intergovernmental Conference *The American Bibliography of Slavic and East European Studies for 1994* Patt Leonard, Rebecca Routh, 1997-05-31 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs **The New Security Concept and**

German-French Approaches to the European "Pillar of Defence," 1990-2000 Siret Hürsoy, 2002 A historic opportunity without precedent is gradually becoming reality in the 21st Century with the chance taken to pave the way in the period 1990-2000 towards the organisation of defence in Europe The corresponding conditions have been brought about by concrete steps taken at the Maastricht Amsterdam Cologne Helsinki and Nice European Council meetings In the end the EU WEU is developing into an equal partner to the US by assuming greater responsibility in the security and defence sphere The French and German bilateral relationship which is the driving force behind every European integration process is the historical force behind this development of the ultimate desire to reach a robust European Pillar of Defence through reconfiguration of the transatlantic relationship This book provides the first comprehensive and up to date analysis of German and French approaches to the European Pillar of Defence from the view of Europeanisation emanating from the process of integration

Nato's Eastern Dilemmas David G. Haglund, 2019-04-03 The contributors to this book set out to show that NATO's post Cold War troubles are largely self generated and almost exclusively eastern They focus in particular on the issue of what to do with the former Yugoslavia **Securing Civilization?** Alexandra Gheciu, 2008-08-07 This book examines the practices enacted by three key institutions of the transatlantic security community the EU NATO and the OSCE in the name of

combating international terrorism and analyzes the ways in which those practices have both been affected by and contributed to changes in the field of security It argues that contemporary attempts to respond to the perceived threat of international terrorism reflect a particular ethos of risk management and involve a combination of two different an inclusive and an exclusionary logics of security The book examines the interplay between the two logics and analyzes their implications including the ways in which practices that instantiate those logics have contributed to processes of redefinition of norms of governance and reconstitution of boundaries in the security community In developing this analysis the book also

explores the normative and political dilemmas generated by patterns of inclusion exclusion created in the name of fighting terrorism On this basis the book seeks to make a significant contribution to the study of security practices and international governance in the post 9 11 world This book is a project of the Oxford Leverhulme Programme on the Changing Character of War Canadian Defence Industry in the New Global Environment Alistair D. Edgar, David G. Haglund, 1995-05-01 Alistair Edgar and David Haglund examine changes in the international demand for defence products in the post Cold War era review the reorganization and rationalization of the supply side of the international defence market through various government policy initiatives and corporate strategies and discuss the ways in which the Canadian government and defence producers have attempted to cope with this new and uncertain international environment They also explore the international and domestic contexts military economic and political within which defence industries operate Edgar and Haglund s analysis draws on extensive interviews with political and industry leaders military personnel and government officials from Canada the United States the United Kingdom France Belgium the Netherlands Norway Denmark Spain and Germany This timely study of the domestic American and other NATO defence markets will interest scholars and students of Canadian defence policy Canadian foreign policy and Canadian external relations and public servants politicians and personnel in the industry

Between Actor and Presence George MacLean, 2000-09-01 This collection of essays situates Canadian interests within the larger context of political change taking place in Europe and provides a context for the changing nature of this historical relationship and the relative influence of existing institutions Published in English Farm Wars R. Wolfe, 1997-11-09 The Farm War of the early 1980s was rooted in the political economy of agriculture but it was a crisis for the international trading system The war was evident in disruptions on the farm and in world markets in conflicts among major governments and in disagreements in international organizations Wolfe shows how and why battles over agricultural protectionism were largely resolved through the Uruguay Round of GATT negotiations demonstrating that the global economy is not self regulating it needs institutions if it is to be stable **Facilitating Transatlantic Cooperation After the Cold War** Peter Barschdorff, 2001 Why are Europe and America still allied After all many observers predicted after the Cold War that NATO might collapse trade disputes could escalate and political relations would suffer in the absence of a common threat like the one formerly posed by the former Soviet Union This book argues that an *acquis atlantique* is holding the two sides together Common experiences legal stock and understandings make decision makers converge their views on controversial issues such as peace making in the Balkans NATO reform and trade of agricultural goods The *acquis* might change over time But as an analytic concept and as a driver of transatlantic politics it will remain an important constant *Between Actor and Presence* George Andrew MacLean, 2001 This collection of essays situates Canadian interests within the larger context of political change taking place in Europe and provides a context for the changing nature of this historical relationship and the relative influence of existing institutions Published in English *Liberal Peacebuilding and Global Governance* David

Roberts, 2011-03 This book examines the limits to cosmopolitan liberal peacebuilding caused by its preoccupation with the values and assumptions of neoliberal global governance The peace people experience is determined by the processes privileged in peacebuilding This book is about four things that shape the processes involved First it is a critique of orthodox postconflict peacebuilding It takes the position that the present approach although seemingly hegemonic is routinely ignored or manipulated by elites and society and converted into a miasma that to some degree wastes the energies and opportunities involved Second it is about alternatives which invoke the kind of peace people might seek in postconflict places if they had more control over the process of peacebuilding a notion referred to here as popular peace It is thus not the kind of critical work that some describe as reflexive anti liberalism Rather it seeks alternatives that are grounded in the lives of people in postconflict spaces and which also reflect some of the essential values of Liberalism Third it is about the role of both informal and formal actors institutions and practices in the creation of such a peace For instance it is concerned with the legitimacy of informal practices that lie beyond Liberal tolerance and which are vital in the pursuit of everyday peace Fourth it is about a transversal rather than vertical or hierarchical relationship of global and local governance in securing a peace that reflects the needs and values of both In short this work is a response to the substantial inconsistencies that appear between peacebuilding rhetoric and everyday outcomes in postconflict places This book will be of much interest to students of peacebuilding post conflict statebuilding conflict studies global governance and International Relations in general

State, 1994 State Magazine, 1996 Newsletter United States. Department of State, 1994 *Crafting EU Security Policy*

Stephanie B. Anderson, 2008 In the absence of external security threats and especially given that most of the EU member states are also members of NATO what explains the European Union's commitment to a distinct collective security policy What justifies channeling funds from cash strapped European governments to finance that policy Ranging from the early post Cold War years to the present Stephanie Anderson explores the arguably surprising motivation behind the EU's security and defense policy how the ESDP has developed how it has transformed the EU and how it might further the European integration project

The Future of East-Central Europe Andrzej Dumała, Ziemowit Jacek Pietraś, 1996 Stay the Course Simon Serfaty, Center for Strategic and International Studies (Washington, D.C.), 1997-03-30 Serfaty argues that U S interests in Europe have become so significant as to create an increasingly common Euro Atlantic space from which disentanglement is no longer possible The reality of this space does not mean an Americanization of Europe any more than it does the Europeanization of America Serfaty points to the ways the United States is connected to Europe the areas of friction and the outlook for future common interests and joint approaches to challenges throughout the world By pointing to the ways the United States is connected to Europe by examining the areas of friction and projecting future common interests and joint approaches to challenges throughout the world Serfaty shows why staying the course is vital to European as well as American interests A significant analysis for scholars researchers and policy makers concerned with contemporary American

and European foreign policy and relations
