empedocles' cosmic cycle , **Aristotle and Other Platonists** Lloyd P. Gerson, 2017-12-01 Aristotle versus Plato For a long time that is the angle from which the tale has been told in textbooks on the history of philosophy and to university students Aristotle s philosophy so the story goes was au fond in opposition to Plato s But it was not always thus from the Introduction In a wide ranging book likely to cause controversy Lloyd P Gerson sets out the case for the harmony of Platonism and Aristotelianism the standard view in late antiquity He aims to show that the twentieth century view that Aristotle started out as a Platonist and ended up as an anti Platonist is seriously flawed Gerson examines the Neoplatonic commentators on Aristotle based on their principle of harmony In considering ancient studies of Aristotle s Categories Physics De Anima Metaphysics and Nicomachean Ethics the author shows how the principle of harmony allows us to understand numerous texts that otherwise appear intractable Gerson also explains how these esoteric treatises can be seen not to conflict with the early exoteric and admittedly Platonic dialogues of Aristotle Aristotle and Other Platonists concludes with an assessment of some of the philosophical results of acknowledging harmony **The Democracy Index** Heather K. Congress. House. Committee on Armed Services. Strategic Forces Subcommittee, 2010 **The Images of Time** Robin Le Poidevin, 2007-09-27 The Images of Time presents a philosophical investigation of the nature of time and the mind s ways of representing it Robin Le Poidevin examines how we perceive time and change the means by which memory links us with the past the attempt to represent change and movement in art and the nature of fictional time These apparently disparate questions all concern the ways in which we represent aspects of time in thought experience art and fiction They also raise fundamental problems for our philosophical understanding both of mental representation and of the nature of time itself Le Poidevin brings together issues

in philosophy psychology aesthetics and literary theory in examining the mechanisms underlying our representation of time in various media and brings these to bear on metaphysical debates over the real nature of time These debates concern which aspects of time are genuinely part of time's intrinsic nature and which in some sense are mind dependent Arguably the most important debate concerns time's passage does time pass in reality or is the division of events into past present and future simply a reflection of our temporal perspective a result of the interaction between a static world and minds capable of representing it Le Poidevin argues that contrary to what perception and memory lead us to suppose time does not really pass and this surprising conclusion can be reconciled with the characteristic features of temporal experience
