Measuring Mass Michael A. Grayson,2002

Measuring Mass From Positive Rays to Proteins is part of a celebration of fifty years of the Annual Conference on Mass Spectrometry and Allied Topics As such it is intended not only for practitioners of mass spectrometry but also for the lay reader interested in knowing more about the field Many who practice the art and science of mass spectrometry are unaware of how the technique is applied outside their particular area of expertise This short exposition will provide the practitioner and lay reader alike with an appreciation for the diverse applications of mass spectrometry in present day scientific endeavors Measuring Mass is also intended to celebrate the major events in the history of mass spectrometry While a complete history of the field would require a tome of much greater size this book provides a flavor of how mass spectrometry developed from an early 20th century curiosity of the physics laboratory into the powerful analytical tool of today The intertwined stories of advances in the technology and instrumentation of mass spectrometry with the demand to extend the tool to more complex analytical problems are explored in chapters on applications in geology chemistry biology pharmaceuticals space the environment and forensic science

Pictorial Archaeology Roger Balm, 2024-02-27 This book explores the expressly pictorial type of visual archaeology the transcribing of three dimensional materiality into two dimensional depictions and its influential history within the discipline The picturing of ancient sites and artifacts to convey information links visual reporting with the workings of the imagination and indicates that the study of antiquity has always had a hybrid identity part artistic and part scientific In examining expressly pictorial forms of visual story telling about the past this book looks beyond certain supposed creative turns and focuses instead on creative continuities answering key questions about the power of picturing and its ability to not only inform documentary practices but actively structure those practices How are prints drawings paintings and photographs able to collapse the three dimensional world of the ancient past onto a flat page but also convey a sense of material reality In contemporary practice how do pictorial ways of seeing enable the interpretation of material remains but also shape the recognition of digital traces on a computer screen Published illustrations both historical and contemporary are primary sources of evidence for answering such questions and identifying common patterns of pictorial information This book provides a framework for scholars researching the visual culture of archaeology as well as the history of archaeology It is also recommended for professionals in the fields of heritage studies conservation and community archaeology

Hot Carbon John F. Marra, 2019-06-25 There are few fields of science that carbon 14 has not touched A radioactive isotope of carbon it stands out for its unusually long half life Best known for its application to estimating the age of artifacts carbon dating carbon 14 helped reveal new chronologies of human civilization and geological time Everything containing carbon the basis of all life could be placed in time according to the clock of radioactive decay with research applications ranging from archeology to oceanography to climatology In Hot Carbon John F Marra tells the untold story of this scientific revolution He weaves together the workings of the many disciplines that employ carbon 14 with gripping tales of the individuals who pioneered its possibilities He describes the concrete applications of carbon 14 to the study of all the stuff of life on earth from climate science s understanding of change over time to his own work on oceanic photosynthesis with microscopic phytoplankton Marra s engaging narrative encompasses nuclear testing the peopling of the Americas elephant poaching and the flax plants used for the linen in the Shroud of Turin Combining colorful narrative prose with

accessible explanations of fundamental science Hot Carbon is a thought provoking exploration of how the power of carbon 14 informs our relationship to the past Scientific Investigation of Copies, Fakes and Forgeries Paul Craddock,2009-02-04 The faking and forgery of works of art and antiquities is probably now more extensive than ever before The frauds are aided by new technologies from ink jet printers to epoxy resins and driven by the astronomic prices realised on the global market This book aims to provide a comprehensive survey of the subject over a wide range of materials emphasising how the fakes and forgeries are produced and how they may be detected by technical and scientific examination The subject is exemplified by numerous case studies some turning out not to be as conclusive as is sometimes believed The book is aimed at those likely to have a serious interest in these investigations be they curator collector conservator or scientist Paul Craddock has recently retired from the Department of Conservation Documentation and Science at the British Museum where he was a materials scientist A Natural History of the New World Alan Graham,2011 A Natural History of the New World traces the evolution of plant ecosystems beginning in the Late Cretaceous period and ending in the present charting their responses to changes in geology and climate Report of Research Center of Ion Beam Technology, Hosei University ,2007 CERN Courier European Organization for Nuclear Research,1999 This journal is devoted to the latest research on physics publishing articles on everything from elementary particle behavior to black holes and the history of the universe **Chemical Heritage** ,2001 Choice ,1999 **Handbook of Archaeological Sciences** D. proton induced X ray emission PIXE spectroscopy Isotopic techniques to investigate element behaviour in biology and medicine and also to validate other non nuclear analytical techniques are described Destructive and non destructive approaches are presented along with their use to investigate very small and very large samples archaeological samples and extraterrestrial samples Several nuclear analytical applications in industry are described that have considerable socioeconomic impact wherever they can be implemented
