**A Social History of England, 900-1200** Julia Crick, Elisabeth van Houts, 2011-04-21 The years between 900 and 1200 saw transformative social change in Europe including the creation of extensive town dwelling populations and the proliferation of feudalised elites and bureaucratic monarchies In England these developments were complicated and accelerated by repeated episodes of invasion migration and changes of regime In this book scholars from disciplines including history archaeology and literature reflect on the major trends which shaped English society in these years of transition and select key themes which encapsulate the period The authors explore the landscape of England its mineral wealth its towns and rural life the health behaviour and obligations of its inhabitants patterns of spiritual and intellectual life and the polyglot nature of its population and culture What emerges is an insight into the complexity diversity and richness of this formative period of English history

*Literary Sociability in Early Modern England* Paul Trolander, 2014-05-29 This study represents a significant reinterpretation of literary networks during what is often called the transition from manuscript to print during the early modern period It is based on a survey of 28 000 letters and over 850 mainly English correspondents ranging from consumers to authors significant patrons to state regulators printers to publishers from 1615 to 1725 Correspondents include a significant sampling from among antiquarians natural scientists poets and dramatists philosophers and mathematicians political and religious controversialists The author addresses how early modern letter writing practices sometimes known as letteracy and theories of friendship were important underpinnings of the actions and the roles that seventeenth and early eighteenth century authors and readers used to communicate their

needs and views to their social networks These early modern social conditions combined with an emerging view of the manuscript as a seedbed of knowledge production and humanistic creation that had significant financial and cultural value in England's mercantilist economy Because literary networks bartered such gains in cultural capital for state patronage as well as for social and financial gains this placed a burden on an author's associates to aid him or her in seeing that work into print a circumstance that reinforced the collaborative formulae outlined in letter writing handbooks and friendship discourse Thus the author's network was more and more viewed as a tightly knit group of near equals that worked collaboratively to grow social and symbolic capital for its associates including other authors readers patrons and regulators Such internal methods for bartering social and cultural capital within literary networks gave networked authors a strong hand in the emerging market economy for printed works as major publishers such as Bernard Lintott and Jacob Tonson relied on well connected authors to find new writers as well as to aid them in seeing such major projects as Pope's *The Iliad* into print

Writing, Society and Culture in Early Rus, c.950-1300 Simon Franklin, 2002-08-29 This book provides a thorough survey and analysis of the emergence and functions of written culture in Rus covering roughly the modern East Slav lands of European Russia Ukraine and Belarus Part I introduces the full range of types of writing the scripts and languages the materials the social and physical contexts ranging from builders' scratches on bricks through to luxurious parchment manuscripts Part II presents a series of thematic studies of the socio cultural dynamics of writing in order to reveal and explain distinctive features in the Rus assimilation of the technology The comparative approach means that the book may also serve as a case study for those with a broader interest either in medieval uses of writing or in the social and cultural history of information technologies Overall the impressive scholarship and idiosyncratic wit of this volume commend it to students and specialists in Russian history and literature alike Awarded the Alec Nove Prize given by the British Association for Slavonic and East European Studies for the best book of 2002 in Russian Soviet or Post Soviet studies

**The History of Illiteracy in the Modern World Since 1750** Martyn Lyons, 2022-11-28 This Palgrave Pivot examines the history of literacy with illiterate and semi literate people in mind and questions the clear division between literacy and illiteracy which has often been assumed by social and economic historians Instead it turns the spotlight on all those in between the millions who had some literacy skills but for whom reading and writing posed difficulties Its main focus is on those we have often labelled illiterates rather than those who enjoyed full competence in reading and writing in modern society In offering a historical perspective on the problem of illiteracy in the modern world it also questions some enduring myths surrounding the phenomenon This book therefore has a revisionist objective it intends to challenge conventional wisdom about illiteracy

*Literacy in a Digital World* Kathleen Tyner, 2014-04-08 In this book Kathleen Tyner examines the tenets of literacy through a historical lens to demonstrate how new communication technologies are resisted and accepted over time New uses of information for teaching and learning create a disconnect in the complex relationship between literacy and schooling and raise questions about the

purposes of literacy in a global networked educational environment The way that new communication technologies change the nature of literacy in contemporary society is discussed as a rationale for corresponding changes in schooling Digital technologies push beyond alphabetic literacy to explore the way that sound image and text can be incorporated into education Attempts to redefine literacy terms computer information technology visual and media literacies proliferate and reflect the need to rethink entrenched assumptions about literacy These multiple literacies are advanced to help users make sense of the information glut by fostering the ability to access analyze and produce communication in a variety of forms Tyner explores the juncture between two broad movements that hope to improve education educational technology and media education A comparative analysis of these two movements develops a vision of teaching and learning that is critical hands on inquiry based and suitable for life in a mobile global participatory democracy

**Margery Kempe and Translations of the Flesh** Karma Lochrie, 2012-07-24 Selected by Choice magazine as an Outstanding Academic Book for 1999 Karma Lochrie demonstrates that women were associated not with the body but rather with the flesh that disruptive aspect of body and soul which Augustine claimed was fissured with the Fall of Man It is within this framework that she reads The Book of Margery Kempe demonstrating the ways in which Kempe exploited the gendered ideologies of flesh and text through her controversial practices of writing her inappropriate seeming laughter and the most notorious aspect of her mysticism her hysterical weeping expressions of religious desire Lochrie challenges prevailing scholarly assumptions of Kempe's illiteracy her role in the writing of her book her misunderstanding of mystical concepts and the failure of her book to influence a reading community In her work and her life Kempe consistently crossed the barriers of those cultural taboos designed to exclude and silence her Instead of viewing Kempe as marginal to the great mystical and literary traditions of the late Middle Ages this study takes her seriously as a woman responding to the cultural constraints and exclusions of her time Margery Kempe and Translations of the Flesh will be of interest to students and scholars of medieval studies intellectual history and feminist theory

*Memory and Commemoration in Medieval Culture* Elma Brenner, Meredith Cohen, Mary Franklin-Brown, 2016-04-22 In medieval society and culture memory occupied a unique position It was central to intellectual life and the medieval understanding of the human mind Commemoration of the dead was also a fundamental Christian activity Above all the past and the memory of it occupied a central position in medieval thinking from ideas concerning the family unit to those shaping political institutions Focusing on France but incorporating studies from further afield this collection of essays marks an important new contribution to the study of medieval memory and commemoration Arranged thematically each part highlights how memory cannot be studied in isolation but instead intersects with many other areas of medieval scholarship including art history historiography intellectual history and the study of religious culture Key themes in the study of memory are explored such as collective memory the links between memory and identity the fallibility of memory and the linking of memory to the future as an anticipation of what is to come

Culture, Power and Personality in Medieval

France John F. Benton,1991-07-01 This collection is a notable example of how the cultural history of the middle ages can be written in terms that satisfy both the historian and the literary scholar John Benton s knowledge of the personnel structure and finance of medieval courts complemented his understanding of the literature they produced **The Haskins Society Journal** William North,Laura L. Gathagan,2013-10-17 The latest historical and interdisciplinary research on the early and central Middle Ages focussing on the the Anglo Saxon Anglo Norman and Angevin worlds Topics considered include the role of material objects in Orderic Vitalis s History landholding and service in England after the Norman Conquest and self flagellation in eleventh century Italy **Handbook of Medieval Culture. Volume 2** Albrecht Classen,2015-08-31 A follow up publication to the Handbook of Medieval Studies this new reference work turns to a different focus medieval culture Medieval research has grown tremendously in depth and breadth over the last decades Particularly our understanding of medieval culture of the basic living conditions and the specific value system prevalent at that time has considerably expanded to a point where we are in danger of no longer seeing the proverbial forest for the trees The present innovative handbook offers compact articles on essential topics ideals specific knowledge and concepts defining the medieval world as comprehensively as possible The topics covered in this new handbook pertain to issues such as love and marriage belief in God hell and the devil education lordship and servitude Christianity versus Judaism and Islam health medicine the rural world the rise of the urban class travel roads and bridges entertainment games and sport activities numbers measuring the education system the papacy saints the senses death and money **The Uses of Literacy in Early Mediaeval Europe** Rosamond McKitterick,1990 This book investigates the importance of literacy in early medieval Europe in a number of different societies between c 400 and c 1000 *The Making of Memory in the Middle Ages* Lucie Doležalová,2009-11-17 Memory in the Middle Ages has received particular attention in recent decades yet the topic remains difficult to grasp and the research on it rather fragmented This book gathers particular case studies on memory in different parts of medieval Europe and in a variety of fields including literatures languages manuscript studies history history of ideas philosophy social history and art history The studies address on the one hand memory as means of storing and recuperating knowledge arts of memory and memory aids and on the other hand memory as remembering and constructing the past including the subject of forgetting It should be useful to all interested in medieval culture literature and history Contributors are Milena Bartlov Bergsveinn Birgisson Irene Bueno Vincent Challet Greti Dinkova Bruun Lucie Dole alov D vid Falvay Carmen Florea C dric Giraud Laura Iseppi de Filippis Farkas G bor Kiss R diger Lorenz Else Mundal El d Nemerkiyi William J Purkis Slavica Rankovi Lucia Raspe Kimberly Rivers Victoria Smirnova Francesco Stella P ter T th Tam s Visi Jon Whitman and Rafa W jcik **York** Sarah Rees Jones,2013-10-24 York was one of the most important cities in medieval England This original study traces the development of the city from the Norman Conquest to the Black Death The twelfth and thirteenth centuries are a neglected period in the history of English towns and this study argues that the period was absolutely fundamental to the

development of urban society and that up to now we have misunderstood the reasons for the development of York and its significance within our history because of that neglect Medieval York argues that the first Norman kings attempted to turn the city into a true northern capital of their new kingdom and had a much more significant impact on the development of the city than has previously been realised Nevertheless the influence of York Minster within whose shadow the town had originally developed remained strong and was instrumental in the emergence of a strong and literate civic communal government in the later twelfth and thirteenth centuries Many of the earlier Norman initiatives withered as the citizens developed their own institutions of government and social welfare The primary sources used are records of property ownership and administration especially charters and combines these with archaeological evidence from the last thirty years Much of the emphasis of the book is therefore on the topographical development of the city and the changing social and economic structures associated with property ownership and occupation

Mutative Media James A. Dator, John A. Sweeney, Aubrey M. Yee, 2014-09-09 Mutative Media is a sweeping examination of how communication technologies have contributed to changes in people's thoughts and actions and thus in the power structures of societies in the past at present and in four alternative futures We start by surveying what is generally known about the emergence of human language and speech that has enabled humans to extend their organizing abilities beyond that of other hominids We then review research on the emergence of signs symbols and eventually writing which led to new ways of thinking acting and organizing in scribal societies and vastly extended human influence globally We consider the impact of the printing press in Europe the Middle East China and Korea that led to various ways of thinking and organizing in modern societies and conclude our historical survey with a discussion of the emergence and impact of electric and electronic communication technologies from the nineteenth century to the present After a brief overview of what futures studies is and is not based on our extensive experience in the field we present four generic alternative futures and discuss a prototype of a hybrid mixed reality game designed to enable players to experience the power and potential of new communication technologies within four very different environments and conditions We think you will be intrigued by our surprising findings and what they may mean for future generations

The Law of the Other Marianne Constable, 1994-02-14 The Law of the Other is an account of the English doctrine of the mixed jury Constable's excavation of the historical rhetorical and theoretical foundations of modern law recasts our legal and sociological understandings of the American jury and our contemporary conceptions of law citizenship and truth The mixed jury doctrine allowed resident foreigners to have law suits against English natives tried before juries composed half of natives and half of aliens like themselves As she traces the transformations in this doctrine from the Middle Ages to its abolition in 1870 Constable also reveals the emergence of a world where law rooted in actual practices and customs of communities is replaced by law determined by officials where juries no longer strive to speak the truth but to ascertain the facts
