*Pandora's Hope* Bruno Latour, 1999-06-30 A scientist friend asked Bruno Latour point blank Do you believe in reality Taken aback by this strange query Latour offers his meticulous response in *Pandora's Hope* It is a remarkable argument for understanding the reality of science in practical terms In this book Latour identified by Richard Rorty as the new *be te noire* of the science worshipers gives us his most philosophically informed book since *Science in Action* Through case studies of scientists in the Amazon analyzing soil and in Pasteur's lab studying the fermentation of lactic acid he shows us the myriad steps by which events in the material world are transformed into items of scientific knowledge Through many examples in the world of technology we see how the material and human worlds come together and are reciprocally transformed in this process Why Latour asks did the idea of an independent reality free of human interaction emerge in the first place His answer to this question harking back to the debates between *Might and Right* narrated by Plato points to the real stakes in the so called science wars the perplexed submission of ordinary people before the warring forces of claimants to the ultimate truth

**Goal-based Decision Making** Stephen Slade, 2013-06-17 This work presents a goal based model of decision making in which the relative priorities of goals drive the decision process a psychological alternative to traditional decision analysis Building on the work of Schank and Abelson the author uses goals as the basis for a model of interpersonal relations which permits decisions to incorporate personal and adopted goals in a uniform manner The theory is modelled on the VOTE computer program which simulates Congressional roll call voting decisions The VOTE program expands traditional decision making and simulation models by providing not only a choice but also a natural language explanation in either English or French It simulates real members of Congress voting on real bills and producing reasonable explanations The program is consistent with much of the descriptive political science literature on Congressional decision making and provides an explicit model of political issues relationships and strategies that converge in voting behavior In developing the VOTE program the author draws on his own practical experience in politics from four presidential campaigns and the White House Given the underlying psychological basis of the program VOTE can be extended to other decision making domains different from

politics Another use for the program is to simulate business decisions such as securities analysis as well as mundane decision making such as choosing a college or deciding whether to get a Mohawk haircut America's Gun Wars Donald J. Campbell, 2019-04-10 This book examines the controversies surrounding gun control which are less about whether it works and more about whether the nation should prioritize traditional values of rugged independence or newer values of communitarian interdependence America's Gun Wars contends that an understanding of America's gun controversy cannot be found in statistics documenting the rise or fall of violent crime or in examining trade offs between societal needs and personal safety or in following the political maneuvering of advocacy groups such as the National Rifle Association or Everytown for Gun Safety At heart the gun controversy is a values conflict involving how people see themselves and how they make sense of the world they live in Understanding this controversy requires a deep analysis of the profoundly different cultures inhabited by pro and anti gun activists lawmakers and voters Written by a social scientist who has spent his life exploring how values and self perceptions impact behavior this book explores the origins and evolution of cultures in American society the beliefs experiences and principles that guide the behavior of members in both camps and the triumphs and failures that the two sides have experienced from colonial times to the present day **Guns in American Society** Jaclyn Schildkraut, Gregg Lee Carter, 2022-12-01 The revised third edition of the landmark Guns in American Society provides an authoritative and objective survey of the history and current state of all gun related issues and areas of debate in the United States Guns in American Society An Encyclopedia of History Politics Culture and the Law is a comprehensive and evenhanded three volume reference resource for understanding all of the political legal and cultural factors that have swirled around gun rights and gun control in America past and present The encyclopedia draws on a vast array of research in criminology history law medicine politics and social science It covers all aspects of the issue gun violence including mass shootings in schools and other public spaces gun control arguments and organizations gun rights arguments and organizations the firearms industry firearms regulation legislation and court decisions gun subcultures for example hunters and collectors leading opinion shapers on both sides of the gun debate technological innovations in firearm manufacturing various types of firearms from handguns to assault weapons and evolving public attitudes toward guns Many of these entries place the topics in both historical and cross cultural perspective *Firearms Legislation: (Atlanta) July 21* United States.
