Modern Theories of Art 1 Moshe Barasch, 1990-02-01 This is an analytical survey of the thought about painting and sculpture as it unfolded from the early eighteenth to the mid nineteenth centuries This was the period during which theories of the visual arts particularly of painting and sculpture underwent a radical transformation as a result of which the intellectual foundations of our modern views on the arts were formed Because this transformation can only be understood when seen in a broad context of cultural aesthetic and philosophical developments of the period Moshe Barasch surveys the opinions of the artists and also treats in some detail the doctrines of philosophers poets and critics Barasch thus traces for the reader the entire development of modernism in art and art theory

Jung's Reception of Picasso and Abstract Art Lucinda Hill, 2022-03-31 This book explores the nature of Jung's understanding of modern art in particular his reception to the work of Picasso and his striking prejudice shown in his controversial essay of 1932 Offering an important contribution towards understanding Jung's attitudes towards Picasso and modern art the book addresses the impact that Jung's unwillingness to engage in a deeper exploration of modern artforms had on the development of his psychological ideas It explores and uncovers the reasons for Jung's derogatory view of Picasso and abstract art more generally revealing how Jung

terms     **Envisioning Worlds in Late Antique Art** Anna Cecilia Olovsson, 2018-12-17 It has long been an accepted assumption that the abstracted mode of visual representation that emerged in late antiquity reflected a collective shift from the outer directed and material world view of classical antiquity to an inner directed spiritual mentality informed by Christianity the purpose of this volume is to offer a more nuanced and diverse image of the nature and meanings of abstraction and symbolism in late antique and early medieval art beyond normative interpretation models and from a number of different methodological and interpretative perspectives In ten chapters ten authors specialised in various fields of late antique and Byzantine art explore the historiographical background of the spiritual interpretation paradigm neuroscientific and theological dimensions of Christian visual aesthetics meanings and motive factors behind apparently wholly abstract and aniconic compositions symbolic motifs and schemes for visualising cosmic order and the cosmic state of Christ and the re use of symbolic Greco Roman themes in Christian contexts The result is a multi focal image of late antique abstraction and symbolism that illuminates the heterogeneity and complexity of the phenomena and of their study     **Mind over Matter: How Spirituality Changes Lives** , 2025-02-27 Mind over Matter is an interdisciplinary collection of essays exploring how spirituality changes lives in a variety of ways Unlike much philosophically rooted literature on spirituality it encourages an understanding of what can be achieved through faith belief and self confidence without reliance on specific or necessarily any religious doctrines or views From theistic non theistic or atheistic perspectives each chapter addresses a distinctive phenomenon for example spirituality and healing spirituality and art spirituality and running and spirituality as a response to disaster Not only do they integrate the results of scientific research and other intellectual investigations to illuminate accomplishments and sometimes possible sources of failure but they are also written by academics with practical experience in relevant areas or at least informed by ideas of practitioners     *Design Strategies for Reimagining the City* Linda Matthews, 2022-06-24 Design Strategies for Reimagining the City is situated between projective geometry optical science and architectural design It draws together seemingly unrelated fields in a series of new digital design tools and techniques underpinned by tested prototypes The book reveals how the relationship between architectural design and the ubiquitous urban camera can be used to question established structures of control and ownership inherent within the visual model of the Western canon Using key moments from the broad trajectory of historical and contemporary representational mechanisms and techniques it describes the image s impact on city form from the inception of linear perspective geometry to the digital turn The discussion draws upon combined fields of digital geometry the pictorial adaptation of human optical cues of colour brightness and shape and modern image capture technology webcams mobile phones and UAVs to demonstrate how the permeation of contemporary urban space by digital networks calls for new architectural design tools and techniques A series of speculative drawings and architectural interventions that apply the new design tools and techniques complete the book Aimed at researchers academics and upper level students in digital design and theory it makes a timely contribution to the

ongoing and broadly debated relationship between representation and architecture

**The Nonsense of Kant and Lewis Carroll** Ben-Ami Scharfstein, 2024-05-31 What if Immanuel Kant floated down from his transcendental heights straight through Alice's rabbit hole and into the fabulous world of Lewis Carroll For Ben Ami Scharfstein this is a wonderfully instructive scenario and the perfect way to begin this wide ranging collection of decades of startlingly synthesized thought Combining a deep knowledge of psychology cultural anthropology art history and the history of religions not to mention philosophy he demonstrates again and again the unpredictability of writing and thought and how they can teach us about our experiences Scharfstein begins with essays on the nature of philosophy itself moving from an autobiographical account of the trials of being a comparativist to philosophy's function in the outside world to the fear of death in Kant and Hume From there he explores an impressive array of art from China and Japan to India and the West from an essay on sadistic and masochistic body art to one on the epistemology of the deaf and the blind He then returns to philosophy writing on Machiavelli and political ruthlessness then on the ineffable and closes with a review of Walter Kaufmann's multivolume look at the essence of humanity Discovering the Mind Altogether these essays are a testament to adventurous thought the kind that leaps to the furthest reaches of the possible

**In Pursuit of Universalism** Alicia Volk, 2010 Volk's impressive study rethinks the East West binary often reiterated in discussions of Japanese modernism by reinserting local aspects into the universalizing tendencies of modernism itself The book makes an important contribution to the growing literature on modern Japanese art history by providing an alternative comparative framework for understanding the global development of modernism that decenters Euro America Rigorously historical in her critique Volk destabilizes our understanding of the Japanese experience of modernity through the prism of Yorozu's singular vision of the self leaving us questioning conventional wisdom and contented to wobble Gennifer Weisenfeld Duke University In Volk's affectingly stunning and deeply reflective study of the Japanese artist Yorozu Tetsugor's work between 1910-1930 we have a profoundly historical reminder of how modernism everywhere struggled to meet the demands of the new with the readymades of received artistic practices In this study of Yorozu's utopian universalist project Volk has imaginatively broadened our understanding of the modernist moment and perceptively captured its global program to unify art and life contemporary culture and history Harry Harootunian author of *Overcome by Modernity* History Culture and Community in Interwar Japan
