From Information To Intrigue:

Nothing Sacred David Alvarez, Revd Robert A., SJ Graham, 2013-11-05 Nazi Germany considered the Catholic Church to be a serious threat to its domestic security and its international ambitions In Germany informants provided intelligence but in Rome German attempts to penetrate the Papacy were less successful except for the codebreaking work *Swedish Signal Intelligence 1900-1945* Bengt Beckman, C.G. McKay, 2013-01-11 A history of Swedish interception of radio and telegraph messages during World Wars I and II providing a valuable background to Swedish military operations at this time This should prove a valuable work for anyone interested in the intelligence systems at work during wartime *Taking Nazi Technology* Douglas M. O'Reagan, 2021-03-30 Intriguing real life espionage stories bring to life a comparative history of the Allies efforts to seize control and exploit German science and technology after the Second World War During the Second World War German science and technology posed a terrifying threat to the Allied nations These advanced weapons which included rockets V 2 missiles tanks submarines and jet airplanes gave troubling credence to Nazi propaganda about forthcoming wonder weapons that would turn the war decisively in favor of the Axis After the war ended the Allied powers raced to seize intellectual reparations from almost every field of industrial technology and academic science in occupied Germany It was likely the largest scale technology transfer in history In *Taking Nazi Technology* Douglas M O Reagan describes how the Western Allies gathered teams of experts to scour defeated Germany seeking industrial secrets and the technical personnel who could explain them Swarms of investigators invaded Germany's factories and research institutions seizing or copying all kinds of documents from patent applications to factory production data to science journals They questioned hired and sometimes even kidnapped hundreds of scientists engineers and other technical personnel They studied technologies from aeronautics to audiotapes toy making to machine tools chemicals to carpentry equipment They took over academic libraries jealously competed over chemists and schemed to deny the fruits of German invention to any other land including that of other Allied nations Drawing on declassified records O Reagan looks at which techniques worked for these very different nations as well as which failed and why Most importantly he shows why securing this technology how the Allies did it and when still matters today He also argues that these programs did far more than spread German industrial science they forced businessmen and policymakers around the world to rethink how science and technology fit into diplomacy business and society itself *Special Operations in Norway* Ian Herrington, 2019-04-04 Between 1940 and 1945 Britain's Special Operations Executive SOE carried out sabotage and organised resistance across occupied Europe Over 5 years SOE sent over 500 agents into Norway to carry out a range of operations from sabotage and assassination to attempts to organise an underground guerrilla army This book is the first multi archival international academic analysis of SOE's policy and operations in Norway and the influences that shaped them challenging previous interpretations of the relationship between this organisation and both the Norwegian authorities and the Milorg resistance movement *Ontology after Carnap*

Stephan Blatti, Sandra Lapointe, 2016-03-25 Analytic philosophy is once again in a methodological frame of mind. Nowhere is this more evident than in metaphysics whose practitioners and historians are actively reflecting on the nature of ontological questions, the status of their answers and the relevance of contributions both from other areas within philosophy e.g. philosophical logic, semantics and beyond, notably the natural sciences. Such reflections are hardly new; the debate between Willard van Orman Quine and Rudolf Carnap about how to understand and resolve ontological questions is widely seen as a turning point in twentieth century analytic philosophy. And indeed this volume is occasioned by the fact that the deflationary approach to metaphysics advocated by Carnap in that debate is once again attracting considerable interest and support. Containing eleven original essays by many of today's leading voices in metametaphysics, *Ontology After Carnap* aims both to deepen our understanding of Carnap's contributions to metaontology and to explore how this legacy might be mined for insights into the contemporary debate. This collection will be of interest to scholars and students working in metaphysics, semantics, philosophical logic, metaphilosophy and the history of analytic philosophy. *The Dramaturgy of Opera. Aspects of Contemporary Reading* Vania Batchvarova, 2017-04-29 Directing an opera is examined as a kind of a practical applied philosophy. The opera dramaturgy is an expression of social interrelation; the individual follows a social psychological process and their impact on the musical language. The objective borders of the philosophical context are outlined. The theoretical analysis develops further to the practical. The sphere of theory is leaved through the creation of work hypotheses for stage setting and begins a process of transference from authors' intention to analogue decisions for interpretation. *Fourteenth Century England* James Bothwell, Gwilym Dodd, 2016 Articles showcasing the fruits of the most recent scholarship in the field of fourteenth century studies. **Role Playing Game** J. Michael Straczynski, Matthew Sprange, 2006-04 Featuring the space station that changed the destiny of an entire galaxy, the Babylon 5 RPG from Mongoose Publishing allows players to take on the role of characters from the award winning TV series. This all new edition revisits one of the most successful sci fi roleplaying games of recent years bringing the game to an all new group of fans. Existing fans will not be disappointed; the rules have been tweaked so that the game is even better than before and most importantly is a stand alone rulebook in its own right with no requirement for the use of another rulebook. **Beeton's Dictionary of universal information; comprising a complete summary of the moral, mathematical, physical and natural sciences [&c., ed. by S.O. Beeton and J. Sherer. Wanting pt. 13].** Samuel Orchart Beeton, 1870 *New Art and Science of Teaching* Robert J. Marzano, 2017-02-10 This title is a greatly expanded volume of the original *Art and Science of Teaching* offering a competency based education framework for substantive change based on Dr Robert Marzano's 50 years of education research.
