From Know How To Nowhere The Development Of American Technology:

From Know-how to Nowhere Elting Elmore Morison, 1974 *A Social History of American Technology* Ruth Schwartz Cowan, Matthew H. Hersch, 2018 *A Social History of American Technology* Second Edition tells the story of American technology from the tools used by its earliest inhabitants to the technological systems cars and computers aircraft and antibiotics that we are familiar with today Ruth Schwartz Cowan and Matthew H Hersch demonstrate how technological change has always been closely related to social and economic development and examine the important mutual relationships between social history and technological change They explain how the unique characteristics of American cultures and American geography have affected the technologies that have been invented manufactured and used throughout the years and also the reverse how those technologies have affected the daily lives the unique cultures and the environments of all Americans

From Know How Ro Nowhere Elting Elmore Morison, 1975-02-19 Includes the work of engineers John Jervis John Fritz and an essay on what technology should do in the future

Early American Technology Judith A. McGaw, 1994 This collection of original essays documents technology s centrality to the history of early America Unlike much previous scholarship this volume emphasizes the quotidian rather than the exceptional the farm household seeking to preserve food or acquire

Technology in America Carroll Pursell, 1990-04-12 This is a collection of essays focusing on the spread and elaboration of American technology and on the men and women who shaped it Beginning with technology of America s Wooden Age the authors discuss Jefferson s perception of the role of technology in a democratic society the American System of Manufactures of Eli Whitney and others Thomas P Jones and the institutionalization of industrialization in educational reforms McCormick and the spread of industrialization to agriculture and James Eads and the rise of transportation networks ISBN 0 262 66049 0 pbk 9 95

Masons, Tricksters and Cartographers David Turnbull, 2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys

Canals For A Nation Ronald E. Shaw,2014-02-07 All but forgotten except as a part of nostalgic lore American canals

during the first half of the nineteenth century provided a transportation network that was vital to the development of the new nation They lowered transportation costs carried a vast grain trade from western farms to eastern ports delivered Pennsylvania coal to New York and carried thousands of passengers at what seemed effortless speed Along their courses sprang up new towns and cities and with them new economic growth Canals for a Nation brings together in one volume a survey of all the major American canals Here are accounts of innovative engineering of near heroic figures who devoted their lives to canals and of canal projects that triumphed over all the uncertainties of the political process [This Colossal Project](#) Roberta M. Styran, Robert R. Taylor, 2016-12-01 This Colossal Project presents an absorbing epic on the building of the fourth Welland Canal which connects Lake Ontario and Lake Erie and allows ships to bypass Niagara Falls An immense undertaking the canal is a vital part of North America's infrastructure and still functions as an essential part of the St Lawrence Seaway Emphasizing the role that vivid personalities including engineers John Laing Weller and Alex Grant as well as contractors and labourers played in the construction of the canal Roberta Styran and Robert Taylor use archival sources government documents newspapers maps and original plans to describe a saga of technological financial geographical and social obstacles met and overcome in an accomplishment akin to the building of the Canadian Pacific Railway A story of Canadian skill courage vision and hardship This Colossal Project details the twenty year excavation of the giant channel and the creation of huge concrete locks amidst war the Great Depression political change and labour unrest Building on the work presented in Styran and Taylor's This Great National Object which told the story of the first three Welland canals built in the nineteenth century This Colossal Project chronicles an impressive milestone in the history of Canadian technological achievement and nation building

The Antikythera Mechanism Evaggelos G. Vallianatos, 2021-10-01 In Antikythera Mechanism The Story Behind the Genius of the Greek Computer and Its Demise Evaggelos Vallianatos historian and ecopolitical theorist shows that after the conquest of Persia by Alexander the Great in the late fourth century BCE the Greeks especially in Egypt reached unprecedented heights of achievements in science technology and civilization The Antikythera Mechanism an astronomical computer probably crafted in Rhodes in the second century BCE was proof of that prowess It's the grandfather of our computers Greek sponge divers discovered the Antikythera Mechanism in 1900 on a 2 100 year old Roman era shipwreck The hand powered device reveals a sophisticated Greek technology previously unknown to scholars and historians not seen and understood again until the twentieth and twenty first centuries The book not only describes how the sophisticated political and technological infrastructure of the Greeks after Alexander the Great resulted in the Antikythera celestial computer and the bedrock of science and technology we know today but also how the influence of Christianity on Greek civilization destroyed the nascent computer age of ancient Greece Vallianatos born in Greece and educated in America is a historian author and journalist He is a passionate champion of Greek culture and a well suited guide to this historical account Vallianatos explains how and why Greek scientists employed advanced engineering in translating

the beautiful conception of the Antikythera Mechanism into an astronomical computer of genius a bronze geared device of mathematical astronomy predicting the eclipses of the Sun and the Moon calculating the risings and settings of important stars and constellations and the movements of the planets around the Sun while mechanizing the predictions of scientific theories The computer's accurate calendar connected these cosmic phenomena to the Olympics and other major Panhellenic religious and athletic celebrations bringing the Greeks closer to their gods traditions and the Cosmos American Studies
