The Politics of Neoliberal Reforms in Africa

Piet Konings,2011 Neoliberalism has become the dominant development agenda in Africa Faced with a deep economic and political crisis African governments have been compelled by powerful external agencies in particular the Bretton Woods institutions and western states to pursue this agenda as a necessary precondition for the receipt of development aid What is particularly striking in Africa however is that neoliberal experiments there have displayed such remarkable diversity This may be due not only to substantial differences in historical economic and political trajectories on the African continent but also and maybe more importantly in the degree of resistance internal actors have demonstrated to the neoliberal reforms imposed on them This book focuses on Cameroon which has had a complex economic and political history and is currently witnessing resistance to the neoliberal experiment by the authoritarian and neopatrimonial state elite and various civil society groups It is the culmination of over twenty years of fine and refined research by one of the leading scholars of Cameroon today

International Migration

Douglas S. Massey,J. Edward Taylor,2004-03-25 International Migration Prospects and Policies offers a comprehensive up to date survey of global patterns of international migration and the policies employed to manage the flows It shows that international migration is not rooted in poverty or rapid population growth but in the expansion and consolidation of global markets As nations are structurally transformed by their incorporation into global markets people are displaced from traditional livelihoods and become international migrants In seeking to work abroad they

do not necessarily move to the closest or richest destination but to places already connected to their countries of origin socially economically and politically When they move migrants rely heavily on social networks created by earlier waves of immigrants and in recent years professional migration brokers have become increasingly common Developing countries generally benefit from international migration because migrant savings and remittances provide foreign earnings to finance balance of payments deficits and make productive investments Some developing nations have gone so far as to establish programs or ministries dedicated to the export of workers Developed nations in contrast focus more on the social and economic costs of immigrants and seek to reduce their numbers regulate their characteristics and limit their access to social services Over time receiving nations have gravitated toward a similar set of restrictive policies yielding undocumented migration as a worldwide phenomenon Globalization also creates infrastructures of transportation communication and social networks to put developed societies within reach In the latter ageing populations and segmenting markets create a persistent demand for immigrant workers All these trends are likely to intensify in the coming years to make immigration policy a key political issue in the twenty first century *Annual World Bank Conference on Development Economics 2000* Boris Pleskovic, Nicholas Stern, 2001 Annotation This 12th Annual World Bank Conference on Development Economics focuses mainly on four areas new development thinking crises and recovery corporate governance and restructuring and social security including public and private savings *Historical Dictionary of the World Bank* Sarah Tenney, Anne C. Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies *Making a Living* Elizabeth Francis, 2019-05-20 Livelihoods in rural Africa are changing in response to disappearing job prospects falling agricultural output and collapsing infrastructure This book explains why the responses to these challenges are so different in different parts of Africa Making a Living uses case studies from commercial farming regions in Kenya Tanzania and Zimbabwe and from much poorer areas within eastern and southern Africa to give a broad comparative study of rural livelihoods These case studies reveal how household relations poverty and gender all play a part in the changing political
