Thucydides on Choice and Decision Making Ilias Kouskouvelis, 2018-11-05 This book uncovers a different perspective on the great classical thinker who has largely been misread Through the scrupulous and holistic analysis of The Peloponnesian War or as the author suggests of The War a different Thucydides emerges One who understands power and its distribution but considers as crucial the choices made by people or leaders One who suggests according to the book s interpretation on the outbreak of war and the Sicilian expedition that the war was a result of decision making and thus not inevitable One with his own view on domestic and international politics a Thucydidean view a view certainly containing elements of the modern International Relations paradigms but clearly linking external behavior with deliberations and choice A Thucydides finally holding a more benign than believed view on human nature and informs our understanding of human behavior especially when in a position of power or in war Professor Kouskouvelis curiosity evolved from his school days when he realized that there was much more to Thucydides than simply an account of The War His scholarship in Ancient Greek and a lifetime of studying Thucydides and international relations has led him to reappraise Thucydides provide to his views their true and unobserved dimension and assign to him his appropriate position that of a shrewd observer of life and politics and a thinker on how people decide This book will be of interest to anyone trying to understand how the major decisions of statecraft are shaped by both context and choice The text elucidates for us how Thucydides schemata on decision making and the flawed decisions that reoccur are rooted in our human foibles and our entrapment by interest fear and honor to name just a few It will be of significant interest to political thinkers academics military decision makers and the wider public who thirst for classical thinking about security strategy and decision making

**Treatment Of Suicidal People** Robert A. Neimeyer, John T. Maltsberger, Antoon A. Leenaars, 2013-02-01 Treatment of suicidal people takes three forms prevention strategies to avert conditions leading to suicide intervention treatment and care during the crisis and postvention response after the event has occurred Unlike other current literature here the focus is on the state of the art of intervention This type of examination is essential because suicidal people themselves are in need of such treatments crisis intervention psychotherapy psychopharmacology and hospitalization Written by professionals in the field the Treatment of Suicidal People allows readers to participate in a learning experience First is a case presentation of an individual Arthur Inman and his long road toward suicide as chronicled in his personal diary The second section puts forth guidelines for the evaluation of suicide risk and crisis intervention A focus on more sustained efforts in psychotherapy is next a theme which is continued in the fourth part by addressing psychiatric issues that are essential for treatment of highly disturbed and lethal patients The following section examines a number of clinical and legal issues that transcend any one population of suicidal people and any particular treatment approach or context And lastly the volume returns to Arthur Inman with case consultations providing alternative perspectives and recommendations on his treatment Suicide and related forms of self injurious behaviour can be

circumvented if the involved professionals are sufficiently trained in assessment and prevention      **Decisions** Baruch Fischhoff,2025-10-14 A lively authoritative insider s account of how we make decisions and how decision making research has developed over the last half century Decisions describes the evolution of decision science also called behavioral decision research and related to behavioral economics through its application to challenging personal and public policy decisions since the inception of the field Baruch Fischhoff covers all major topics in basic research including how people create options determine what matters to them evaluate their chances of achieving those goals and engage their emotions He shows how those processes play out in an exceptionally wide variety of decisions regarding health safety the environment disasters and national security among other topics He also examines how decision making abilities vary across individuals and across the lifespan as well as the ethics and politics of how research is conducted and its results are shared and applied      **Therapist's Guide to Posttraumatic Stress Disorder Intervention** Sharon L. **The Right to Be Protected from Committing Suicide** Jonathan Herring, 2022-06-16 This book argues that suicidal people have the right to receive treatment and for reasonable steps to be taken that they are protected from killing themselves Those suffering threats to life from mental health issues deserve the same protection as those who face threats to life from ill health or violence from others The book explores the ethical and legal case for giving those beset with suicidal thoughts the treatment they need and for reasonable steps to be taken to prevent them attempting suicide Debates around suicide tend to be dominated by cases involving those with terminal medical conditions seeking assisted dying But of those wishing to die it is far more common to find middle aged men and young people oppressed by mental health and personal problems Too often the woeful failure in the funding of mental health services in the UK means that suicidal people are denied the support and help they desperately need This ground breaking book makes the legal and ethical case for recognising that the state and public authorities have a duty to provide and implement an effective suicide prevention strategy

President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, 1983 Abstract A comprehensive report by the US President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research addresses some of the most important and troubling ethical and legal questions in modern medicine for consideration by health care professionals lawyers and relatives of patients regarding the sensitive topic of voluntary cessation of life sustaining therapy for the seriously ill It was concluded that the cases that involve true ethical difficulties are much fewer than commonly believed and that the perception of difficulties primarily occurs because of misunderstandings about the dictates of law and ethics It also is concluded that while competent informed patients have the authority to decline or accept health care others must act on the behalf of incompetent patients The report urges that health care institutions develop and use internal review methods that permit exploration of all relevant issues The 7 report chapters are grouped around 2 themes the various aspects of making treatment decisions and patient groups raising special concerns e g permanently unconscious patients seriously ill newborns w *Psychosocial Family Interventions in Chronic Pediatric Illness* Adolph E. Christ, 2013-03-09 The symposium Family Dynamics Family Therapy and Pediatric Medical Illness held at Downstate Medical Center on December 12 and 13 1980 considered the impact of life threatening illness in children and adolescents on intrafamilial dynamics A group of experts addressed the practical and theoretical psychological and social issues facing pediatric patients and their families when confronting chronic and severe childhood illnesses including brain damage cancer hemophilia juvenile diabetes and heart disease The presentations and group discussions clearly revealed the complexity of physical and psychological problems posed by the seriously ill child with

chronic disease for both the health care provider and the family The conference proceedings confirm that quality care and treatment for the ill child requires the participation of a variety of health care disciplines representing diverse fields of knowledge Pediatricians family practitioners child psychiatrists nurses social workers psychologists nutritionists and others all have important collaborative roles to play The symposium participants wrestled with some of the basic developmental and clinical questions How is the ongoing development of a family altered as a result of chronic incapacitating illness in a child member How can principles of intensive family and individual psychotherapy be applied during the medical treatment of life threatening illness What are the psychological stress points during the course of a chronic medical illness These are but a few of the issues addressed in this publication

Speaking for the Dying Susan P. Shapiro, 2019-06-12 Seven in ten Americans over the age of age of sixty who require medical decisions in the final days of their life lack the capacity to make them For many of us our biggest life and death decisions literally will therefore be made by someone else They will decide whether we live or die between long life and quality of life whether we receive heroic interventions in our final hours and whether we die in a hospital or at home They will determine whether our wishes are honored and choose between fidelity to our interests and what is best for themselves or others Yet despite their critical role we know remarkably little about how our loved ones decide for us Speaking for the Dying tells their story drawing on daily observations over more than two years in two intensive care units in a diverse urban hospital From bed sides hallways and conference rooms you will hear in their own words how physicians really talk to families and how they respond You will see how decision makers are selected the interventions they weigh in on the information they seek and evaluate the values and memories they draw on the criteria they weigh the outcomes they choose the conflicts they become embroiled in and the challenges they face Observations also provide insight into why some decision makers authorize one aggressive intervention after the next while others do not even on behalf of patients with similar problems and prospects And they expose the limited role of advance directives in structuring the process decision makers follow or the outcomes that result Research has consistently found that choosing life or death for another is one of the most difficult decisions anyone can face sometimes haunting families for decades This book shines a bright light on a role few of us will escape and offers steps that patients and loved ones health care providers lawyers and policymakers could undertake before it is too late
