The main exponents of science are or have been profound believers in God the Creator of the universe In this work the reader will find hundreds of phrases emitted by many of them that speak of their faith convictions and of the relationship between faith and its science They are mostly recognized scientists who believe not only in one God but expressly in the God of the Bible With this book the author continues with the task begun in The Lord of the two books to revive an old but current idea that the Creator communicates with human beings through two books of His authorship Nature general revelation and the Bible special revelation The Creator has given two books to the mankind In one has shown His majesty in another His will The two books together inform us not only about the existence of God but also about His indescribable blessings for us It is a sin to sow among them weeds and discontent Mikhail Lomonosov 1711 1765 father of Russian science **Galileo and Newton** William Bixby,2015-10-19

The relationship between Galileo Galilei and Isaac Newton is like that of two complementary stages of a rocket Galileo the argumentative wrangler who demanded that the universe be examined through a telescope rather than by means of a philosophy book provided the first liftoff and Newton the secretive mathematician who searched among his notes to find a mislaid proof for universal gravitation put the world into orbit Here from award winning journalist William Bixby are their stories **From Galileo to Newton,1630-1970** A. R. Hall,1963 Patterns in Mathematics Ellery B. Golos,1981 The Universe of Galileo and Newton William Bixby,1964

Galileo s experiments led him to view the universe scientifically and Newton was inspired to carry on Galileo s work and laid the foundations for modern science Historical Studies: Newton to Einstein (2) [two] Kathleen V.
