From Naked Ape To Superspecies A Personal Perspective On Humanity And The Global Eco Crisis:

From Naked Ape to Superspecies David Suzuki, Holly Dressel, 2009-07-01 For millennia we lived in harmony with the Earth taking only what we required to survive But in just the past few centuries we have used our powers to satisfy our obsession with consumption and new technology without regard for the consequences And in doing so we have exploited our surroundings on an unprecedented scale In this revised and updated edition of *From Naked Ape to Superspecies* David Suzuki and Holly Dressel lucidly describe how we have evolved beyond our needs trampling other species believing that we can make the Earth work the way we want it to And they introduce us to the people who are fighting back those who are resisting the inexorable advance of the global economy juggernaut the people whose voices are difficult to hear over the din of corporate public relations machines We learn about how human arrogance demonstrated by our disregard for the small and microscopic species that constitute the Earth's engine and our reckless use of technological inventions like powerful herbicides or genetically engineered crops is threatening the health of our children and the safety of our food supply

Naked Ape to Superspecies David Suzuki, Holly Dressel, 1999 With breathtaking speed our species has undergone fundamental changes this century As we enter the new millennium David Suzuki takes stock of the impact of these changes on our environment *The United Nations World Water Development Report* Cosgrove, Catherine E., Cosgrove, William J., UNESCO World Water Assessment Programme, 2012-12-31 *Our Future in Nature*: Edmund Barrow, 2019-05-21 Who has not felt a sense of awe silence stillness and presence in an ancient woodland or forest or in front of a sacred tree Humankind has held trees and woodlands in awe and reverence since the dawn of time We depend on nature for the air we breathe the water we drink and the services nature provides This book is about the importance of sacred trees and groves in our stress filled and increasingly urban world Note that over 50 percent of the world is urban Sacred trees and sacred groves transcend race color and creed They are found all over our fragile planet Where there is a tree there is a sacred tree This book will appeal to religious and spiritual traditions as well as to conservation and environmental movements It will offer its reader means to take better care of our only home planet Earth Often undervalued unrecognized or disrespected sacred trees and groves are conserved against mind boggling pressures For example there is a sacred fig tree between two shops in one of the main streets in Hanoi Vietnam There is also a one hectare sacred grove in the center of Kumasi a city of 2.5 million people in Ghana the over 150 000 sacred groves in India and the sacred hill forests of every village in Yunnan South China Sacred trees and groves often conserve unique biodiversity which can help create or recreate connectivity in the landscape As such sacred trees and groves may be relic survivors of bygone ages and are an important resource for restoring degraded natural landscapes This book offers ways for those involved with religion and spirituality and for those working with conservation and land use to jointly engage in repairing the damage we have done to Earth **Cultural Studies and Political Economy** Robert E. Babe, 2010-05-10 This book addresses the notorious split between the two fields of cultural studies and political

economy Drawing on the works of Harold Innis Theodor Adorno Raymond Williams Richard Hoggart E P Thompson and other major theorists in the two fields Robert E. Babe shows that political economy can be reconciled to certain aspects of cultural studies particularly with regards to cultural materialism Uniting the two fields has proven to be a complex undertaking though it makes practical sense given the close interaction between political economy and cultural studies Babe examines the evolution of cultural studies over time and its changing relationship with political economy The intersections between the two fields center around three subjects the cultural biases of money the time space dialectic and the dialectic of information

Media, Structures, and Power Robert E. Babe, 2011-01-01 Media Structures and Power provides a sense of Babe's trajectory of thought over several decades as well as his key role in the development of the communications field in Canada Kevin Dowler Department of Communication Studies York University

The Philosophy of Sustainable Design Jason F. McLennan, 2004 The author outlines the major ideas and issues that have emerged in the growing movement of green architecture and sustainable design over the last thirty years The book asks individuals to understand how the philosophy of sustainable design can affect their own work

Life and Work Charles Birch, 2003 To get higher profits we need to work harder and longer Right Wrong In this original book Charles Birch and David Paul look at the working lives of employees managers and executives and propose a new agenda for achieving a work life balance If companies get their relationships with employees and customers right profits will follow as a matter of course But too many organisations focus only on the short term bottom line and are insensitive to the emotional and spiritual needs and dignity of employees back cover

Killing the Natives Guy Randall McPherson, 2005 *The Cross in Our Context* Douglas John Hall, 2003 In this small gem of theological reflection North America's foremost theologian of the cross offers a profound and compelling contemplation on the relevance of the church's most fundamental confession Hall ponders what confessing Jesus as crucified means in today's context one that is postmodern pluralistic multicultural and in some respects post Christian A digest of his monumental trilogy this book lays out in brief compass the heart of Hall's theology of the cross contrasting it sharply with the theology of established Christianity showing how it reframes classical Christology and soteriology and drawing the implications for what it means to be human for Christian ethics and for the church

Scripting the Environment Geo Takach, 2016-12-08 This volume explores how to engage audiences both beyond and within the academy more deeply in environmental research through arts based forms It builds on a multi pronged case study of scripts for documentary film audio visual and stage formats focusing on how the identity of a place is constructed and contested in the face of environmental concerns around fossil fuel extraction in a globalized visual society and specifically on the rising international public relations war over Alberta's stewardship of the tar sands Each script is followed by discussion of the author's choices of initiating idea research sources format voices world of the story structure and visual style and other notes on the convergence of synthesis analysis and re presentation in the script Included are lively analysis and commentary on

McNeely,2001 While the issue of invasive alien species IAS has important biological components the human dimensions deserve much greater attention Humans with all their diversity of quirks strengths and weaknesses are at the heart of the problem of IAS and paradoxically also at the heart of the solution This compilation of papers delivered during a workshop on the human dimensions of the IAS problem held in Cape Town South Africa on 15 17 September 2000 covers some of the many causes consequences and responses to this problem Radical Mass Media Criticism David Berry,John Theobald,2006 This work examines early mass media critics and their controversial writings and links them with their contemporaries to demonstrate the relevance of their legacy for debates on media power and media ethics Doing Democracy Bill Moyer,JoAnn MacAllister,Mary Lou Finley Steven Soifer,2001-08-01 An empowering guide to understanding the strategies behind successful social movements Good News for a Change David Suzuki,Holly Dressel,2009-07-01 We all know the bad news Every day along with all the bulletins on social upheavals and terrorist attacks we read reports of another animal species on the brink of extinction of how our ocean fisheries are collapsing and of the damage industrial development is wreaking on our soil air and water We drive bigger cars eat pesticide sprayed genetically altered foods and consume so much energy that even rich industrialized countries suffer power outages We seem intent on continuing to live this way even though many scientific experts tell us our actions are suicidal The good news Suzuki and Dressel tells us is that thousands of individuals groups and businesses are already changing their ways A growing number of companies are still making money while benefiting their local communities Anti globalization activists and Third World villagers are learning how to practice real participatory democracy and create real community Farmers and ranchers are sharing their land with other species including predators and pests while still prospering Even some governments local and national are starting to base economic development strategies on our collective dependency on nature while decreasing large scale interference in our ecosystems
