Kravchuk, 2003-01-17 This comprehensive and detailed examination of the challenges faced by the newly independent state of Ukraine argues that its lackluster economic performance during the 1990s was the unfortunate result of a combination of the hasty adoption of public policies not clearly understood and a prolonged struggle to build governmental institutions With a focus on both how the government used financial repression to balance budgets dampen inflationary pressures and at the same time maintain formal and informal subsidies to state enterprises It makes original contributions to the debate on economic reform by focusing attention on Ukraine s critical choices in the areas of state institution building fiscal policies and monetary reform and the government s preference for financially repressive policy measures      Economic Governance in the Age of Globalization William K. Tabb, 2004-06-02 Rapid growth reduced poverty and stable societies the announced benefits of the world economy celebrated by neoliberal proponents of the Washington consensus have failed to materialize What does this failure mean for future world order and the U S role as global hegemon Addressing this crucial question William Tabb argues that global economic institutions such as the World Bank and the International Monetary Fund constitute a nascent international state for which all previous models of sovereignty accountability and equity are inadequate Integrating economics and political science Tabb traces the emergence of this global state from the closing days of World

War II and examines its future prospects Even as the United States will continue to dominate the emerging structures of world governance Tabb maintains it will have to change the assumptions behind its championing of classical models of international free trade A new financial architecture must encompass debt forgiveness multilateral agreements on investment and a more inclusive model of growth in the twenty first century      **Development and Diffusionism J.**
