The Romanian Revolution of 1989 was the most spectacularly violent and remains today the most controversial of all the East European upheavals of that year. Despite or perhaps because of the media attention the revolution received it remains shrouded in mystery. How did the seemingly impregnable Ceausescu regime come to be toppled so swiftly and how did Ion Iliescu and the National Salvation Front come to power? Was it by coup d'état? Who were the mysterious terrorists who wreaked such havoc on the streets of Bucharest and the other major cities of Romania? Were they members of the notorious Securitate? What was the role of the Soviet Union? Blending narrative with analysis, Peter Siani Davies seeks to answer these and other questions while placing the events and their immediate aftermath within a wider context. Based on fieldwork conducted in Romania and drawing heavily on Romanian sources including television and radio transcripts, official documents, newspaper reports and interviews, this book is the most thorough study of the Romanian Revolution that has appeared in English or any other major European language. Recognizing that a definitive history of these events may be impossible, Siani Davies focuses on the ways in which participants interpreted the events according to particular scripts and myths of revolution rooted in the Romanian historical experience. In the process, the author sheds light on the ways in which history and the conflicting retellings of the 1989 events are put to political use in the transitional societies of Eastern Europe.

**Aspects of Independent Romania's Economic History with Particular Reference to Transition for EU Accession** David Turnock, 2016-04-15 After fifteen years of transition in the former communist states of Central and Eastern Europe, it has become clear that for a substantial number, the objective of reform and restructuring process is a market system in line with membership of the EU. In this study, the long-term economic transformation of Romania is studied, offering a detailed narrative and thematic account of events from the nineteenth to the twenty-first centuries. From the first steps towards large-scale industrialisation begun prior to the First World War through the accelerated pace set by the communist regime after 1945 and the uncertainty following its subsequent collapse in 1989, the book addresses a wide range of pertinent issues that have shaped Romania's economic development. The study also offers an interpretation of a distinctive phase in the modernisation of post-communist Romania, supported by economic historical surveys of the preceding century as a context for recent restructuring on the eve of EU accession. This is linked with trends in the region as a whole so that a broad perspective is maintained throughout the book. By highlighting Romania's position as one of more backward accession states and considering in what ways its experience during transition differs from the more developed states of the region, this study offers a valuable insight into both the history of Romania and its future prospects. Furthermore, it provides a valuable case study that can be compared and contrasted with other countries who are likewise still grappling with the legacy of a centralised economy and in the process of adopting a more market-orientated approach in order to gain EU membership. As such, this study will be of interest not only to historians and economists but anyone with an interest in the expansion of the European Union.
