United States. Air Force. Office of the Chief of Chaplains, Daniel B. Jorgensen, 1961 The Birds of Turkey Guy Kirwan, Barbaros Demirci, Hilary Welch, Kerem Boyla, Metehan Özen, Peter Castell, Tim Marlow, 2010-06-30 The Birds of Turkey is the first avifauna to document this country's amazing ornithological diversity Turkey ornithologically one of the most fascinating countries in the Western Palearctic lies not only at the crossroads between Europe and Asia but also at the meeting point of a variety of biomes The extensive semi deserts of the Middle East reach their northernmost limit in southeastern Turkey while the Pontic Mountains which dominate much of the north of the country support a principally European fauna along with near endemics such as Caucasian Grouse Green Warbler Caspian Snowcock and Kipper's Nuthatch In Central Turkey huge saline lakes hold colonies of flamingos pelicans and Pygmy Cormorants while the surrounding semi steppe supports populations of Montagu's Harrier Great Bustard and abundant lakes The book looks in detail at every species ever reported in the country breeding birds passage migrants winter visitors and vagrants with a review of status and distribution accurate distribution maps and discussions of breeding biology and the latest taxonomic revisions Introductory chapters provide overviews of Turkey's major biomes and the history of ornithology in the country and a discussion of future research objections The book also contains stunning colour photography by a number of leading Turkish ornithologists Indispensable for anyone interested in the Turkish avifauna The Birds of Turkey will remain the standard work on this key ornithological region for many years to come Brown Pelican Rien Fertel, 2022-09-07 In this compelling book Rien Fertel tells the story of humanity's complicated and often brutal relationship with the brown pelican over the past century This beloved bird with the mythically bottomless belly to say nothing of its prodigious pouch has been deemed a living fossil and the most dinosaur-like of creatures The pelican adorns the Louisiana state flag serves as a religious icon of sacrifice and stars in the famous parting shot of Jurassic Park but most significantly spotlights our tenuous connection with the environment in which it flies feeds and roosts the coastal United States In 1903 Theodore Roosevelt inaugurated the first national wildlife refuge at Pelican Island Florida in order to rescue the brown pelican among other species from the plume trade Despite such protections the ubiquity of synthetic agents of death most notably DDT in the mid twentieth century sent the brown pelican to the list of endangered species By the mid 1960s not one viable pelican nest remained in all of Louisiana Authorities declared the state bird locally extinct Conservation efforts including an outlandish but well planned birdnapping saved the brown pelican generating one of the great success stories in animal preservation However the brown pelican is once again under threat particularly along Louisiana's coast due to land loss and rising seas For centuries artists and writers have portrayed the pelican as a bird that pierces its breast to feed its young symbolizing saintly piety Today the brown pelican gives itself in other ways sacrificed both by and for the environment as a bellwether bird an indicator species portending potential disasters that await Brown Pelican combines history and first person narrative to complicate deconstruct and reassemble our vision of the bird the natural world and ourselves **A Concise**
