Flood Of 93:

The Great Flood Of 1993 Stanley Changnon, 2019-07-11 The flood that affected a third of the United States during the summer of 1993 was the nation's worst ranking as a once in 300 years event. It severely tested national state and local systems for managing natural resources and for handling emergencies illuminating both the strengths and weaknesses in existing methods of preparing for and dealing with massive prolonged flooding. Through detailed case studies this volume diagnoses the social and economic impacts of the disaster assessing how resource managers flood forecasters public institutions the private sector and millions of volunteers responded to it. The first comprehensive evaluation of the 1993 flood this book examines the way in which floods are forecast and monitored the effectiveness of existing recovery processes and how the nation manages its floodplains. The volume concludes with recommendations for the future in hope of better preparing the country for the next flood or other comparable disaster.

The Great Flood of 1993 Post-flood Report United States. Army. Corps of Engineers. North Central Division, 1994 The Flood of 1993 was an unusual and significant hydrometeorological event that devastated the Midwest. The 1993 was distinctive from all other record floods in terms of its magnitude severity damage and the season in which it occurred. The present report contains information about the flood and the general involvement of the Corps in the flood affected areas. An appendix which provides detailed flood descriptions data and information on Corps flood control flood fight and post flood activities is included for each of the district offices involved. Appendices A St Paul District and Appendices B Rock Island District cover the Mississippi River basin above Lock and Dam no 22. Appendix C St Louis District concerns the Mississippi River basin below Lock and Dam no 22. Appendix D Omaha District and Appendix E Kansas City District cover the Missouri River Basin.
