Manitoba Premiers of 19th and 20th Centuries Barry Ferguson, Robert Alexander Wardhaugh, 2010 Annotation The province's history of religious linguistic ethnic and class conflict which has often drawn the entire country into its battles is revealed in the biographies of the Premiers

**Landscapes and Landforms of Western Canada** Olav Slaymaker, 2016-12-01 This is the only book to focus on the geomorphological landscapes of Canada West It outlines the little appreciated diversity of Canada's landscapes and the nature of the geomorphological landscape which deserves wider publicity Three of the most important geomorphological facts related to Canada are that 90% of its total area emerged from ice sheet cover relatively recently from a geological perspective permafrost underlies 50% of its landmass and the country enjoys the benefits of having three oceans as its borders the Arctic Pacific and Atlantic oceans Canada West is a land of extreme contrasts from the rugged Cordillera to the wide open spaces of the Prairies from the humid west coast forests to the semi desert in the interior of British Columbia and from the vast Mackenzie river system of the to small steep cascading streams on Vancouver Island The thickest Canadian permafrost is found in the Yukon and extensive areas of the Cordillera are underlain by sporadic permafrost side by side with the never glaciated plateaus of the Yukon One of the curiosities of Canada West is the presence of volcanic landforms extruded through the ice cover of the late Pleistocene and Holocene epochs which have also left a strong imprint on the landscape The Mackenzie and Fraser deltas provide the contrast of large river deltas debouching respectively into the Arctic and Pacific oceans

*Tree Rings and Natural Hazards* Markus Stoffel, Michelle Bollschweiler, David R. Butler, Brian H. Luckman, 2010-07-15 Dendrogeomorphology Beginnings and Futures A Personal Reminiscence My early forays into dendrogeomorphology occurred long before I even knew what that word meant I was working as a young geoscientist in the 1960s and early 1970s on a problem with slope movements and deformed vegetation At the same time unknown to me Jouko Alestalo in Finland was doing something similar Both of us had seen that trees which produced annual growth rings were reacting to geomorphic processes resulting in changes in their internal and external growth patterns Dendroclimatology was an already well established field but the reactions of trees to other environmental processes were far less well understood in the 1960s It was Alestalo 1971 who first used the term dendrogeomorphology In the early 1970s I could see that active slope movement processes were affecting the growth of trees in diverse ways at certain localities I wanted to learn more about those processes and try to extract a long term chronology of movement from the highly diverse ring patterns

*Geomorphic Approaches to Integrated Floodplain Management of Lowland Fluvial Systems in North America and Europe* Paul F. Hudson, Hans Middelkoop, 2015-04-29 This volume provides a comprehensive perspective on geomorphic approaches to management of lowland alluvial rivers in North America and Europe Many lowland rivers have been heavily managed for flood control and navigation for decades or centuries resulting in engineered channels and embanked floodplains with substantially altered sediment loads and

geomorphic processes Over the past decade floodplain management of many lowland rivers has taken on new importance because of concerns about the potential for global environmental change to alter floodplain processes necessitating revised management strategies that minimize flood risk while enhancing environmental attributes of floodplains influenced by local embankments and upstream dams Recognition of the failure of old perspectives on river management and the need to enhance environmental sustainability has stimulated a new approach to river management The manner that river restoration and integrated management are implemented however requires a case study approach that takes into account the impact of historic human impacts to the system especially engineering The river basins examined in this volume provide a representative coverage of the drainage of North America and Europe taking into account a range of climatic and physiographic provinces They include the 1 Sacramento California USA 2 San Joaquin California 3 Missouri Missouri USA 4 Red Manitoba Canada and Minnesota USA 5 Mississippi Louisiana USA 6 Kissimmee Florida USA 7 Ebro Spain 8 Rhone France 9 Rhine Netherlands 10 Danube Romania and 11 Volga Russian Federation Rivers The case studies covered in these chapters span a range of fluvial modes of adjustment including sediment channel hydrologic regime floodplains as well as ecosystem and environmental associations

*Thomas Scott's Body* J.M. Bumsted, 2000-11-17 What did happen to the body of Thomas Scott The disposal of the body of Canadian history's most famous political victim is the starting point for historian J M Bumsted's new look at some of the most fascinating events and personalities of Manitoba's Red River Settlement To outsiders 19th century Red River seemed like a remote community precariously poised on the edge of the frontier Small and isolated though it may have been Red River society was also lively well educated multicultural and often contentious By looking at well known figures from a new perspective and by examining some of the more obscure corners of the settlement's history Bumsted challenges many of the widely held assumptions about Red River He looks for instance at the brief unhappy Swiss settlement at Red River examines the controversial reputation of politician John Christian Shultz and delves into the sensational scandal of a prominent clergyman's trial Vividly written Thomas Scott's Body pieces together a new and often surprising picture of early Manitoba and its people

**Harm's Way** Anthony W. Rasporich, Maxwell Foran, 2004 The stories told in this collection though tragic for many illustrate the steadfast determination and courage of people in the face of misfortune and extreme distress From the lesser known weed outbreaks and tornadoes to the world wide influenza outbreak in 1918 that devastated many Calgary families these stories focus on the human side of these disasters It may be a heroic individual or the collective response of a community but what is truly remarkable in these stories is the human response to the world being turned upside down by famine and disease by flood fire or rock slide by wind and cold by dynamite or gas explosions or even by the seemingly mundane threat of weeds upon crops It is the resolution to continue to fight and the persistence of the human spirit and its adaptability to challenges that is the true story of a century of development in western Canada

*Wet Prairie* Shannon Stunden Bower, 2011-06-29 The Canadian prairies are often envisioned as dry windswept

fields however much of southern Manitoba is not arid plain but wet prairie poorly drained land subject to frequent flooding Wet Prairie brings to light the complexities of surface water management in Manitoba from early artificial drainage efforts to late twentieth century attempts at watershed management Irregular water flow patterns challenged the checkerboard landscape of the 1872 federal Dominion Lands Act and homesteaders found their agricultural ambitions at odds with local environmental realities Thus in keeping with liberal principles the provincial government undertook substantial drainage efforts Flooding and drainage became the subjects of intense and persistent debate among provincial officials drainage experts and Manitoba residents New alliances and rivalries emerged amid shifting social political and environmental contexts with enduring consequences for both the landscapes and people of the wet prairie This account of an overlooked aspect of Prairie environmental history traces how the biophysical nature of southern Manitoba helped shape both Manitoba society and the provincial state

**White People, Indians, and Highlanders** Colin G. Calloway, 2008-07-03 A comparative approach to the American Indians and Scottish Highlanders this book examines the experiences of clans and tribal societies which underwent parallel experiences on the peripheries of Britain's empire in Britain the United States and Canada

**Under Prairie Skies** Creighton Thomas Shay, 2022-07 In Under Prairie Skies C Thomas Shay asks and answers the question What role did plants play in the lives of early inhabitants of the northern Great Plains Since humans arrived at the end of the Ice Age plants played important roles as Native peoples learned which were valuable foods which held medicinal value and which were best for crafts Incorporating Native voices ethnobotanical studies personal stories and research techniques Under Prairie Skies shows how since the end of the Ice Age plants have held a central place in the lives of Native peoples Eventually some groups cultivated seed bearing annuals and later fields of maize and other crops Throughout history their lives became linked with the land both materially and spiritually

**Floods of the Centuries** J. M. Bumsted, 1997-01-01 **Encyclopedia of the Great Plains** David J. Wishart, 2004-01-01 Wishart and the staff of the Center for Great Plains Studies have compiled a wide ranging planned encyclopedia of this important region Their objective was to give definition to a region that has traditionally been poorly defined and they have

**Just One Rain Away** Stephanie C. Kane, 2022-12-15 Not long ago it seemed flood control experts were close to mastering the unruly flows funneling toward Hudson Bay and the Prairie city of Winnipeg But as more intense and out of synch flood events occur wary cities like Winnipeg continue to depend on systems and specifications that will soon be out of date Rivers have impulses that defy many of the basic human assumptions underpinning otherwise sophisticated technologies This is the river city expression of climate change In Just One Rain Away Stephanie Kane shows how geoscience engineering and law converge to affect flood control in Winnipeg She questions technicalities produced and maintained in tandem with settler folkways at the expense of the plural legal cultures of Indigenous nations The dynamics of this experimental ethnography feel familiar yet strange here many of the starring actors are not human Ice and water materializing as bodies elements and digital signals

act with diatoms diversions sensors sandbags and satellites looping theories about glacial erratics and feminist science studies into scenes from neighbourhood parks conferences survey maps plays archival photos a novel an emergency press conference LiDAR images and a lab experiment in a bathtub Through storytelling and environmental analytics Just One Rain Away provides a starting point for cross cultural discussions about how expert knowledge and practice should inform egalitarian decision making about flood control and more broadly decolonize current ways of thinking being and becoming with rivers Canadian Book Review Annual ,1997 *Report of Activities* Manitoba.
