Homeland Karin Brynard, 2018-05-01 Captain Albertus Beeslaar has had enough of the Kalahari. He is about to hand in his resignation but before doing so he is sent into the heart of an ancient San community. An elder has died after being released from police custody and the San blame the police. The small town of Witdraai borders on the world famous Kgalagadi Transfrontier Park where the last of the Kalahari San eke out a living. A violent attack on a German tourist has unsettled the whole town, a case that is rubbing up Beeslaar's new colleague Colonel Koekoes Mentoer the wrong way. She wants to turn her back on Witdraai and the bad memories the place holds for her. As the heat rises, all hell breaks loose: a policeman is murdered, deep seated corruption is threatening a major land restitution plan for the San and a mysterious killer is prowling the red dunes. Amid all the controversy Kytie Rooi, a cleaner at a luxury guesthouse in Upton and self appointed protector of a strange street child is fleeing into the deadly heat of the desert with her charge. In this world places of safety are dangerously elusive. *Homeland* is the translation of the Number One Bestseller *Tuisland* Karin Brynard's critically acclaimed and most ambitious novel to date.

Weeping Waters Karin Brynard, 2014-10-24 Inspector Albertus Beeslaar has left the ruthless city only to have his hopes of finding peace and quiet in the Kalahari shattered by the brutal murder of artist Freddie Swarts and her adopted daughter. But Freddie's journalist sister Sara is not convinced that this was a typical farm attack. Amid a spate of stock thefts Beeslaar must solve this high profile crime all the while training his two rookie partners Ghaap and Pyl. After more murders the disturbing puzzle grows increasingly sinister as age old secrets and hostilities surface spurring the local inhabitants to violent action. No one is above suspicion, not least the mysterious Bushman farm manager and falconer Dam. *Weeping Waters* is Maya Fowler and Isobel Dixon's translation of the Afrikaans bestseller *Plaasmoord*, a novel that peels away the layers of a landscape steeped in conflict and hails the arrival of a bright new voice in South African crime fiction available in English.

Heart of Dryness James G. Workman, 2009-08-11 We don't govern water. Water governs us, writes James Workman. In *Heart of Dryness* he chronicles the memorable cautionary tale of the famed Bushmen of the Kalahari, remnants of one of the world's most successful civilizations today at the exact epicenter of Africa's drought and their remarkable, widely publicized battle over water with the government of Botswana to explore the larger story of what many feel is becoming the primary resource battleground of the 21st century: water. The Bushmen's story may well prefigure our own. Even the most upbeat optimists concede the U.S. now faces an unprecedented water crisis. Large dams on the Colorado River which serve 30 million in 7 states will be dry in 13 years. Southeast drought cut Tennessee Valley Authority hydropower in half, exposed Lake Okeechobee's floor, dried 787 million of Georgia's crops and left Atlanta with 60 days of water. Cities east and west are drying up. As reservoirs and aquifers fail, officials ration water, neighbors snitch on one another, corporations move in and states fight states to control shared rivers. Each year inadequate water kills more humans than AIDS, malaria and all wars combined. Global leaders pray for rain. Bushmen tap more pragmatic solutions. James Workman illuminates the present and coming tensions we will all face over water and shows how, from the remoteness of the

Kalahari a primitive by our standards people is showing the world a viable path through the encroaching desert of the coming Dry Age

Small Carnivores Emmanuel Do Linh San, Jun J. Sato, Jerrold L. Belant, Michael J. Somers, 2022-07-25

Small Carnivores Evolution Ecology Behaviour and Conservation This book focuses on the 232 species of the mammalian Order Carnivora with an average body mass 21.5 kg. Small carnivores inhabit virtually all of the Earth's ecosystems adopting terrestrial, semi fossorial, semi arboreal or semi aquatic lifestyles. They occupy multiple trophic levels and therefore play important roles in the regulation of ecosystems such as natural pest control, seed dispersal and nutrient cycling. In areas where humans have extirpated large carnivores, small carnivores may become the dominant predators which may increase their abundance, mesopredator release to the point that they can sometimes destabilize communities, drive local extirpations and reduce overall biodiversity. On the other hand, one third of the world's small carnivores are threatened or near threatened with extinction. This results from regionally burgeoning human populations, industrial and agricultural activities causing habitat reduction, destruction, fragmentation and pollution. Overexploitation, persecution and the impacts of introduced predators, competitors and pathogens have also negatively affected many small carnivore species. Although small carnivores have been intensively studied over the past decades, bibliometric studies showed that they have not received the same attention given to large carnivores. Furthermore, there is huge disparity in how research efforts on small carnivores have been distributed, with some species intensively studied and others superficially or not at all. This book aims at filling a gap in the scientific literature by elucidating the important roles of and documenting the latest knowledge on the world's small carnivores. This is a book that has been needed for decades. It is the first compendium of recent research on a group of mammals which has received almost no attention before the early 1970s. This book covers a wide range of subdisciplines and techniques and should be considered a solid baseline for further research on this little known group of highly interesting mammals. As our knowledge regarding how ecosystems function increases, then the valuable role of small carnivores and the necessity for their conservation should be regarded as of paramount importance. The topics covered in this book should therefore be of great interest not only to academics and wildlife researchers but also to the interested layman.
