Flight Capital The Alarming Exodus Of Americas Best And Brightest:

Flight Capital David A. Heenan, 2005 For centuries the United States has been a magnet for human capital ambitious talented immigrants came to make their fortunes and stayed to pump wealth into the U S economy Today America relies more than ever on immigrant brainpower over half the PhDs working here are foreign born as are nearly half the physicists computer scientists and mathematicians and many of Silicon Valley s high tech leaders But David Heenan warns they may not be here long In *Flight Capital* Heenan describes how within the past decade America has gone from being the top importer of brainpower to a net exporter Empowered by the globalization of technology emerging economies from Iceland to India are using aggressive initiatives to attract top knowledge workers In a reverse brain drain hundreds of thousands of the best and brightest in America are returning to their native lands to pursue new opportunities Heenan recounts the stories of dozens of emigrating professionals in an engaging way to explore the various factors personal cultural economic and political that are fueling the exodus human capital and its consequences for America at a time when a shortage of talented labor is exacerbated by post 9 11 immigration restrictions The outflow of brainpower Heenan argues threatens U S technological and economic preeminence and even our security unless quick action is taken He proposes a dozen hard hitting measures to correct the situation both short and long term Timely and compelling *Flight Capital* focuses attention on whether America will continue as a world leader and on the new forces at play in the global economic community

The New American Story Bill Bradley, 2007-03-27 Politics is stuck writes Bill Bradley in this insightful informative and provocative book about America at a crossroads but idealism isn t dead It can be reawakened What will it take to make America a better stronger truer country asks the bestselling author former Knicks star and onetime presidential candidate Bill Bradley believes that America is at a teachable moment when we are compelled to reevaluate our political system our leadership our agenda as a nation and ourselves as citizens With clarity and urgency Bradley shows why the story we are being told now about who we are as a people is not true He then offers a new story about our nation based on America s rich heritage and his belief in the character of the American people Bradley explores what changes need to be made in our parties in our politics and in citizen activism to ensure America s future He asserts that the American people are ready for the truth and suggests that the party that chooses to embrace this new story will be in power for a generation Writing from his own experience in politics and drawing on his knowledge of history Bradley shows how the Republican Party has built a solid pyramid structure since the 1970s at the base of which are money ideas and media whereas the Democratic Party s structure is an inverted pyramid with too much emphasis put on the need for a charismatic leader to hold the pyramid up Each party for different reasons fails to deal with the real issues that now confront America This informed and inspiring call to action is addressed not only to the parties and elected leaders but to citizens as well Bradley proposes things every American can do to shape our nation s future He points out that if eighty percent of the electorate voted instead of fifty percent it would be the most important

change in American politics since women got the vote Now more than ever he says we need to embrace an ethic of connectedness a combination of collective action and individual responsibility to solve our nation s most pressing problems and he argues that the fate of all countries is bound together as never before Writing today with the freedom of a private citizen Bradley provides this transformative and eye opening book about the danger and the promise of America s choice at this crucial moment in the nation s history

Is America Falling Off the Flat Earth? Institute of Medicine,National Academy of Engineering,National Academy of Sciences,Norman R. Augustine,2007-09-14 The aviation and telecommunication revolutions have conspired to make distance increasingly irrelevant An important consequence of this is that US citizens accustomed to competing with their neighbors for jobs now must compete with candidates from all around the world These candidates are numerous highly motivated increasingly well educated and willing to work for a fraction of the compensation traditionally expected by US workers If the United States is to offset the latter disadvantage and provide its citizens with the opportunity for high quality jobs it will require the nation to excel at innovation that is to be first to market new products and services based on new knowledge and the ability to apply that knowledge This capacity to discover create and market will continue to be heavily dependent on the nation s prowess in science and technology Indicators of trends in these fields are at best highly disconcerting While many factors warrant urgent attention the two most critical are these 1 America must repair its failing K 12 educational system particularly in mathematics and science in part by providing more teachers qualified to teach those subjects and 2 the federal government must markedly increase its investment in basic research that is in the creation of new knowledge Only by providing leading edge human capital and knowledge capital can America continue to maintain a high standard of living including providing national security for its citizens

The Nexus of Economics, Security, and International Relations in East Asia Avery Goldstein, Edward D. Mansfield, 2012-08-29 While over the last 30 years the global economy's center of gravity has shifted to East Asia the region has remained surprisingly free of interstate military conflict Yet this era of peace and growth has been punctuated by periodic reminders of enduring security problems in the region from China's military modernization to unresolved territorial disputes to persistent tensions on the Korean peninsula This volume is one of the first to treat these issues of economics and security as interconnected rather than separate Its authors leading scholars from the U S and China shed new light on this important nexus by applying insights from a rich variety of approaches to explore and explain the dynamics of a region whose importance for students of both international political economy and international security has grown dramatically They show that both economic and security fundamentals matter if one is to understand the reasons for and evaluate the durability of East Asia's recent peace and prosperity
