**MOUNTAIN MAN** When Dahlia Weathersby's sister disappears on what should have been a simple day hike Dahlia immediately heads deep into the Colorado Rockies to find her. Knowing she'll never survive the mountains alone she convinces the local hermit adorably grouchy survival expert Winston Dane to be her guide. All it takes is a good helping of Dahlia's charm and just the teeniest bit of blackmail before she's got all six foot something of him wrapped around her finger. Winston Dane should know better than to follow beautiful city girl Dahlia deep into the mountains but it's not like he could let her go alone. She may be as clever as she is unsettlingly hot but the Rockies are no place for the uninitiated. And fine maybe being around Dahlia makes him forget why he'd decided being the local grouch was the only route for him in the first place. Every step is a new adventure and a new coal in the simmering fire of their attraction. But with everything the wilderness has to throw at them it'll take more than charm and some city girl ingenuity to make this trek anything but a disaster waiting to happen and an adventure she'll never forget.

**Fish Out of Water** reads like a sexy Sherlock Holmes and is the most fun I've had in ages. The only hiking I want to do is up Winston Dane's thighs. Lana Ferguson USA Today bestselling author. Books By Katie Ruggle.

**Spider Legs** Piers Anthony, Clifford A. Pickover, 2014-07-01. An ecological disaster spawns an eight legged sea monster in this collaboration between the science fiction author and acclaimed nonfiction writer. Millions of readers have enjoyed the books of Piers Anthony including but certainly not limited to his undeniably popular Xanth and Blue Adept series. Now in collaboration with celebrated nonfiction author Clifford A. Pickover he brings us a disturbing tale of our own world and the strange creatures with whom we share it. It is said and truly that there are more things under heaven and earth than there are almost anywhere else true as well that many of them lurk unsuspected far below the surface of the planet's ocean. For thousands of years mankind has simultaneously trusted in the sea's proverbial generosity and used it as a dumping ground trusting that in its vastness his garbage will be swallowed up and forgotten. But that was never really true. And now in an age when the overcrowded Earth swarms with hungry inhabitants whose waste chokes even the sea whose greedy demands overtax its seemingly endless bounty strange things are born in the ocean's depths strange things that the ocean throws back upon the land.
