Flora of Surrey; Being an Account of the Flowering Plants ... of the County. With Coloured Maps ... and Photographs ... Charles Edgar Salmon,William Harrison Pearsall,1931 The Flora of Hampshire Anne Brewis,Paul Bowman,Francis Rose,2023-07-03 This totally new and much needed work on the County s flora published in association with the Hampshire and Isle of Wight Wildlife Trust is the first comprehensive study for nearly a century Excluding the Isle of Wight it contains over 1750 species of vascular plants including some non indigenous speces as well as subspecies varieties and hybrids In addition condensed accounts of the lichens 590 taxa and bryophytes 459 taxa groups in which the county is particularly rich have been contributed by Francis Rose with Ken Sandell and Alan Crundwell respectively As in Townsend s *Flora of Hampshire* 1884 there are introductory chapters on Structure and Geology Climate Habitats and an up to date Comparison of Hampshire s Flora with some other southern Counties including the Isle of Wight all by Francis Rose There are also chapters on Conservation of the Flora with a complete list of nature reserves by Peter Brough and Paul Bowman Some earlier Workers on the Hampshire Flora by David Allen and Botanical Recording by Paul Bowman The Flora ends with an extensive Bibliography and References and a fully comprehensive Index The principal authors are all experienced Hampshire botanists with an intimate knowledge of its flora *Flora of Hampshire, Including the Isle of Wight* Frederick Townsend,1883 Flora of Surrey Alan Christopher Leslie,1987 **Flora of Eastbourne** F. visits the interior of the country he sees so many familiar natural objects that he can hardly help fancying he is close to his home He finds the woods and fields tenanted by tits hedge sparrows wrens wagtails larks redbreasts thrushes buntings and house sparrows some absolutely identical with our own feathered friends others so closely resembling them that it requires a practised ornithologist to tell the difference If he is fond of insects he notices many butterflies and a host of beetles which though on close examination they are found to be distinct from ours are yet of the same general aspect and seem just what might be expected in any part of Europe There are also of course many birds and insects which are quite new and peculiar but these are by no means so numerous or conspicuous as to remove the general impression of a wonderful resemblance between the productions of such remote islands as Britain and Yesso Now let an inhabitant of Australia sail to New Zealand a distance of less than thirteen hundred miles and he will find himself in a country whose productions are totally unlike those of his own Kangaroos and wombats there are none the birds are almost all entirely new insects are very scarce and quite unlike the handsome or strange Australian forms while even the vegetation is all changed and no gum tree or wattle or grass tree meets the traveller's eye
