Flora Of The Malay Peninsula Volume 5

Flora Of The Malay Peninsula Volume 5:

Guide to Standard Floras of the World David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations and author and geographical indexes. The Flora of the Malay Peninsula. Volume 5, Monocotyledones (concluded), Gymnospermeae, General Indices, 1967

Journal of the Royal Society of Arts Royal Society of Arts (Great Britain), 1924 *The Bamboos of the World* D. Ohrnberger, 1999-01-29 Bamboos constitute one of a few select categories of plants which are taxonomically related, very rich in species and of vital economic and ecological importance. Since the early 20th century, the accepted number of species of bamboos world wide has tripled. However, until now, information was scattered through numerous, often not easily available publications. *The Bamboos of the World* is the first comprehensive taxonomic as well as horticultural reference work that provides basic information on bamboos world wide, whether they are wild or cultivated, well known or rather unknown. The work, based on bamboo literature, facilitates access to further data by citation and a comprehensive bibliography. Among the main data included are botanical names with synonyms and geographical distribution of genera and species varieties with their distinctive characters, common bamboo names, plant introductions to the West, plant size and uses. The distribution of genera is mapped. *The Bamboos of the World* presents a wealth of essential information in an accessible and structured manner. It gives the opportunity to check under what names and where relevant information on any bamboo can be found. For the researcher with management and development interests, it provides a convenient means of basing bamboo resource on a sound understanding of generic and species relationships with names that appear in earlier literature put into context. The work should prove to be invaluable for those interested in the morphology, taxonomy, distribution and cultivation of bamboos. It should support botanical, forestry, horticultural and ecological research, training and resource management. *The Araceae of Peninsular Malaysia (Penerbit USM)* Mashhor Mansor, Peter C. Boyce, Ahmad Sofiman Othman, Baharuddin Sulaiman, 2011 A review of the Araceae of Peninsular Malaysia, including its off shore islands, is presented as a precursor to revising the family for the Flora of Peninsular Malaysia project. The aroid flora of Peninsular Malaysia comprises 28 genera and ca 140 indigenous, of which 17 are provisionally accepted, with 25 species, ca 17% endemic. Peninsular Malaysia has no

endemic aroid genera As compared to Thailand with 29 genera ca 200 species of which 62 species ca 30% are endemic and Borneo where 38 genera of which are 10 endemic and currently 670 indigenous species of which more than 40% are undescribed and about 95% are endemic An historical review of Araceae research in Peninsular Malaysia and keys to higher taxa are provided Most genera are illustrated Universiti Sains Malaysia Penerbit Universiti Sains Malaysia □□□□(□□□)□□□□ □□□□□□ □□,2019-06-01 Lasianthus Jack is a large genus of the family Rubiaceae with more than 180 species predominantly in the Old World In tropical Asia there are more than 160 species only one extending to Australia The greatest species diversity is found in tropical Asia The species of the genus occur almost exclusively in the understory of primary forests There are occasionally records from secondary or seriously disturbed forests or forest edges Lasianthus species are an ecologically important element in tropical forests of Asia because they are usually present in large numbers in the forests The species of the genus also show interesting distribution patterns which may have significant implications to biogeography of tropical Asia and speciation in tropical rain forest Agricultural Bulletin of the Malay Peninsula ,1935 **Inventory of Seeds and Plants Imported** ,1922 **Plant Inventory** ,1922 **Inventory** ,1922 *Inventory* United States. Agricultural Research Service. Plant Science Research Division,1922 **Flora Capensis** William Henry Harvey,Otto Wilhelm Sonder,1925 Hydrophyllaceae Gentianaceae Afrika Annual Departmental Reports of the Straits Settlements for the Year ... Straits Settlements,1926 **Global Biodiversity** T. Pullaiah,2021-03-18 This new four volume set Global Biodiversity provides a wealth of insightful information on the biodiversity of selected nations around the world The volumes provide informative summaries of the available data on both wild and cultivated plants wild and domesticated animals and microbes of the different nations selected *Subject Index of the Modern Works Added to the British Museum Library* British Museum. Department of Printed Books,1927 **Annual Departmental Reports of the Straits Settlements** Straits Settlements,1926 **Subject Index of the Modern Books Acquired by the British Museum in the Years ...** ,1927 **Nature and Nation** Jeyamalar Kathirithamby-Wells,2005-10-31 Nature and Nation explores the relations between people and forests in Peninsular Malaysia where the planet s richest terrestrial eco system met head on with the fastest pace of economic transformation experienced in the tropical world It engages the interplay of history culture science economics and politics to provide a holistic interpretation of the continuing relevance of forests to state and society in the moist tropics Malaysia has long been singled out for emulation by developing nations an accolade contradicted in recent years by concerns over its capital rather than poverty driven forest depletion The Malaysian case supports the call for re appraisal of entrenched prescriptions for development that go beyond material needs Book cover Colonial Reports - Annual Great Britain. Colonial Office,1933 Each number comprises the annual report of a different colony for a particular year **Reference Catalogue of Current Literature** ,1928
