Flore Laurentienne:

Guide to Standard Floras of the World David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations and author and geographical indexes.

Codex Canadensis and the Writings of Louis Nicolas François-Marc Gagnon, 2011-09-29 Part art, part science, part anthropology, this ambitious project presents an early Canadian perspective on natural history that is as much artistic and fantastical as it is encyclopedic. Edited and introduced by François-Marc Gagnon, *The Codex Canadensis and the Writings of Louis Nicolas* showcases an intriguing attempt to document the life of the new world flora, fauna and aboriginal. The book brings together for the first time the illustrated *Codex Canadensis* and *The Natural History of the New World*, following Gagnon's argument that both can be attributed to Louis Nicolas, a French Jesuit priest who travelled throughout Canada between 1664 and 1675. *Histoire Naturelle des Indes Occidentales*, originally written in classical French, has been put in modern French by Réal Ouellet and translated into English by Nancy Senior. *The Natural History* presents a pre-Linnaean botany and pre-Darwinian account of living things, including hundreds of species of plants and vivid descriptions of wildlife. It is thoroughly annotated, focusing on the contemporary identification of species as the result of a pan-Canadian collaboration of experts in fields from linguistics to biology and botany. *The Codex Canadensis*, currently in the collection of the Gilcrease Museum in Tulsa, Oklahoma, is reproduced in full and provides both a fascinating visual account of wildlife as Nicolas saw it and a rare example of early Canadian art. Gagnon's introduction profiles Louis Nicolas and analyses connections between his work and European examples of natural illustration from the period. *The Codex Canadensis and the Writings of Louis Nicolas* shows how the wildlife and native inhabitants of the new world were understood and documented by a seventeenth-century European and makes available fundamental documents in the history and visual culture of early North America.

Parsons, 2018-09-21 When Samuel de Champlain founded the colony of Quebec in 1608 he established elaborate gardens where he sowed French seeds he had brought with him and experimented with indigenous plants that he found in nearby fields and forests Following Champlain's example fellow colonists nurtured similar gardens through the Saint Lawrence Valley and Great Lakes region In A Not So New World Christopher Parsons observes how it was that French colonists began to learn about Native environments and claimed a mandate to cultivate vegetation that did not differ all that much from that which they had left behind As Parsons relates colonists soon discovered that there were limits to what they could accomplish in their gardens The strangeness of New France became woefully apparent for example when colonists found that they could not make French wine out of American grapes They attributed the differences they discovered to Native American neglect and believed that the French colonial project would rehabilitate and restore the plant life in the region However the more colonists experimented with indigenous species and communicated their findings to the wider French Atlantic world the more foreign New France appeared to French naturalists and even to the colonists themselves Parsons demonstrates how the French experience of attempting to improve American environments supported not only the acquisition and incorporation of Native American knowledge but also the development of an emerging botanical science that focused on naming new species Exploring the moment in which settlers missionaries merchants and administrators believed in their ability to shape the environment to better resemble the country they left behind A Not So New World reveals that French colonial ambitions were fueled by a vision of an ecologically sustainable empire *Le Pays renversé: Amérindiens et Européens en Amérique du Nord-Est 1600-1664* Denys Delâge, 2011-11-01 This innovative interdisciplinary study offers a comprehensive analysis of the French Dutch and English colonization of northeastern North America during the early and middle decades of the seventeenth century It is the first book to pay serious attention to the European economic and political factors which promoted colonization and it argues that the prime determinant was the uneven development of agricultural systems in western Europe Lake of the Old Uncles Gerard Kenney, 2008-06-09 Lake of the Old Uncles recounts a trip that began

three quarters of a century ago in a small village inn nestled in the Laurentian hills of French speaking Quebec One day the trip will end at the village cemetery just one kilometre from the inn The traveller is the author The trip is not long but is rich in rural and natural experiences along the way Gerard Kenney takes us along the route that led him to build the lone log cabin on the small and inaccessible Lake of the Old Uncles No roads reach the pond only a footpath The hours spent in the quietude of the forest cabin have had an effect on the author that has resulted in a personal philosophy both rural and natural inspired by his hero Henry David Thoreau Gerard Kenney shares with his readers the evolution of his philosophy through his personal experiences with people and with the wilderness flora and fauna he has encountered on his life s journey

The Bungling Host Daniel Clément, 2018-08-01 Daniel Clément examines the Bungling Host tale known in a multitude of indigenous cultures in North America and beyond In this groundbreaking work he reveals fuller meaning to these stories than previously recognized and underscores the limits of structuralism in understanding them
