## **Flores Astrologiae:**

*Flores Astrologiae* (Tr: Johannes Hispalensis) , A Catalogue of Books Printed in the Fifteenth Century Now in the Bodleian Library Bodleian Library, Alan Coates, 2005 The Bodleian s incunable catalogue describes the Library s fifteenth century western printed books to the same standards expected in the best modern catalogues of medieval manuscripts It records and identifies all texts contained in each volume and the detailed analysis of the textual content is an innovative feature Further information about authors editors translators and dedicatees is given in an extensive index of names complete with biographical and other information this index will be of interest to textual scholars from the classical period to the renaissance The detailed descriptions of the copy specific features of each book the binding hand decoration and hand finishing marginalia and provenance form another important contribution to scholarship The provenance index will be of great value to all those interested in the history of the book from the 1450s to the present day

**Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin, 1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does

**The Early Printed Illustrations of Dante's "Commedia"** Matthew Collins, 2024-12-15 The Early Printed Illustrations of Dante s Commedia provides the first systematic overview of the earliest illustrated editions of Dante s poem stretching from 1481 through 1596 and features over 230 illustrations Developing a series of interdisciplinary methods for studying early printed book illustrations Matthew Collins explores the visual sources for the first illustrated editions of the Commedia their narrative qualities and their influence on Renaissance readers He traces the visual genealogies that link these images to each other and to renderings of the poem in other media including illuminated manuscripts and drawings such as those by Sandro Botticelli Collins additionally delves into a group of

cartographically oriented renderings of Dante's afterlife interpreting them in the context of the Age of Exploration. He addresses the utilitarian aspect of the illustrations as well by revealing the multidimensional role that these images played for Renaissance readers, particularly emphasizing their pedagogical and mnemonic uses. Of value to numerous disciplines, *The Early Printed Illustrations of Dante's Commedia* fills a gap in Dante studies and will inspire similar investigations into the visual representation of other literary works in the age of early print. [Catalogue of the Printed Books and Manuscripts in the John Rylands Library, Manchester](#) John Rylands Library, Edward Gordon Duff, 1899. [Regiomontanus: His Life and Work](#) E. Zinner, E. Brown, 2014-06-28. The 500th anniversary of Regiomontanus's birth has occasioned this depiction of his life and work. It is the first English translation of Ernst Zinner's monumental biography plus a number of specially written supplementary articles which help paint a more comprehensive picture of the current state of knowledge about Regiomontanus. The articles show the high regard in which the biography is still held by the community of scholars doing work on the mathematics of the Renaissance. Zinner's biography is a mine of information about early printing, astrolabes, tables of eclipses, and the world of Henry of Langenstein, Johann of Gmunden, Georg Peurbach, Cardinal Bessarion, Nicholas of Cusa, and the extraordinary itinerant scholar Johannes Müller of Königsberg. Regiomontanus's contributions to mathematics are discussed; for example, he may have discovered the fifth and sixth perfect numbers as well as the mysteries surrounding his life and death. **Astrology and Numerology in Medieval and Early Modern Catalonia** John Scott Lucas, 2003-01-01. From a late 15th-century Catalan incunabulum and drawing on a rich tradition of astrological magic, geomancy, Pythagorean numerology, and Hebrew gematria, this practical manual reveals a unique expression of medieval syncretism, the mingling of traditions, and the development of new ideas. [The Library World](#), 1908. **Book-prices Current**, 1923. [Sale Catalogues](#) American Art Association, Anderson Galleries (Firm), inc. American art association Anderson galleries, 1929. *Catalogue of Fifteenth Century Books in the Library of Trinity College, Dublin & in Marsh's Library, Dublin with a Few from Other Collections* Trinity College (Dublin, Ireland). Library, Thomas Kingsmill Abbott, 1905. [Music and the moderni, 1300-1350](#) Karen Desmond, 2018-08-23. Music theorists labelled the musical art of the 1330s and 1340s as new and modern. A close reading of writings on music theory and the polyphonic repertory from the first half of the fourteenth century reveals a modern musical art that arose due to specific innovations in music notation. The French *ars nova* employed as its theoretical fundament a new system for arranging musical time proposed by the astronomer and mathematician Jean des Murs. Challenging prevailing accounts of the *ars nova*, this book presents the new art within the intellectual context of its time, revises the datings of Jean des Murs's writings on music theory, and presents the intersection of theory and practice for a crucial era in the history of music. Through contemporaneous accounts, Desmond explores how individuals were involved in changing music in early fourteenth-century France and the technical developments they pursued that precipitated this stylistic change. **Morandi's Last Prophecy and the End of Renaissance Politics** Brendan

Dooley,2021-06-08 One year before Galileo's another trial was the talk of Rome. The city's most notorious astrologer Orazio Morandi, abbot of the monastery of Santa Prassede, was brought before the governor's court on charges of possessing prohibited books, fortune telling, and political chicanery. His most serious crime was to have predicted the death of Pope Urban VIII, and allowed news of this to spread as far as Spain, where cardinals quickly embarked for Italy to attend a conclave that would not occur for fourteen years. The pope, furious at such astrological and political effrontery, personally ordered the criminal inquiry that led to Morandi's arrest, trial, and death in prison, probably by assassination. Based on new evidence, this book chronicles Morandi's fabulous rise and fall against the backdrop of enormous political and cultural turmoil that characterized Italy in the early seventeenth century. It documents a world in which occult knowledge commanded power, reveals widespread libertinism behind monastery walls, and illuminates the arduous metamorphosis of intellectual culture already underway. It also sets the stage for and lends new understanding to the trial of Galileo that would follow shortly. The mystery of Morandi concerns the basic compulsion to advance in a status-drenched society and the very nature of knowledge at the birth of science. Told here in colorful detail, Morandi's story is fascinating in its own right. Beyond that, it allows us to glimpse the underside of early modern high society as never before.

[The Mirror of Magic](#) Kurt Seligmann,2018-10-16 A collector's edition of the classic, illustrated and comprehensive history of magic and the occult. Written by renowned Surrealist and magic scholar Kurt Seligmann, 1900-1962. Includes all 250 illustrations from the original 1948 edition. Explores magical practices and beliefs from their origins in the ancient world through the heyday of secret societies in the 18th century. In the occult classic *The Mirror of Magic*, renowned Surrealist Kurt Seligmann, 1900-1962, draws from his encyclopedic practitioner's knowledge and extensive antiquarian collection to offer a comprehensive illustrated history of magic and the occult from Mesopotamia and ancient Egypt through the 18th century. He explores the gods and divinatory arts of the legendary Sumerians and the star-wise Babylonians, including the birth of astrology. He examines the afterlife beliefs of the ancient Egyptians and the dream interpretation practices and oracles of ancient Greece, including the mysteries of Eleusis and the magical philosophy of Plato, Socrates, and other Greeks. He uncovers the origins of Gnosticism and the suppression and banishment of magic by the post-pagan Christian emperors of Rome. Seligmann reviews the principles of alchemy, sharing famous transmutations and allegorical illustrations of the alchemical process, and explores the Hermetica and its remarkable adepts. Investigating the Middle Ages, the author discusses the work of European magicians of the time, including Albertus Magnus, Roger Bacon, Agrippa, Nostradamus, and Pico della Mirandola. He studies the medieval practices of devil worship, witchcraft, and black magic, as well as the Cabala in both its Hebrew and Christian forms. He also examines the art of the Tarot and many lesser-known divination techniques. He explores the development of secret societies, including Freemasonry and Rosicrucianism in the 17th century, and the increase in occult publications and magical science in the 18th century. First published in 1948, this history of magic and the occult seeks to mirror the magical worldview throughout the

ages Beautifully illustrated with images from the author's rare library this collector's edition features all of the artwork more than 250 images from the original 1948 edition      **Magic in Western Culture** Brian P. Copenhaver, 2015-09-09 The story of the beliefs and practices called magic starts in ancient Iran Greece and Rome before entering its crucial Christian phase in the Middle Ages Centering on the Renaissance and Marsilio Ficino this richly illustrated and groundbreaking book treats magic as a classical tradition with foundations that were distinctly philosophical      **A History of Western Astrology** S. J. Tester, 1987 Superb general account Times Literary Supplement The story of the history of Western astrology begins with the philosophers of Greece in the 5th century BC To the magic and stargazing of Egypt the Greeks added numerology geometry and rational thought The philosophy of Plato and later of the Stoics made astrology respectable and by the time Ptolemy wrote his textbook the Tetrabiblos in the second century AD the main lines of astrological practice as it is known today had already been laid down In future centuries astrology shifted to Islam only to return to the West in medieval times where it flourished until the shift of ideas during the Renaissance      Book Auction Records Frank Karslake, 1926 A priced and annotated annual record of international book auctions      **Early Printed Books Arranged by Presses** Leighton, J. & J., London, 1916
