Dept. of the Secretary of State, 1923 **Taxation of Crypto Assets** Niklas Schmidt, Jack Bernstein, Stefan Richter, Lisa Zarlenga, 2020-11-27 The emergence of crypto assets has required taxation authorities worldwide to develop unprecedented policies and compelled tax lawyers to apply existing laws in new ways. This book the only one to focus solely on the taxation of crypto assets provides a detailed country by country analysis of how the tax law of thirty nine countries may apply to this rapidly developing area including different use cases and compliance and documentation requirements. Following an overview of the technology and key characteristics of crypto assets as well as the key tax concepts and types of taxes that could apply to them leading practitioners in each particular jurisdiction summarize the relevant tax law in that country. Fully explained are such aspects of crypto assets as the following and how they are interrelated: sales exchanges, receipt as remuneration, forks, airdrops, mining, staking, initial coin offerings, security token offerings and initial exchange offerings. Contributors describe how each jurisdiction applies income and capital gains taxation, value added tax and sales tax, withholding taxes, transfer taxes and gift inheritance estate and wealth taxes in the context of crypto assets. Reporting requirements and enforcement are also covered. Tax law as it applies to crypto assets is new and continues to evolve. This book will be welcomed as the premier resource for tax practitioners, government officials, advisors, investors, issuers, users of crypto assets and taxation academics who are seeking informed awareness of the policy choices countries make in dealing with the taxation of this new technology.
