Flourishing Craft Teaching Intelligence Studies:

A Flourishing Craft Joint Military College, 2016-01-30 This Conference on Teaching Intelligence Studies at Colleges and Universities establishes another benchmark in the advancement of thought on the democratization of the concept of intelligence and of the intelligence calling The environment of intelligence studies has been documented over the years by academic surveys and Conference proceedings This collection of papers highlights the convergence of academic and applied factions in the pursuit of intelligence professionalism Flourishing Craft Russell G. Swenson, 2000-01-01 Establishes another benchmark in the advancement of thought on the democratization of the concept of intelligence and of the intelligence calling Papers teaching intelligence the intellectual challenges and getting started a virtual UN Security Council educating for multilateral strategic decisionmaking teaching intelligence diagnosing the threat of weapons of mass destruction teaching vision structure and core competencies of the Drexel Univ Competitive Intelligence Certification Program outsiders and outside info toward systematic assessment teaching intelligence at a Jesuit university and intelligence studies the case of Austria A Flourishing Craft, 1999 Education, Security and Intelligence Studies Liam Gearon, 2018-10-19 With intensified threats to global security from international terrorism worldwide education systems themselves face these same unprecedented security threats Schools and universities have become marked loci of interest for the monitoring of extremism and counter terrorism by security and intelligence agencies The relationship between education systems and national security is nothing new though it extends in surprising and unexpected ways into territory which is by turns open and covert even secret Acknowledging the genuine political and security concerns which have drawn educational systems ever closer to the intelligence community this book shows how and why this has happened and explains why the relationship between education and the security and intelligence communities extends beyond contemporary concerns with counter terrorism As the title of this book demonstrates this is as much an intellectual challenge as a security struggle Education Security and Intelligence Studies thus critically engages with multi disciplinary perspectives on a complex and contentious interface between systems of often secret and covert national security and intelligence and open systems of national education Delving into difficult to access and often closely guarded aspects of public life the book provides the pathfinding groundwork and theoretical modelling for research into a complex of little explored institutional and epistemological interconnectedness between universities and the security and intelligence agencies This book was originally published as a special issue of the British Journal of Educational Studies *Improving Intelligence Analysis* Stephen Marrin, 2012-08-21 This book on intelligence analysis written by intelligence expert Dr Stephen Marrin argues that scholarship can play a valuable role in improving intelligence analysis Improving intelligence analysis requires bridging the gap between scholarship and practice Compared to the more established academic disciplines of political science and international relations intelligence studies scholarship is generally quite relevant to practice Yet a substantial gap exists

nonetheless Even though there are many intelligence analysts very few of them are aware of the various writings on intelligence analysis which could help them improve their own processes and products If the gap between scholarship and practice were to be bridged practitioners would be able to access and exploit the literature in order to acquire new ways to think about frame conceptualize and improve the analytic process and the resulting product This volume contributes to the broader discussion regarding mechanisms and methods for improving intelligence analysis processes and products It synthesizes these articles into a coherent whole linking them together through common themes and emphasizes the broader vision of intelligence analysis in the introduction and conclusion chapters The book will be of great interest to students of intelligence studies strategic studies US national security US foreign policy security studies and political science in general as well as professional intelligence analysts and managers

Intelligence Analysis in Theater Joint Intelligence Centers
Robert D. Folker, 2000 A growing number of JMIC students have begun to incorporate replicable research design into their theses This distillation of Master Sergeant Folker s theses shows how fruitful this approach can be By taking advantage of on site research funds available from the College he managed in brief visits to four Unified Command Joint Intelligence Centers to carry out a controlled experiment to measure the impact of analyst familiarity with and use of one structured analytic technique hypothesis testing His findings if corroborated by follow on studies could have a substantial impact on Intelligence Community analytical practices and even some influence on how senior policy officials react to analytical products Managers of analytical personnel might also note that structured methods would appear from this study of non specialized joint intelligence center analysts to be useful to specialized analysts who may be required to move beyond their areas of deep expertise to cover new or unfamiliar assignments

The Academic-Practitioner Divide in Intelligence Studies Rubén Arcos,Nicole K. Drumhiller,Mark Phythian,2022-04-14 Internationally the profession of intelligence continues to develop and expand So too does the academic field of intelligence both in terms of intelligence as a focus for academic research and in terms of the delivery of university courses in intelligence and related areas To a significant extent both the profession of intelligence and those delivering intelligence education share a common aim of developing intelligence as a discipline However this shared interest must also navigate the existence of an academic practitioner divide Such a divide is far from unique to intelligence it exists in various forms across most professions but it is distinctive in the field of intelligence because of the centrality of secrecy to the profession of intelligence and the way in which this constitutes a barrier to understanding and openly teaching about aspects of intelligence How can co operation in developing the profession and academic study be maximized when faced with this divide How can and should this divide be navigated The Academic Practitioner Divide in Intelligence provides a range of international approaches to and perspectives on these crucial questions
