*Arquitectura 2000. Proyectos, territorios y culturas* Muntañola Thornberg, Josep, 2004-12 Can there be freedom without memory Is architecture necessary for freedom and memory or is the total dissociation between freedom memory architecture and writing something positive for humanity Some announce a disappearance of memory and writing as memory but I cannot stop thinking that this conclusion was always reached by all the conservative thinkers facing an important cultural change and there has always emerged a new memory a new writing a new architecture and a new freedom I do not see that human life is possible without freedom without a type of writing of architecture of memory

**Mathematics Lovers** Sweet Revenge, 2017-09-25 Mathematics is a universal language that not only humans use it but is also used by chemical elements and molecules that follow mathematical models many physical phenomena are develop conform to mathematical principles such as the winds and waves of the sea, geomorphology, plant morphology, animal anatomy and movements of the stars, planets, satellites and comets follow mathematical principles. The man did not invent the mathematics because this one is much older than him but he learned to interpret it and to use it to its own benefit. Nowadays computers are used to perform the most complex calculations. However until about 50 years ago mathematicians did their calculations by hand using pencil and paper. To learn math it is necessary to do calculations by hand and mental. Therefore this gridbook is a stimulus for you to make calculations by hand in the style of the old mathematicians like Pythagoras, Archimedes, Newton or Einstein. It does not matter if you only calculate sums and subtractions or multiply and divide or you go further and solve quadratic equations, derivations, integrals. One of the most important and useful things that everyone should learn is to CALCULATE. La Matemática es un idioma universal que no solo los humanos lo utilizan sino que también es utilizada por los elementos y moléculas que siguen modelos matemáticos. Muchos fenómenos físicos se ajustan a principios matemáticos tales como los vientos y las olas del mar la geomorfología, la morfología vegetal, la anatomía animal y los movimientos de los astros, planetas, satélites y cometas siguen principios matemáticos. El hombre no inventó la matemática porque esta es mucho más antigua que él pero aprendió a interpretarla y a utilizarla en beneficio propio. Hoy en día se utilizan computadoras para realizar los cálculos más complejos.

Sin embargo hasta hace unos 50 años los matemáticos hacen sus cálculos a mano con lápiz y papel. Para aprender matemáticas es necesario hacer cálculos a mano y mentales. Por eso este cuaderno es un estímulo para que realices cálculos a mano a la usanza de los antiguos matemáticos como Pitágoras, Arquímedes, Newton o Einstein. No importa si solo calculas sumas y restas o multiplicas y divides o vas más allá y resuelves ecuaciones cuadráticas, derivaciones integrales. Una de las cosas más importantes y útiles que todo el mundo debe aprender es a CALCULAR. **El maravilloso mundo de las matemáticas**,

**El Fantástico y Maravilloso Mundo de Las Matemáticas** Heinrich Serre,2020-02-28 No cabe duda de que la matemática sigue siendo la materia que menos prefiera la sociedad en su conjunto sigue existiendo una gran animadversión por ella Mucho tiene que ver con la forma en la que ha sido enseñada pero también los padres apuntalan esta situación al decirles a los hijos cuán complicada es la materia Yo al contrario de lo que opina la mayoría creo que la matemática es en realidad muy fácil y sencilla y le explicar mis motivos Como todos me he enfrentado a problemas muy complicados que incluso me han llevado semanas meses y hasta años para resolver En este momento quizás piense que eso demuestra lo difíciles que son las matemáticas pero no así pues cuando logro resolver un problema muy complicado me doy cuenta de que en realidad no era difícil solo que no había entendido correctamente algún detalle o me faltaba comprender un poco más la situación Pero eso no es todo ese momento cumbre cuando doy con la solución es un momento de lo más increíble te da una sensación de paz de gozo y también de una inmensa alegría Esto es un poco de lo que quiero transmitir con usted por eso he dividido el libro en dos partes La primera parte es sobre temas de divulgación matemática para mostrarle como en todos lados hasta en donde uno menos lo piensa están las matemáticas La segunda parte es sobre problemas y juegos en los cuales incluyo la solución Trato de mostrar en ellos como es el proceso de construcción del conocimiento matemático para lograr que usted sienta esa grata sensación que da al resolver un problema Espero le agrade los temas y problemas que he escogido y que en el futuro pueda escribir una segunda parte profundizando varias ideas que aquí comenté     **El Mundo de las matemáticas** Josep-Lluís Hernández Pibernat,1983     *Alex en el país de los números* Alex Bellos,2011
