Álvaro Siza Alvaro Siza, 2004 This book examines the houses designed by Alvaro Siza one of the masters of contemporary architecture. The 28 villas represent an important aspect of Siza's career. Each construction is narrated by Alvaro Siza through his short poetic writings, a technical description and a series of sketches. Also included are accounts written by Siza's clients which bear witness to the complex dialogue behind the design of each house. The volume also features two visual essays based on a selection of drawings by Siza and impeccable photographs of his work.

Urban waterfronts and cultural heritage Dimitra Babalis, Tim G. Townshend, 2018-03-07 Approaches to urban waterfront conservation have been much debated in recent decades. Early schemes focused on leisure and commercial exploitation; more recently greater attention has been paid to environmental and ecological conditions, historic preservation and human well-being. But how do we balance these competing interests and yet ensure sustainable change, preserve identity and yet allow for new development? And how do we involve local people? This book aims to provide some answers to these important questions. The book is divided into three parts. Part One is an overview for regeneration and awareness of historic waterfronts. Part Two argues for the sustainable reuse of important sites to preserve their special identity. Part Three shows the importance of introducing young researchers to the complexities of designing waterfronts for sustainable lifestyles.

Sacred Buildings Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume, space and form. Sacred architecture is far less determined than other building tasks by functional requirements, norms and standards. As a rule it is free to unfold as pure architecture. Thus in design terms this building task offers enormous freedoms to the architect. At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions. In a systematic section this volume introduces the design, technical and planning fundamentals of building churches, synagogues and mosques. In its project section it also presents about seventy realized structures from the last three decades. Drawing

upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality **On Display** Siza,2005 **Arquitecto, obra y metodo** Eneko Besa Diaz,2022-03-23
