Perspectives On Loss John H. Harvey, 2014-01-14 Losses are integral to the human experience but they sometimes unfold in subtle ways Loss is not just about death but can encompass a number of situations such as those gradual losses experienced by the elderly loss of vision mental capacity or hope Intended to stimulate ideas and research in the new area of psychological aspects of loss this sourcebook collects the writing of a set of distinguished scholars representing psychology and related fields The author presents a case for a broadly construed field of loss both personal and interpersonal that would complement other fields such as death and dying traumatology and stress and coping No other volume is as comprehensive in its treatment of this intriguing subject The book begins with an introduction to the concept of loss and discusses the definition of the term and the salience of the topic in the general public in the 1990s Contributors were chosen to represent some of the most interesting current work on different types of loss and adaptation in the whole of the social and behavioral sciences Contents cover such diverse subjects as loss in intimate relationships disability chronic illness genocide sports unemployment and homelessness The book concludes with a commentary section on loss theory and research

Ruminative Thoughts Robert S. Wyer, Jr., 2013-01-11 Until recently most theory and research in social information processing has focused attention on the cognitive activity that underlies responses to stimulus information presented in the immediate situation being investigated In

contrast people's thoughts outside the laboratory often concern life events that either have occurred in the past or are likely to occur in the future. Thoughts about such past and future events can be spontaneous and once elicited can affect the ability to respond effectively to the demands of the present situation with which one is confronted. This ninth volume in this series focuses on this type of cognitive activity and examines both its determinants and consequences. The lead article by Leonard Martin and Abraham Tesser develops a theoretical formulation of ruminative thinking that conceptualizes rumination as a class of conscious thought with a common instrumental theme that recurs in the absence of immediate environmental demands. The authors also give particular attention to the ways in which perceptions of the consequences of past and present events for long range goal attainment affect both controlled and uncontrolled thinking about these events. They also examine the implications of their theory for the ability to suppress unwanted thoughts, the interplay of emotion and cognition and the cognitive consequences of rumination for the performance of daily life activities. The entire formulation integrates a number of cognitive phenomena that are not usually considered within a single theoretical framework. The companion chapters, many written by the field's foremost contributors to the literature on emotion and cognition, suggest important refinements and extensions of the conceptualization proposed in the target article. They also make important conceptual contributions in their own right, covering topics that include the role of mental models in cognitive functioning, the dynamics of thought suppression and attentional inhibition, stress and coping, personality correlates of ruminative thought and attitudes, and persuasion. As a result, this volume makes a valuable contribution to research and theory not only in social cognition but also in numerous other areas.

Knowing People Michael J. Lovaglia, 2006-12-13

Social psychology studies one of civilization's most central concerns: human relationships. By understanding people's beliefs, attitudes, and desires, individuals can fashion relationships that benefit all involved rather than one person or group at the expense of another. Written with a friendly style and engaging, accessible language, the second edition of the popular textbook *Knowing People* selects some of the best research in social psychology and shows how it can improve people's lives. This revised and updated edition includes clear descriptions of the latest research and adds a new chapter on leadership and emotion. Not only does *Knowing People* appeal to individual readers interested in improving their relationships, but it is also valuable as a supplemental text in a wide variety of social science, business, and professional courses in all areas where successful interaction with other people is important.

Homeland Security James J. F. Forest, 2006-06-30

America is a target: the homeland is under threat. While Americans have been targets of terrorist attacks for quite some time, September 11, 2001, awoke the nation to the reality that we are vulnerable in our homes, our places of work and worship, and our means of public transportation. And yet we must continue to function as best we can as the world's most vibrant economic and political community. The current threat environment requires greater engagement with the public as the necessary eyes and ears of the nation's homeland security infrastructure. However, to be effective, the public must be equipped with the knowledge of where and why specific locations and activities

may be a terrorist target what is being done to protect those targets and how they can help This three volume set answers that need The chapters of each volume of Homeland Security revolve around a core of central questions Are we safer today than we were pre 9 11 What steps have been taken in all these areas to protect ourselves What are the threats we face and what new threats have developed since 9 11 Are we staying one step ahead of those who wish to do us harm In 2002 more than 400 million people 122 million cars 11 million trucks 2 4 million freight cars and 8 million containers entered the United States Nearly 60 000 vessels entered the United States at its 301 ports of entry Clearly the amount of activity this represents will require a long term commitment to innovation organizational learning and public vigilance to complement an already overstretched network of government agencies and security professionals
