The Geopolitics of Australia's Regional Relations D. Rumley, 2001-06-30 The origins of this book go back 30 years to the stimulation and interest generated by the political geography seminars led by John House at the University of Newcastle Upon Tyne I was very fortunate to graduate among its extremely capable sporty and enthusiastic class of 68 from where several academic geographers emerged Equally fortunately some of them and their predecessors had already blazed a trail to undertake graduate studies in Canada At the University of British Columbia I was supervised at different times by Julian Minghi and Victor Prescott both of whom are not only extremely capable academics but are also very fine people I owe an enormous debt to John Julian and Victor and to the British and Canadian taxpayers who provided financial support for my University studies In 1974 I began an academic career at the University of Western Australia where I have been ever since save for a two year period from 1991-3 as Professor of Australian Studies in the Department of International Relations at the University of Tokyo Viewing Australia and the Asia Pacific region from this different perspective within an extremely supportive Japanese environment had a profound impact I am especially grateful for the support provided by so many Japanese academic colleagues and friends beginning as early as 1976 Three individuals deserve special mention for their help guidance and enduring friendship George Ohshima Hiroshi Tanabe and Akihiro Kinda

Fantasy City John Hannigan, 2005-07-20 Fantasy City analyses the post industrialist city as a site of entertainment By discussing examples from a wide variety of venues including casinos malls heritage developments and theme parks Hannigan questions urban entertainments economic foundations and historical background He asks whether such areas of fantasy destroy communities or instead create new groupings of shared identities and experiences The book is written in a student friendly way with boxed case studies for class discussion

Contested Worlds Martin Phillips, 2017-09-29 Contested Worlds provides an

introduction both to a multitude of geographical worlds which are currently being actively constructed and contested and to a range of different perspectives on these worlds being adopted and contested by geographers It is unique in its focus on the role of contestation in both the construction of geographical studies and in the geographies these studies seek to address These issues are explored through a combination of general theoretical discussion and detailed international case studies The areas discussed range in scale from the global through the regional and national to the local worlds of the inner city the neighbourhood and the village with connections drawn between these scales The book concludes that geography is being made in quite different ways It asserts that geography is intrinsically a contested enterprise and that this should be embraced as part of geographers becoming more critically involved in the making and studying of new contemporary human geographies

Dance of Life Craig Lockard, 1998-04-01 The rock era is over according to one pop music expert Another laments that rock music is metamorphosed into the musical wallpaper of ten thousand lifts hotel foyers shopping centers airport lounges and television advertisements that await us in the 1990s Whatever its current role and significance in Anglo American society popular music has been and remains a tremendous social and cultural force in many parts of the world This book explores the connections between popular music genres and politics in Southeast Asia with particular emphasis on Indonesia the Philippines Thailand Malaysia and Singapore

Crafting Peace Caroline A. Hartzell, Matthew Hoddie, 2015-10-29 The recent efforts to reach a settlement of the enduring and tragic conflict in Darfur demonstrate how important it is to understand what factors contribute most to the success of such efforts In this book Caroline Hartzell and Matthew Hoddie review data from all negotiated civil war settlements between 1945 and 1999 in order to identify these factors What they find is that settlements are more likely to produce an enduring peace if they involve construction of a diversity of power sharing and power dividing arrangements between former adversaries The strongest negotiated settlements prove to be those in which former rivals agree to share or divide state power across its economic military political and territorial dimensions This finding is a significant addition to the existing literature which tends to focus more on the role that third parties play in mediating and enforcing agreements Beyond the quantitative analyses the authors include a chapter comparing contrasting cases of successful and unsuccessful settlements in the Philippines and Angola respectively

Hidden Agendas John Pilger, 2010-09-02 In this powerful book journalist and film maker John Pilger strips away the layers of deception dissembling language and omission that prevent us from understanding how the world really works From the invisible corners of Tony Blair's Britain to Burma Vietnam Australia South Africa and the illusions of the media age power he argues has its own agenda Unchallenged it operates to protect its interests with a cynical disregard for people shaping and often devastating millions of lives By unravelling the hidden histories of contemporary events Pilger allows us to read between the lines He also celebrates the eloquent defiance and courage of those who resist oppression and give us hope for the future Tenaciously researched and written with passion and wit Hidden Agendas will change the way you

see the world **Geopolitics at the End of the Twentieth Century** Nurit Kliot, David Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs **International Migration** Douglas S. Massey, J. Edward Taylor, 2004-03-25 International Migration Prospects and Policies offers a comprehensive up to date survey of global patterns of international migration and the policies employed to manage the flows It shows that international migration is not rooted in poverty or rapid population growth but in the expansion and consolidation of global markets As nations are structurally transformed by their incorporation into global markets people are displaced from traditional livelihoods and become international migrants In seeking to work abroad they do not necessarily move to the closest or richest destination but to places already connected to their countries of origin socially economically and politically When they move migrants rely heavily on social networks created by earlier waves of immigrants and in recent years professional migration brokers have become increasingly common Developing countries generally benefit from international migration because migrant savings and remittances provide foreign earnings to finance balance of payments deficits and make productive investments Some developing nations have gone so far as to establish programs or ministries dedicated to the export of workers Developed nations in contrast focus more on the social and economic costs of immigrants and seek to reduce their numbers regulate their characteristics and limit their access to social services Over time receiving nations have gravitated toward a similar set of restrictive policies yielding undocumented migration as a worldwide phenomenon Globalization also creates infrastructures of transportation communication and social networks to put developed societies within reach In the latter ageing populations and segmenting markets create a persistent demand for immigrant workers All these trends are likely to intensify in the coming years to make immigration policy a key political issue in the twenty first century Security Strategies in the Asia-Pacific A. Tan, 2011-08-01 This book argues that given the existence of a discrete Malay archipelago security complex it is a fallacy for the United States to approach this region primarily through the prism of global counter terrorism **Foreign Operation Methods** Lawrence S. Welch, Gabriel R. G. Benito, Bent Petersen, 2008-01-01 New insights and a provocative perspective characterized this book by Professors Welch Benito and Petersen Managers will find the

framework of this book very appealing and relevant to their everyday international efforts and inquiries The book is mandatory reading for academics and graduates in business international marketing and international business Carlos M Rodriguez International Marketing Review Numerous books and articles on entry strategies and entry modes explain why companies choose a certain mode and how companies should enter foreign markets This book however deals with the strategic decision making process when deciding which mode to use on entering a new market The approach in this book is novel in that it discusses and suggests how companies can use a mixed mode approach to achieve success in foreign markets Moreover it deals with issues such as how and when to move from one mode to another which has always been an important question for firms as well as for scholars To summarize this is a timely publication which based on solid theoretical grounding provides excellent guidelines for managers formulating strategies to enter new markets as well as expanding their operations in foreign markets Pervez N Ghauri Manchester Business School University of Manchester UK Also known as entry modes or foreign market servicing methods foreign operation methods are critical criteria for companies ability to function in the international business arena This comprehensive and accessible textbook explores the characteristics choice utilization and management of foreign operation methods The book provides an extended analysis of the various foreign operation mode options including those that have until now received relatively cursory treatment Issues such as international licensing franchising outsourcing project operations and management contracts are also discussed In addition to providing an overview of the various theoretical perspectives on foreign operation mode choice a treatment of emerging strategy concerns such as mode combinations and mode switching is included Featuring a thorough overview of the various theoretical perspectives on foreign operation mode choice and use and treatment of emerging strategy concerns such as mode combinations and mode switching this textbook provides a somewhat broader coverage of foreign operation methods than current literature has offered until now It will prove invaluable for a wide ranging readership encompassing undergraduate and postgraduate students academics and practitioners in the field of international business
