Farewell, Revolution Steven Laurence Kaplan, 2018-09-05 Steven Laurence Kaplan reconstructs and analyzes the loud and bitter arguments over the meaning of the French Revolution which have consumed French intellectuals in recent years. Kaplan recounts the contemporary debates over the meaning of the Revolution tracing the impact of the historians' bitter quarrel from Parisian academic circles to the public arenas of the bicentennial celebration. He considers the roles played in those arguments by three of France's most influential historians: François Furet, Pierre Chaunu, and Michel Vovelle. In 1993 Editions Fayard published Steven Laurence Kaplan's controversial history of the bicentennial commemoration of the French Revolution. Here available in English is one of the most polemical parts of that work. Kaplan's account of the contemporary debates over the meaning of the Revolution *Farewell Revolution The Historians Feud France 1789 1989* traces the impact of the historians' bitter quarrel from Parisian academic circles to the public arenas of the bicentennial celebration. Kaplan considers in intimate detail the roles played in those arguments by three of France's most influential historians: François Furet, Pierre Chaunu, and Michel Vovelle. As he reenacts the feud, Kaplan invites a reassessment of the relationship between the writing of history and the practice of politics. His book suggests that the charged relationship between history and politics that enlivened the bicentennial may be the Revolution's most enduring legacy. *Farewell, Revolution* Steven L.

Kaplan, 1995 His book suggests that the charged relationship between history and politics that enlivened the bicentennial may be the Revolution's most enduring legacy. [The Bourgeois Revolution in France, 1789-1815](#) Henry Heller, 2006 In the last generation the classic Marxist interpretation of the French Revolution has been challenged by the so-called revisionist school. The Marxist view that the Revolution was a bourgeois and capitalist revolution has been questioned by Anglo-Saxon revisionists like Alfred Cobban and William Doyle as well as a French school of criticism headed by François Furet. Today revisionism is the dominant interpretation of the Revolution both in the academic world and among the educated public. Against this conception this book reasserts the view that the Revolution the capital event of the modern age was indeed a capitalist and bourgeois revolution. Based on an analysis of the latest historical scholarship as well as on knowledge of Marxist theories of the transition from feudalism to capitalism the work confutes the main arguments and contentions of the revisionist school while laying out a narrative of the causes and unfolding of the Revolution from the eighteenth century to the Napoleonic Age. **Encyclopedia of Modern French Thought** Christopher John Murray, 2004 This work covers not only philosophy but also all the other major disciplines including literary theory sociology linguistics political thought theology and more. Wood,1998 This collection of essays by twenty one distinguished American historians reflects on a peculiarly American way of imagining the past At a time when history writing has changed dramatically the authors discuss the birth and evolution of historiography in this country from its origins in the late nineteenth century through its present more cosmopolitan character In the book s first part concerning recent historiography are chapters on exceptionalism gender economic history social theory race and immigration and multiculturalism Authors are Daniel Rodgers Linda Kerber Naomi Lamoreaux Dorothy Ross Thomas Holt and Philip Gleason The three American centuries are discussed in the second part with chapters by Gordon Wood George Fredrickson and James Patterson The third part is a chronological survey of non American histories including that of Western civilization ancient history the middle ages early modern and modern Europe Russia and Asia Contributors are Eugen Weber Richard Saller Gabrielle Spiegel Anthony Molho Philip Benedict Richard Kagan Keith Baker Joseph Zizak Volker Berghahn Charles Maier Martin Malia and Carol Gluck Together these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world Formerly writing from a conviction that America had a singular destiny American historians have gradually come to share viewpoints of historians in other countries about which they write The result is the virtual disappearance of what was a distinctive American voice That voice is the subject of this book Western Historiography in Asia Q. Local Metaphor Alon Confino, 2000-11-09 All nations make themselves up as they go along but not all make themselves up in the same way In this study Alon Confino explores how Germans turned national and argues that they imagined the nation as an extension of their local place In 1871 the work of political unification had been completed but Germany remained a patchwork of regions with different histories and traditions Germans had to construct a national memory to reconcile the peculiarities of the region and the totality of the nation This identity project examined by Confino as it evolved in the southwestern state of Württemberg oscillated between failure and success The national holiday of Sedan Day failed in the 1870s and 1880s to symbolically commingle localness and nationhood Later the idea of the Heimat or homeland did prove capable of representing interchangeably the locality the region and the nation in a distinct national narrative and in visual images The German nationhood project was successful argues Confino because Germans made the nation into an everyday local experience through a variety of cultural forms including museums school textbooks popular poems travel guides posters and postcards But it was not unique Confino situates German nationhood within the larger context of modernity and in doing so he raises broader questions about how people in the modern world use the past in the construction of identity **The**

Physiocrats and the World of the Enlightenment Liana Vardi, 2012-03-19 Offers a framework for understanding physiocratic theory and the development of modern economics **Contemporary France** David Howarth, Georgios Varouxakis, 2014-03-18 At least since the French Revolution France has the peculiar distinction of simultaneously fascinating charming and exasperating its neighbours and foreign observers Contemporary France provides an essential introduction for students of French politics and society exploring contemporary developments while placing them in a deeper historical intellectual cultural and social context that makes for insightful analysis Thus chapters on France's economic policy and welfare state its foreign and European policies and its political movements and recent institutional developments are informed by an analysis of the country's unique political and institutional traditions distinct forms of nationalism and citizenship dynamic intellectual life and recent social trends Summaries of key political economic and social movements and events are displayed as exhibits **The French Revolution and Historical Materialism** Henry Heller, 2017-07-03 This

text reasserts the Marxist view of the French Revolution as a bourgeois and capitalist revolution Based mainly on articles published in the journal Historical Materialism it challenges the still dominant revisionist view of the French Revolution It serves to restore the close tie between the history of the Old Regime and the Revolution It demonstrates that the rise of a bourgeois capitalist class has a long history dating back to the sixteenth century Moreover it shows that the Revolution itself played a large role in strengthening the bourgeoisie politically and economically while bringing about the unification of financial and productive capital Indeed it shows that the rising of the masses during the Revolution viewed by revisionism as economically regressive in fact helped to bring about the consolidation of capitalism Byron and the Politics of Freedom and Terror Piya Pal-Lapinski, 2011-05-27 This interdisciplinary collection explores the divergence or convergence of freedom

and terror in a range of Byron's works Challenging the binary opposition of historicism and critical theory it combines topical debates in a manner that is sensitive both to the circumstances of their emergence and to their relevance for the twenty first century The Memory Phenomenon in Contemporary Historical Writing Patrick H. Hutton, 2016-07-15 In this book the

author provides a comprehensive overview of the intense and sustained work on the relationship between collective memory and history retracing the royal roads pioneering scholars have traveled in their research and writing on this topic notably the politics of commemoration purposes and practices of public remembrance the changing uses of memory worked by new technologies of communication from the threshold of literacy to the digital age the immobilizing effects of trauma upon memory with particular attention to the remembered legacy of the Holocaust He follows with an analysis of the implications of this scholarship for our thinking about history itself with attention to such issues as the mnemonics of historical time and the encounter between representation and experience in historical understanding His book provides insight into the way interest in the concept of memory as opposed to long standing alternatives such as myth tradition and heritage has opened new vistas for scholarship not only in cultural history but also in shared ventures in memory studies in related fields in the humanities and social sciences **The Intellectual Origins of the Belgian Revolution** Stefaan Marteel, 2018-09-05 This

book explores the political ideas of the Belgian Revolution of 1830 which led to the break up of the Restoration state of the united Kingdom of the Netherlands It uncovers the origins of liberalism and political Catholicism in the Southern Netherlands in the wake of the French Revolution and traces the development of political language in the context of the tensions between the Northern and Southern part of the united Netherlands It shows how differences in Dutch and Belgian political and intellectual history resulted in different understandings of essential political concepts such as sovereignty and balance of powers as well as of the nature of the constitutional order of 1815 Finally it traces the emergence of Belgian nationalism within the discourse of opposition against the government Stefaan Marteel therefore provides a fresh perspective on the intellectual background of the rise of the nation state in the nineteenth century Fair Shares for All Jean-Pierre

Gross, 2003-11-13 This study explores the egalitarian policies pursued in the provinces during the radical phase of the French Revolution but moves away from the habit of looking at such issues in terms of the Terror alone It challenges revisionist readings of Jacobinism that dwell on its totalitarian potential or portray it as dangerously utopian The mainstream Jacobin agenda emphasised fair shares and equal opportunities for all in a private ownership market economy It sought to achieve social justice without jeopardising human rights and tended thus to complement rather than undermine the liberal individualist programme of the Revolution The book stresses the relevance of the Enlightenment legacy the close affinity between Girondins and Montagnards the key role played by many lesser known figures and the moral ascendancy of Robespierre It reassesses the basic social and economic issues at stake in the Revolution which cannot be understood solely in terms of political discourse
