Food and the City Jennifer Cockrall-King, 2012-02-14 A global movement to take back our food is growing The future of farming is in our hands and in our cities This book examines alternative food systems in cities around the globe that are shortening their food chains growing food within their city limits and taking their food security into their own hands The author an award winning food journalist sought out leaders in the urban agriculture movement and visited cities successfully dealing with food deserts What she found was not just a niche concern of activists but a global movement that cuts across the private and public spheres economic classes and cultures She describes a global movement happening from London and Paris to Vancouver and New York to establish alternatives to the monolithic globally integrated supermarket model A cadre of forward looking innovative people has created growing spaces in cities on rooftops backyards vacant lots along roadways and even in vertical farms Whether it's a community public orchard supplying the needs of local residents or an urban farm that has reclaimed a derelict inner city lot to grow and sell premium market veggies to restaurant chefs the urban food revolution is clearly underway and working This book is an exciting fascinating chronicle of a game changing movement a rebellion against the industrial food behemoth and a reclaiming of communities to grow distribute and eat locally City Wolves Dorris Heffron, 2010-03-02 A moving historical tale and remarkable literary achievement City Wolves is the story of Canada's first woman veterinarian Meg Wilkinson Born in 1870 on a farm near Halifax Meg's childhood experience with

Conferenz in Berlin hervorgegangen ist, nebst dem Entwurf des Wahlgesetzes ... ,1849 *The Farmers' Advocate and Home Magazine* ,1928 Resistance Is Fertile Wilhelm Peekhaus,2013-03-13 For decades government industry and the mainstream media have extolled the virtues of biotechnology while downplaying its negative side effects Focusing on agriculture Resistance Is Fertile challenges this dominant rhetoric by analyzing the major issues around which opponents of biotechnology in Canada are mobilizing resistance namely the enclosure of the biological and the knowledge commons which together form the BioCommons What emerges is an empirically and theoretically informed analysis of Canada s regulatory regime the corporate control of seeds and attempts to construct and control public discussions about agricultural biotechnology The Changing Politics of Organic Food in North America Lisa F. Clark,2015-08-28 The Changing Politics of Organic Food in North America explores the political dynamics of the remarkable transition of organic food from a fringe fad in the 1960s to a multi billion dollar industry in the 2000s Taking a multidisciplinary institutio **Secret Vancouver 2010** Alison Appelbe,2009-07 In 1963 Jimmy Wynn was the second most famous man in America The comedian s uncanny impression of the President made him a star But when the genuine article died in a hail of bullets on a sunny afternoon in New Orleans Jimmy s career met a fate almost as grisly What happened to the funny man afterward was a mystery no one cared to solve Nearly 25 years later Nathan Grant an ambitious young journalist discovers the trail Jimmy cut through the entertainment netherworld He soon

realizes this forgotten court jester may have played a very serious part in the country's favorite conspiracy theory Grant's strange and increasingly dangerous odyssey takes him from a dingy New York record store to the showrooms of Las Vegas a ghost town in the Mojave Desert and even a dinner theatre in Niagara Falls A dark comedy about the cost of fame Jason Anderson's *Showbiz* is the story of a man who became a punchline and a writer who is desperate to find out how the rest of the joke goes

The Politics of the Pantry Michael Mikulak, 2013-10-01 What's for dinner has always been a complicated question The locavore movement has politicized food and challenged us to rethink the answer in new and radical ways These days questions about where our food comes from have moved beyond 100 mile dieters into the mainstream Celebrity chefs Jamie Oliver and Alice Waters alternative food gurus such as Michael Pollan and numerous other popular and academic commentators have all talked about the importance of understanding the sources and transformation of food on a human scale In *The Politics of the Pantry* Michael Mikulak interrogates these narratives what he calls storied food in food culture As with any story however it is important to ask who is telling it Who is the audience What assumptions are being made Mikulak examines competing narratives of food pleasure sustainability and value that have emerged from the growing sustainable food movement as well as food's past and present relationship to environmentalism in order to understand the potential and the limits of food politics He also considers whether or not sustainable food practices can address questions about health environmental sustainability and local economic development while at the same time articulating an ethical globalization An innovative blend of academic analysis poetic celebration and autobiography *The Politics of the Pantry* provides anyone interested in the future of food and the emergence of a green economy with a better understanding of how what we eat is transforming the world

Skyscraper Facades of the Gilded Age Joseph J. Korom, Jr., 2013-02-01 This book is about the design of the facade of 51 of America's most extravagant early skyscrapers Included are the biographies of noted architects and the aristocrats who financed America's first skyscrapers This book discusses the influences of European aesthetic values in America and scandals rogues and class distinctions Interpretations by contemporary critics are sprinkled throughout the text Woven throughout the book are inquiries about the validity of Greek and Roman mythologies and their relationships to modern America and its spirit of invention and progress Foreign traditions were challenged by some architects but then accepted by most Why was it necessary for the long dead hero of a faraway civilization to be included on the facade of a newly invented American skyscraper This book tells why

The No-Nonsense Guide to World Food Wayne Roberts, 2013-09-23 Wayne Roberts puts under the microscope a global food system that is under strain from climate change and from economic disaster He shows how a world food system based on supermarkets and agribusiness corporations is unsustainable and looks at new models of producing healthy food from all over the world

Bioregionalism and Civil Society Mike Carr, 2004 *Bioregionalism and Civil Society* addresses the urgent need for sustainability in industrialized societies The book explores the bioregional movement in the US Canada and Mexico examining its vision values strategies

and tools for building sustainable societies Bioregionalism is a philosophy with values and practices that attempt to meld issues of social and economic justice and sustainability with cultural ecological and spiritual concerns Further bioregional efforts of democratic social and cultural change take place primarily in the sphere of civil society Practically Carr argues for bioregionalism as a place specific community movement that can stand in diverse opposition to the homogenizing trends of corporate globalization Theoretically the author seeks lessons for civil society based social theory and strategy Conventional civil society theory from Europe proposes a dual strategy of developing strong horizontal communicative action among civic associations and networks as the basis for strategic vertical campaigns to democratize both state and market sectors However this theory offers no ecological or cultural critique of consumerism By contrast Carr integrates both social and natural ecologies in a civil society theory that incorporates lessons about consumption and cultural transformation from bioregional practice Carr's argument that bioregional values and community building tools support a diverse democratic socially just civil society that respects and cares for the natural world makes a significant contribution to the field of green political science social change theory and environmental thought
