Oomens,2007-10-31 Well Satisfied with My Position offers a first person account of army life during the Civil War s Peninsula Campaign and Battle of Fredericksburg Spencer Bonsall who joined the 81st Pennsylvania Infantry as a hospital steward kept a journal from March 1862 until March 1863 when he abruptly ceased writing Editors Michael A Flannery and Katherine H Oomens place his experiences in the context of the field of Civil War medicine and continue his story in an epilogue Trained as a druggist when he was in his early twenties Bonsall traveled the world spent eight years on a tea plantation in India and settled in Philadelphia where he worked in the city surveyor s office But in March 1862 when he was in his mid forties the lure of serving his country on the battlefield led Bonsall to join the 81st Pennsylvania Infantry as a hospital steward Bonsall enjoyed his life with the Union army at first comparing bivouacking in the woods to merely picnicking on a grand scale We are about as jolly a set of old bachelors as can be found in Virginia Bonsall wrote But his first taste of the aftermath of battle at Fair Oaks and the Seven Days Battles in Virginia changed his mind about the joys of soldiering though he never lost his zeal for the Union cause Bonsall details the camp life of a soldier from firsthand experience outlines the engagements of the 81st and traces the Battle of Fredericksburg and the Peninsula Campaign He records facts not available elsewhere about camp conditions attitudes toward Union generals and Confederate soldiers and troop movements From the end of June to late October 1862 Bonsall s illness kept him from writing in his journal He picked up the record again in December 1862 just before the Battle of Fredericksburg Virginia in which the Union suffered a staggering 10 200 casualties and the 81st Pennsylvania lost more than half its men He vividly

describes the bloody aftermath Bonsall's horse was shot out from underneath him at the battle of Gettysburg injuring him seriously and ending his military career. Although he was listed as sick in hospital on the regiment's muster rolls he was labeled a deserter in the U.S. Army records. Indeed, after recovery from his injuries, Bonsall walked away from the army to resume life in Philadelphia with his wife and child. Published for the first time, Bonsall's journal offers an unusually personal glimpse into the circumstances and motives of a man physically ruined by the war. Seventeen illustrations, including some drawn by Bonsall himself, help bring this narrative to life. *Fever of War* Carol R. Byerly, 2005-04-05

The influenza epidemic of 1918 killed more people in one year than the Great War killed in four, sickening at least one quarter of the world's population. In *Fever of War*, Carol R. Byerly uncovers the startling impact of the 1918 influenza epidemic on the American army, its medical officers, and their profession, a story which has long been silenced. Through medical officers' memoirs and diaries, official reports, scientific articles, and other original sources, Byerly tells a grave tale about the limits of modern medicine and warfare. The tragedy begins with overly confident medical officers who, armed with new knowledge and technologies of modern medicine, had an inflated sense of their ability to control disease. The conditions of trench warfare on the Western Front soon outflanked medical knowledge by creating an environment where the influenza virus could mutate to a lethal strain. This new flu virus soon left medical officers' confidence in tatters as thousands of soldiers and trainees died under their care. They also were unable to convince the War Department to reduce the crowding of troops aboard ships and in barracks, which were providing ideal environments for the epidemic to thrive. After the war, and given their helplessness to control influenza, many medical officers and military leaders began to downplay the epidemic as a significant event for the U.S. army, in effect erasing this dramatic story from the American historical memory. Medical Protestants John S. Haller, 1994

By the late nineteenth century, the eclectics found themselves in the backwaters of modern medicine. Unable to break away from their botanic bias and ill equipped to accept the implications of germ theory, the financial costs of salaried faculty and staff, and the research demands of laboratory science, the eclectics were pushed aside by the rush of modern academic medicine. Gentlemen Volunteers Arlen J. Hansen, 2011-09-01

They left Harvard, Yale, Princeton, Michigan, and Stanford to drive ambulances on the French front and on the killing fields of World War I. They learned that war was no place for gentlemen. The tale of the American volunteer ambulance drivers of the First World War is one of gallantry amid gore, manners amid madness. Arlen J. Hansen's *Gentlemen Volunteers* brings to life the entire story of the men and women who formed the first ambulance corps and who went on to redefine American culture. Some were to become legends: Ernest Hemingway, E. E. Cummings, Malcolm Cowley, and Walt Disney, but all were part of a generation seeking something greater and grander than what they could find at home. The war in France beckoned them, promising glory, romance, and escape. Between 1914 and 1917, when the United States officially entered the war, they volunteered by the thousands, abandoning college campuses and prep schools across the nation and leaving behind an America determined not to be drawn into a European

The People's Doctors John S. Haller, 2000 Samuel Thomson born in New Hampshire in 1769 to an illiterate farming family had no formal education but he learned the elements of botanical medicine from a root doctor who he met in his youth Thomson sought to release patients from the harsh bleeding or purging regimens of regular physicians by offering inexpensive and gentle medicines from their own fields and gardens He melded his followers into a militant corps of dedicated believers using them to successfully lobby state legislatures to pass medical acts favorable to their cause John S Haller Jr points out that Thomson began his studies by ministering to his own family He started his professional career as an itinerant healer traveling a circuit among the small towns and villages of Maine New Hampshire and Massachusetts Eventually he transformed his medical practice into a successful business enterprise with agents selling several hundred thousand rights or franchises to his system His popular New Guide to Health 1822 went through thirteen editions including one in German and countless thousands were reprinted without permission Told here for the first time Haller's history of Thomsonism recounts the division within this American medical sect in the last century While many Thomsonians displayed a powerful vested interest in anti intellectualism a growing number found respectability through the establishment of medical colleges and a certified profession of botanical doctors The People's Doctors covers seventy years from 1790 when Thomson began his practice on his own family until 1860 when much of Thomson's medical domain had been captured by the more liberal Eclectics Eighteen halftones illustrate this volume

This Man's Army John Allan Wyeth, 2008 This is an autobiographical account of Wyeth's service in France and Belgium from 1917-1919 detailing his duties as interpreter messenger and occasionally sentry while traveling town by town toward the German Hindenburg line

An Equal Burden Jessica Meyer, 2019-02-13 An Equal Burden is the first scholarly study of the Army Medical Services in

the First World War to focus on the roles and experiences of the men of the Royal Army Medical Corps RAMC. Though they were not professional medical caregivers, they were called upon to provide urgent medical care and, as non-combatants, were forbidden from carrying weapons. Their role in the war effort was quite unique and warranting of further study. Structured both chronologically and thematically, *An Equal Burden* examines the work that RAMC rankers undertook and its importance to the running of the chain of medical evacuation. It additionally explores the gendered status of these men within the medical, military, and cultural hierarchies of a society engaged in total war. Through close readings of official documents, personal papers, and cultural representations, Meyer argues that the ranks of the RAMC formed a space in which non-commissioned servicemen, through their many roles, defined and redefined medical caregiving as men's work in wartime. *Life in Crisis*

Peter Redfield, 2013-02-25 *Life in Crisis* tells the story of Médecins Sans Frontières (Doctors Without Borders) or MSF and its effort to save lives on a global scale. Begun in 1971 as a French alternative to the Red Cross, the MSF has grown into an international institution with a reputation for outspoken protest as well as technical efficiency. It has also expanded beyond emergency response, providing for a wider range of endeavors, including AIDS care. Yet its seemingly simple ethical goal proves deeply complex in practice. MSF continually faces the problem of defining its own limits. Its minimalist form of care recalls the promise of state welfare but without political resolution or a sense of well-being beyond health and survival. Lacking utopian certainty, the group struggles when the moral clarity of crisis fades. Nevertheless, it continues to take action and innovate. Its organizational history illustrates both the logic and the tensions of casting humanitarian medicine into a leading role in international affairs. *Shadows on the Track*

Jan McLeod, 2019-01-05 At Templeton's Crossing in October 1942, Private Nick Kennedy paused to write in his diary: "One wonders why all this strife should be these men in the prime of their life cut down like flowers." As a young nursing orderly serving with the 24th Australian Field Ambulance, Kennedy was unenviably well-placed to reflect on the futility of war. The Australian Army was woefully unprepared to fight a medical war in Papua, and the soldiers paid the price. Almost 30,000 soldiers suffered from illness and tropical diseases, and an estimated 6,000 were killed or wounded during the six-month campaign. These statistics have traditionally been represented as unavoidable consequences of fighting a war in a place such as Papua. This book disputes that narrative. Death and disease were inevitable outcomes, but the scale of the suffering was not. The medical challenges presented in Papua were extreme; they were not insurmountable. *Shadows on the Track* considers a wide range of issues that impacted on the health of the Australian soldiers before, during, and after the Papuan campaign was fought and won. The strengths, successes, shortcomings, and failures of the medical campaign are identified, analysed, and evaluated. The focus on the front-line medical personnel, the men of the field ambulance units, brings a new perspective to the battles of the Kokoda Track, Milne Bay, and the Beachheads. Shining a light on these Australians who tended the sick, mended the wounded, and buried the dead in Papua makes stepping out of the shadows a little easier.
