Farmers Bounty Locating Crop Diversity In The Contemporary World:

Farmers? Bounty Stephen B. Brush, 2008-10-01 Biological diversity is as crucial in agriculture as it is in nature and it is equally important to the economic health of both industrial and nonindustrial societies This book offers a sweeping assessment of crop diversity and the potential for its preservation Stephen B Brush develops a framework for investigating biological diversity in agriculture that focuses on the knowledge and practice of farmers and he shows how this human ecology perspective can be applied to three global issues that affect crop resources Brush defines the dimensions of crop diversity and outlines the essential questions surrounding it He describes the techniques used to maintain diversity in major crops of three cradles of agriculture in which he has worked potatoes in the Peruvian Andes maize in Mexico and wheat in Turkey Finally he explores the policy issues surrounding genetic erosion of crop varieties conservation of crop diversity and ownership of genetic resources DIV

The Third Report on The State of the World's Plant Genetic Resources for Food and Agriculture Food and Agriculture Organization of the United Nations, 2025-03-24 Plant genetic resources for food and agriculture PGRFA are the essence of sustainable agrifood systems They encompass the genetic diversity in both improved and farmers varieties as well as in crop wild relatives wild food plants and breeding materials The third report on the State of the World's Plant Genetic Resources for Food and Agriculture presents a comprehensive assessment of the conservation and sustainable use of PGRFA as well as the human and institutional capacities to support these efforts Based on information from 128 countries and four regional and 13 international research centres and the contribution from over 1 600 experts it presents an overview of progress since 2012 as well as current needs and challenges in the future management of PGRFA The report provides a sound basis for recalibrating relevant policies and strategies including the rolling Global Plan of Action for Plant Genetic Resources for Food and Agriculture

Neglected Plant Foods Of South Asia Tariq Ismail, Saeed Akhtar, Claudia E. Lazarte, 2023-09-18 According to the global hunger index South Asia has worldwide highest rate of undernourished people Such a burden of food insecurity and various forms of malnutrition are directly associated with the existing food production system that ignores biodiversity food affordability and sustainability During the last five decades food production system has witnessed a global shift from ethnic to mainstream staple cereals production and promotion Such an approach has badly affected the regional genetic pool of a diverse range of nourishing economical and sustainable edible plant species which are now referred to as neglected or underutilized food crops Neglected Plant Foods of South Asia collects and preserves existing knowledge of underutilized minor wild neglected and traditional food plants of South Asia and their utilization for the production of value added food products Aiming at introducing plant based food solutions to address the increasing burden of food insecurity among marginalized communities of South Asia this manuscript covers a plethora of nutrient dense plant species including fruits vegetables roots tubers cereals pseudo cereals and pulses In addition to having an overview of each plant's origin cultivation practices and

production statistics researchers will find comprehensive information on nutritional composition food manufacturing properties value addition and traditional uses of neglected plant foods Recent updates on strategies to combat toxicological risks associated with the consumption of neglected food plants have also been included With this volume researchers will have complete information on neglected underutilized traditional edible plants of South Asia and their potential to increase food security under the emerging challenges of climate change

Endangered Maize Helen Anne Curry,2022-01-25

Charting the political social and environmental history of efforts to conserve crop diversity Many people worry that we are losing genetic diversity in the foods we eat Over the past century crop varieties standardized for industrial agriculture have increasingly dominated farm fields Concerned about what this transition means for the future of food scientists farmers and eaters have sought to protect fruits grains and vegetables they consider endangered They have organized high tech genebanks and heritage seed swaps They have combed fields for ancient landraces and sought farmers growing Indigenous varieties Behind this widespread concern for the loss of plant diversity lies another extinction narrative that concerns the survival of farmers themselves a story that is often obscured by urgent calls to collect and preserve Endangered Maize draws on the rich history of corn in Mexico and the United States to uncover this hidden narrative and show how it shaped the conservation strategies adopted by scientists states and citizens In Endangered Maize historian Helen Anne Curry investigates more than a hundred years of agriculture and conservation practices to understand the tasks that farmers and researchers have considered essential to maintaining crop diversity Through the contours of efforts to preserve diversity in one of the world's most important crops Curry reveals how those who sought to protect native traditional and heritage crops forged their methods around the expectation that social political and economic transformations would eliminate diverse communities and cultures In this fascinating study of how cultural narratives shape science Curry argues for new understandings of endangerment and alternative strategies to protect and preserve crop diversity
