Farming On The Edge Saving Family Farms In Marin County:

Farming on the Edge John Hart, 1991 *Farming on the Edge* contains a story that needs repeating throughout our land. It is a reminder that cities cannot exist without country that farmers neglected by society are in fact a living heritage as important to our development as schools, music, and art to be honored and treasured. It is our responsibility to sustain life on our farms supporting farmers and a way of life that has always been the foundation and basis of culture. Paul Hawken, *Smith Hawken* A great book. Marin County has made a wonderful start in making the Bay Area greenbelt a reality. Larry Orman, Executive Director, Greenbelt Alliance. An unusual glimpse into a community that has succeeded in preserving its agricultural heritage. Ralph Grossi, President, American Farmland Trust. [Part Time Farming, Small Farms and Farming in the United States](#) Mary V. Gold, 1993. *Saving America's Countryside* Samuel N. Stokes, A. Elizabeth Watson, Shelley S. Mastran, 1997-08-13. A new edition of the 1989 classic that received the American Society for Landscape Architects Honor Award and the Historic Preservation Book Prize. This thoroughly revised and updated second edition reports on changes in conservation over the last eight years. It includes new case studies, more than 50 new illustrations, a section on heritage tourism, and much more. 235 illustrations. **Point Reyes Complete Guide** Jessica Lage, 2010-05-10. Only 30 miles from San Francisco, Point Reyes National Seashore attracts admirers year-round to its forests, wetlands, and beaches. Visitors come to this tranquil place to hike, camp, backpack, bike, kayak, horseback ride, picnic, fish, and nature watch. This invaluable resource gives detailed information on the trails, roads, camps, and beaches within the Seashore, plus surrounding parks and preserves. Point Reyes: The Complete Guide to the National Seashore Surrounding Area has much more than coverage of all the popular recreational activities and hiking trails. **Tomales Bay Environmental History and Historic Resource Study** Christy Avery, 2009. **A People's Guide to the San Francisco Bay Area** Rachel Brahinsky, Alexander Tarr, 2020-10-06. An alternative history and geography of the Bay Area that highlights sites of oppression, resistance, and transformation. A People's Guide to the San Francisco Bay Area looks beyond the mythologized image of San Francisco to the places where collective struggle has built the region. Countering romanticized commercial narratives about the Bay Area, geographers Rachel Brahinsky and Alexander Tarr highlight the cultural and economic landscape of indigenous resistance to colonial rule, radical interracial and cross-class organizing against housing discrimination and police violence, young people demanding economically and ecologically sustainable futures, and the often unrecognized labor of farmworkers and everyday people. The book asks who had and who has the power to shape the geography of one of the most watched regions in the world. As Silicon Valley's wealth dramatically transforms the look and feel of every corner of the region, like bankers' wealth did in the past, what do we need to remember about the people and places that have made the Bay Area with its rich political legacies? With over 100 sites that you can visit and learn from, this book demonstrates critical ways of reading the landscape itself for clues to these histories. A useful companion for travelers, educators, or longtime residents, this guide links multicultural streets and

lush hills to suburban cul de sacs and wetlands stretching from the North Bay to the South Bay from the East Bay to San Francisco Original maps help guide readers and thematic tours offer starting points for creating your own routes through the region **Bel Marin Keys Unit 5** ,1993 **Growth Management and Public Land Acquisition** Christopher

Coutts,2016-04-15 Bringing together a team of national experts this volume offers a detailed look at the links between public land acquisition programs and efforts to yield smart growth outcomes in the USA Both public land acquisition programs and state and local growth management efforts have been examined in detail but while there is growing recognition that land acquisition can play an important role in smart growth outcomes there has so far been little research into the nexus of these areas of public policy This book investigates various aspects of the land acquisition smart growth linkage and describes model programs and makes recommendations for the adoption of land acquisition efforts nationally and internationally It will appeal to practising planners policy makers public officials and citizen groups as well as academics of urban planning environmental studies geography and other disciplines which examine issues of urban sprawl **Saving Point Reyes**

Gerald Felix Warburg,2023-08-25 The Point Reyes National Seashore PRNS is not only a stunning piece of land the first large national park created from all private lands and the first large park adjacent a major metropolitan center but the fight to save this fragile ecosystem in the 1960s was a key turning point in the environmental movement and helped transform the political landscape of California and the nation Saving Point Reyes is an environmental policy history that draws on archival materials oral histories and new interviews with veteran federal policymakers to understand how legislative bargaining and grassroots politics succeeded in achieving this victory for environmental protection Gerald Warburg offers the first political history focused on the battles to preserve the unique series of fragile ecosystems that surround San Francisco and the definitive study of exactly how Point Reyes was saved Most accounts of this story only focus on the 1962 bill that created the PRNS on 53 000 acres of private lands just north of San Francisco But that was just the first act in the saga The passing of the bill only established the park in theory and the government only controlled 123 acres at Point Reyes In the months following the signing ceremony all three of the House Senate and White House champions of the Point Reyes legislation died leaving the PRNS without the leadership necessary to secure the funding to purchase the rest of the land What followed was an epic public policy battle to save Point Reyes Local grassroots lobbying organizations arose to advance the cause of PRNS and other environmental campaigns and their victory in 1970 laid the foundation for future environmental activism With this new funding the PRNS expanded to over 71 000 acres which then grew to 87 000 acres in 1972 with the creation of the Golden Gate National Recreation Area The legislative bargaining and grassroots politics in the fight to preserve Point Reyes helped create a tipping point profoundly altering the national environmental movement Warburg s deeply researched case study of NGO activism and congressional action is developed through a compelling narrative that offers specific lessons learned and hope for future environmental challenges from climate policy to public lands preservation Birding and

Life Science Ethics Gary L. Comstock, 2010-08-24 Does nature have intrinsic value Should we be doing more to save wilderness and ocean ecosystems What are our duties to future generations of humans Do animals have rights This revised edition of Life Science Ethics introduces these questions using narrative case studies on genetically modified foods use of animals in research nanotechnology and global climate change and then explores them in detail using essays written by nationally recognized experts in the ethics field Part I introduces ethics the relationship of religion to ethics how we assess ethical arguments and a method ethicists use to reason about ethical theories Part II demonstrates the relevance of ethical reasoning to the environment land farms food biotechnology genetically modified foods animals in agriculture and research climate change and nanotechnology Part III presents case studies for the topics found in Part II

Holding Our Ground Deborah Bowers, Tom Daniels, 1997-03-01 Farmers who own or rent most of the private land in America hold the key not only to the nation's food supply but also to managing community growth maintaining an attractive landscape and protecting water and wildlife resources While the issue of protecting farmland and open space is not new the intensity of the challenge has increased Farmers are harder pressed to make a living and rural and suburban communities are struggling to accommodate increasing populations and the development that comes with them Holding Our Ground can help landowners and communities devise and implement effective strategies for protecting farmland The book discusses the reasons for protecting farmland and how to make those reasons widely known and understood describes the business of farming federal government farm programs and the role of land in farmers' decisions analyzes federal state and local farmland protection efforts and techniques explores a variety of land protection options including purchase of development rights transfer of development rights private land trusts and financial tax and estate planning reviews the strengths and weaknesses of the farmland protection tools available The authors describe the many challenges involved in protecting farmland and explain how to create a package of techniques that can meet those challenges In addition they offer appendixes with model zoning ordinances nuisance disclaimers conservation easements and other documents that individuals and communities need to carry out the programs discussed Holding Our Ground provides citizens elected officials planners and landowners with a solid basis for understanding the issues behind farmland protection and will be an invaluable resource in developing techniques and programs for achieving long term protection goals

The New Urban Park Hal Rothman, 2004 From Yellowstone to the Great Smoky Mountains America's national parks are sprawling tracts of serenity most of them carved out of public land for recreation and preservation around the turn of the last century America has changed dramatically since then and so has its conceptions of what parkland ought to be In this book one of our premier environmental historians looks at the new phenomenon of urban parks focusing on San Francisco's Golden Gate National Recreation Area as a prototype for the twenty first century Cobbled together from public and private lands in a politically charged arena the GGNRA represents

a new direction for parks as it highlights the long standing tension within the National Park Service between preservation and recreation Long a center of conservation the Bay Area was well positioned for such an innovative concept Writing with insight and wit Rothman reveals the many complex challenges that local leaders politicians and the NPS faced as they attempted to administer sites in this area He tells how Representative Phillip Burton guided a comprehensive bill through Congress to establish the park and how he and others expanded the acreage of the GGNRA redefined its mission to the public forged an identity for interconnected parks and struggled against formidable odds to obtain the San Francisco Presidio and convert it into a national park Engagingly written The New Urban Park offers a balanced examination of grassroots politics and its effect on municipal state and federal policy While most national parks dominate the economies of their regions GGNRA was from the start tied to the multifaceted needs of its public and political constituents including neighborhood ethnic and labor interests as well as the usual supporters from the conservation movement As a national recreation area GGNRA helped redefine that category in the public mind By the dawn of the new century it had already become one of the premier national park areas in terms of visitation Now as public lands become increasingly scarce GGNRA may well represent the future of national parks in America Rothman shows that this model works and his book will be an invaluable resource for planning tomorrow s parks

Shaping the Sierra Timothy P. Duane, 1999-06-30 The rural west is at a crossroads and the Sierra Nevada is at the center of this social and economic change The Sierra Nevada landscape has always been valued for its bounty of natural resource commodities but new residents and an ever growing flood of tourists to the area have transformed the relationship between the region s nature and its culture In an engaging narrative that melds the personal with the professional Timothy P Duane who grew up in the area documents the impact of rapid population growth on the culture economy and ecology of the Sierra Nevada since the late 1960s He also recommends innovative policies for mitigating the negative effects of future population growth in this spectacular but threatened region as well as throughout the rural west Today the primary social and economic values of the Sierra Nevada landscape are in the amenities and ecological services provided by its wildlands and functioning ecosystems Duane shows how further unfettered population growth threatens the very values which have made the Sierra Nevada a desirable place to live and work A new approach to land use planning resource management and local economic development one that recognizes the emerging values of the landscape is necessary in order to achieve sustainable development Duane claims Weaving personal experience with outstanding scholarship he shows how such an approach must explicitly recognize the importance of values and the application of an environmental land ethic to future development in the area

The Paradox of Preservation Laura Alice Watt, 2017 S T U V W Y Z *Valley of Heart's Delight* Anne Marie Todd, 2022-10-25 This agricultural history explores the transformation of the Santa Clara Valley over the past one hundred years from America s largest fruit producing region into the technology capital of the world In the latter half of the twentieth century the region s focus shifted from fruits such as

apricots and prunes to computers Both personal and public rhetoric reveals how a sense of place emerges and changes in an evolving agricultural community like the Santa Clara Valley Through extensive archival research and interviews Anne Marie Todd explores the concepts of place and placelessness arguing that place is more than a physical location and that exploring a community's sense of place can help us to map how individuals experience their natural surroundings and their sense of responsibility towards the local environment Todd extends the concept of sense of place to describe Silicon Valley as a non place where weakened or disrupted attachment to place threatens the environment and community The story of the Santa Clara Valley is an American story of the development of agricultural lands and the transformation of rural regions

The Country in the City Richard A. Walker, 2009-11-23 Winner of the Western History Association's 2009 Hal K Rothman Award Finalist in the Western Writers of America Spur Award for the Western Nonfiction Contemporary category 2008 The San Francisco Bay Area is one of the world's most beautiful cities Despite a population of 7 million people it is more greensward than asphalt jungle more open space than hardscape A vast quilt of countryside is tucked into the folds of the metropolis stitched from fields farms and woodlands mines creeks and wetlands In *The Country in the City* Richard Walker tells the story of how the jigsaw geography of this greenbelt has been set into place The Bay Area's civic landscape has been fought over acre by acre an arduous process requiring popular mobilization political will and hard work Its most cherished environments Mount Tamalpais Napa Valley San Francisco Bay Point Reyes Mount Diablo the Pacific coast have engendered some of the fiercest environmental battles in the country and have made the region a leader in green ideas and organizations This book tells how the Bay Area got its green grove from the stirrings of conservation in the time of John Muir to origins of the recreational parks and coastal preserves in the early twentieth century from the fight to stop bay fill and control suburban growth after the Second World War to securing conservation easements and stopping toxic pollution in our times Here modern environmentalism first became a mass political movement in the 1960s with the sudden blooming of the Sierra Club and Save the Bay and it remains a global center of environmentalism to this day Green values have been a pillar of Bay Area life and politics for more than a century It is an environmentalism grounded in local places and personal concerns close to the heart of the city Yet this vision of what a city should be has always been informed by liberal even utopian ideas of nature planning government and democracy In the end green is one of the primary colors in the flag of the Left Coast where green enthusiasms like open space are built into the fabric of urban life Written in a lively and accessible style *The Country in the City* will be of interest to general readers and environmental activists At the same time it speaks to fundamental debates in environmental history urban planning and geography
