Fast Lanes:

Fast Lanes Jayne Anne Phillips, 2011-11-02 From the Pulitzer Prize winning author of Night Watch a short story collection that presents a tour de force of voices offering elegantly rendered views into the lives of characters torn between the liberation of detachment and the desire to connect A brilliant writer utterly original and with an astonishing range Ian McEwan New York Times bestselling author of Atonement and Lessons Three stories are collected in this edition for the first time in Alma and adolescent daughter is made the confidante of her lonely mother Counting traces the history of a dommed love affair and Callie evokes memories of the haunting death of a child in 1920 s West Virginia Along with the original seven stories from Fast Lanes each told in extraordinary first person narratives that have been hailed by critics as virtuoso performances these incandescent portraits offer windows into the lives of an entire generation of Americans demonstrating again and again why Jayne Anne Phillips remains one of our most powerful writers Data Management on New Hardware Spyros Blanas, Rajesh Bordawekar, Tirthankar Lahiri, Justin Levandoski, Andrew Pavlo, 2017-03-21 This book contains selected papers from the 7th International Workshop on Accelerating Analytics and Data Management Systems Using Modern Processor and Storage Architectures ADMS 2016 and the 4th International Workshop on In Memory Data Management and Analytics IMDM 2016 held in New Dehli India in September 2016 The joint Workshops were co located with VLDB 2016 The 9 papers presented were carefully reviewed and selected from 18 submissions. They investigate opportunities in accelerating analytics data management systems and workloads including traditional OLTP data warehousing OLAP ETL streaming real time business analytics and XML RDF processing running memory only environments using processors e g commodity and specialized multi core GPUs and FPGAs storage systems e g storage class memories like SSDs and phase change memory and hybrid programming models like CUDA OpenCL and Open ACC The papers also explore the interplay between overall system design core algorithms query optimization strategies programming approaches performance modeling and evaluation from the perspective of data management applications The Role of SDN in Broadband Networks Hassan Habibi Gharakheili, 2017-01-09 This thesis focuses on the design and use of software defined networking SDN in residential Internet service providers ISPs as well as innovative operational models that can be incorporated in broadband ecosystems Though SDN addresses the challenges for bundled best effort service provided by broadband operators for users it does not distinguish between the different types of applications video streaming web browsing and large file transfers nor does it cater to the varying needs of different household devices entertainment tablets work laptops or connected appliances This is a problem for end users who want to differentiate between applications and devices for content providers CPs who want to exercise control over streams of high monetary value and for Internet service providers ISPs who have to accommodate growing traffic volumes without additional revenues This book develops a series of solution techniques that use SDN to find an optimal balance between the competing requirements of end users ISPs and CPs In addition to the design and discussions

of various architectures it provides technical details on real world system implementations and prototypes As such it offers a valuable resource for researchers network architects network strategists developers and all other readers seeking to learn more about the practical value of SDN in future ISP networks Providing for Consideration of H.R. 3, Transportation Equity Act: A Legacy for Users, March 8, 2005, 109-1 House Report No. 109-14,2005 The Culture Shock **Project** Ainesey "Annie" Rodriguez-Anaman, 2019-01-06 A powerful book full of knowledge talent and real stories This book will move you and uplift you are at your worst The content is raw and unedited stories of real life artist struggling in America This is a project of a collaboration of artist This book is documentation of a real life movement of activist joint together for the greater good of the future A Must read Public Roads ,2003 Providing for further consideration of H.R. 3550. Transportation Equity Act United States. Congress. House. Committee on Rules, 2004 Evolutionary Games with Sociophysics Jun Tanimoto, 2018-11-27 Recent applications of evolutionary game theory in the merging fields of the mathematical and social sciences are brilliantly portrayed in this book which highlights social physics and shows how the approach can help to quantitatively model complex human environmental social systems First readers are introduced to the fundamentals of evolutionary game theory. The two player two strategy game or the 2.2 game is presented as an archetype to help understand the difficulty of cooperating for survival against defection in common social contexts Subsequently the book explains the theoretical background of the multi player two strategy game which may be more widely applicable than the 2 2 game for social dilemmas The latest applications of 2 2 games are also discussed to explore how integrated reciprocity mechanisms can solve social dilemmas In turn the book describes two practical areas in which evolutionary game theory has been applied The first concerns traffic flow analysis In conventional interpretations traffic flow can be understood by means of fluid dynamics in which the flow of vehicles is evaluated as a continuum body Such a simple idea however does not work well in reality particularly if a driver's decision making process is considered Various dilemmas involve complex structures that depend primarily on traffic density a revelation that should help establish a practical solution for reducing traffic congestion Second the book provides keen insights into how powerful evolutionary game theory can be in the context of epidemiology Both approaches quasi analytical and multi agent simulation can clarify how an infectious disease such as seasonal influenza spreads across a complex social network which is significantly affected by the public attitude toward vaccination A methodology is proposed for the optimum design of a public vaccination policy incorporating subsidies to efficiently increase vaccination coverage while minimizing the social cost FCC Record United States.
