**The US Navy's Fast-Attack Submarines, Vol. 2** James C. Goodall, 2020-06-28 Successors to the US Navy's Los Angeles class fast attack submarines presented in volume 1 the Seawolf and Virginia class SSNs are presented here from their initial design and construction through testing and trials to current operations From its debut in 1997 the nuclear powered Seawolf SSN 21 represented the lead ship of the deadliest submarine ever to be constructed for the USN during the Cold War With the end of the Cold War the Seawolf class SSNs were limited to the three that were under construction at the time and the program was terminated With only three in the class the supersecret USS Jimmy Carter SSN 23 is virtually off limits to any and all photography The author's unprecedented access onboard a Seawolf class SSN the USS Connecticut SSN 22 is a first for the Navy and provides exclusive coverage found only in this book In place of the Seawolf class the Virginia class attack submarine is an advanced stealth multimission nuclear powered submarine for deep ocean antisubmarine warfare and littoral shallow water operations Fast-attack Submarine Gregory Payan, 2000 A series about the most sophisticated and up to date military weaponry explained in vivid detail Highlighting the profiles and uses of these weapons reluctant teen readers will learn much about military technology US Nuclear Submarines Jim Christley, 2012-01-20 The adoption of nuclear power revolutionized submarine design Vessels can stay underwater for months trailing the enemy or training weapons on land targets from secret positions always there never seen Jim Christley a former submariner explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war and frankly discusses the power and perils of using nuclear reactors at sea Using unique and detailed artwork he outlines the many evolving aspects of design within the submarine classes from the very first nuclear submarine USS Nautilus to the classes under construction even now

Meeting the Submarine Challenge John Merrill, Lionel D. Wyld, 1997 Cold Warriors Roy R. Manstan, 2014-05-20 This is the story of a technological war There was no ambiguity behind the phrase mutually assured destruction nuclear weapons and the means to deliver them had become a reality The atomic bomb brought Japan to the USS Missouri for the formal surrender on September 2 1945 a date that marked the end of World War Two But this date also signaled the beginning of the Cold War as the Soviet Union emerged from the shadows There was no shot heard round the world no Fort Sumter no Pearl Harbor only the threat of a mushroom cloud far worse than what Japan experienced The Cold War remained cold because all the players aggressively pursued a strategy of deterrence aimed at keeping the opponents finger off the trigger The people on the front lines and behind the scenes the Cold Warriors on both sides would come from the civilians who created the technology and the military that would be entrusted with its use When tensions escalated it was the Navy and the silent service that played a critical role In Cold Warriors the author describes a Navy laboratory in New London Connecticut populated with pioneers in submarine and antisubmarine warfare technology Their mandate was to take the intellectual risks that would keep this country one step ahead of the Soviet Union But ideas alone would not win the Cold War The scientists

relied on teams of field engineers whose willingness to take on physical risk would convert theory into reality One of these groups was simply known as the divers Beginning in the 1950s the U S Navy Underwater Sound Laboratory began sending a small number of its civilian staff one or two each year to train at one of the Navys diving schools As the Laboratory in New London evolved into the Naval Undersea Warfare Center Newport Rhode Island that small team became the Engineering and Diving Support Unit For more than a half century the divers would travel the world this book is their story **Ready**
