Warfare Since the Second World War Torsten Schwinghammer,2018-04-24 Warfare Since the Second World War presents a wealth of analysis and data about one of the most pressing questions of our time why does war continue to plague us fifty years after World War II This book argues that the nature of war has shifted from inter state conflicts toward internal conflicts above all civil war Low intensity conflict helps explain the constant increase in wars over the last fifty years and makes it probable this trend will continue Gantzel and Schwinghammer argue that modern warfare reflects a continuation of the nation state building process begun in nineteenth century Europe In their analysis economic modernization and social integration destroy traditional relations and create instability in the developing world While these forces were successfully harnessed by the modern state in Europe and North America economic and political globalization make a similar resolution considerably more complex In addition to their insightful analysis the authors provide a detailed list of all wars fought from 1945 to 1995 The authors lucid explanatory commentaries are accompanied by lists tables and charts In addition to a detailed war register upon which all statistical data and analyses for the volume are based there are appendices with directories useful for locating specific wars as well as several supplementary lists An afterword brings the reader closer to the world situation as we conclude the twentieth century including the impact of political developments in Eastern Europe Beyond its historical dimension this book offers a policy relevant empirical demonstration of the ongoing increase in internal civil wars and addresses the inability of modern society to prevent this scourge Warfare Since the Second World War is an indispensable resource for anyone concerned with issues of war and peace development and the future of international relations

The North Caucasus: Minorities at a Crossroads Helen Liesl Krag,Lars Funch,1994-12-14 The North Caucasus region stretches along the high peaks of the Caucasian mountains from the shores of the Black Sea in the north west to the coast of the Caspian Sea in the south east For centuries it has represented the literal and symbolic frontier between Europe and Asia Today the region forms part of the Russian Federation bordering Georgia and Azerbaijan Following the breakup of the USSR the North Caucasus has become a border region of renewed geopolitical interest This is one of Europe s most ethnically diverse regions and is home to over 40 distinct ethnic groups As the peoples of the North Caucasus seek to

redefine their identities in the current political arrangements a multitude of latent and manifest conflicts have emerged In The North Caucasus Minorities at a Crossroads Dr Helen Krag and Lars Funch give an overview of the region s history the peoples of the North Caucasus and the claims and conflicts past and present This report is one of the first publications to examine the North Caucasus and its peoples in depth alerting the public and governments to a potentially volatile situation and suggesting ideas for possible action Please note that the terminology in the fields of minority rights and indigenous peoples rights has changed over time MRG strives to reflect these changes as well as respect the right to self identification on the part of minorities and indigenous peoples At the same time after over 50 years work we know that our archive is of considerable interest to activists and researchers Therefore we make available as much of our back catalogue as possible while being aware that the language used may not reflect current thinking on these issues
