Chinese Characters L. Wieger,2013-05-14 For at least 2 000 years Chinese scholars have conducted research into the

writing system In addition to the study of origins and the processes by which new characters are created Chinese scholarship has been especially interested in creating a rational classification of characters for dictionary use which would show historical relationships idea relationships and phonetic features This volume by one of the most profound Sinologists of the twentieth century summarizes such traditional Chinese scholarship and carries research farther into the analysis of the writing system The heart of this book is a series of etymological lessons in which approximately 2 300 Chinese characters are classified according to 224 primitives upon which they are based For each character Father Wiegner gives the modern form its archaic form literary pronunciation Wade system explanations of origin semantic content of component parts related characters variant forms quotations of classical usage and similar material The explanations of symbolic content are particularly rich and gather the most important traditional explanations especially the Shuo wen of Hs shih as well as the author s own research To make his book more useful Father Wiegner has also incorporated a tremendous number of reading aids for the student listings of the primitives an index of the characters analyzed arranged by number of strokes a listing of 858 phonetic elements arranged by number of strokes a listing of about 10 000 characters by phonetic element a lexicon by transliteration comprising about 7 000 characters and a lexicon of about 10 000 characters according to the customary modern system of 214 radicals devised by K ang hsi With this most extensive apparatus students can locate any character they are likely to meet Indeed this supplementary material is so useful that it serves the purpose of a dictionary in its own right Recent archeological research has for the most part sustained the historical analyses of traditional Chinese scholarship and Father Wiegner For the student however more important than the historical and classificatory concerns of the book are the analyses of characters in semantic terms In the Far East analysis of characters has long been taught in such terms but unfortunately this very valuable mnemonic technique has been largely overlooked in the West With Wiegner s book however both teachers and students will find learning easier and more lasting when phonetic components are understood and the relationships are perceived between various characters between original forms and present forms and between idea and symbol Father Wiegner s book is an indispensable aid to every student of Chinese and Japanese **China** Robert Storey,1998 This sixth edition of China was produced in LP s Melbourne office Pete Cruttenden coordinated the editorial side of things with the sterling assistance of Emma Miller Anne Mulvaney Miriam Cannell Greg Alford Mic Looby and Carolyn Papworth Thanks too to Linda Suttie for initially banging the manuscript into shape Hangzhou.
