Far Eastern Fleets:

Warships of the Soviet Fleets 1939-1945 Przemyslaw Budzbon, Jan Radziemski, 2025-04-22 Seventy five years after the end of the Second World War the details of Soviet ships their activities and fates remain an enigma to the West In wartime such information was classified and after a brief period of glasnost openness the Russian state has again restricted access to historical archives Therefore the value and originality of this work is difficult to exaggerate It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy listing over 6200 vessels from battleships to river gunboats and mercantile conversions as well as purpose built warships This second part of the three volume series includes all the remaining fighting vessels not already covered in Volume I Beginning with the Uragan class rated as Escort Ships and the first seagoing warships designed by the Soviet Union the book then moves on to Submarine Hunters both large and small Patrol craft Minelayers and Minesweepers and unusual types like Floating Artillery Batteries and Anti Aircraft Defense Ships concluding with Landing Ships and Craft Many of these vessels have hitherto been poorly documented but given the nature of the land centered Soviet war against Germany their contribution should not be underestimated The details of their service and not least the circumstances of their loss constitute a major addition to Western understanding of the Soviet Navy s war effort This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships the Soviet Navy or wider maritime aspects of the Second World War Furthermore as recent Russian actions appear to revive Soviet era aspirations this book offers both new insights and valuable background of contemporary relevance *Royal Navy Strategy in the Far East 1919-1939* Andrew Field, 2004-05-20

Between the ending of the Great War and the start of the Second World War in 1939 the Royal Navy remained the largest in the world But with the League of Nations seeming to offer a solution to all future conflicts a country weary of war and without an obvious enemy there seemed no need for a large battlefleet The strategic focus shifted eastwards to Japan with its growing battlefleet as the new threat to the British Empire and to the Royal Navy s supremacy From 1924 a strategic plan War Memorandum Eastern was written and refined The plan called for the Royal Navy still the largest in the world even after the Washington Naval Treaties to move eastwards to a defended base at Singapore cut off Japan and force her battlefleet into a decisive fleet battle As a strategy War Memorandum Eastern had many flaws Its real importance lay in the fact that it provided a justification for the Royal Navy to maintain its leading position in the world and to be in the forefront of the development of new tactical thinking Through planning for a war with Japan the Royal Navy was able to test its readiness for a future war Many of the lessons learnt during this period were ultimately put to good use against a different foe in 1939

World Fishing Fleets: Executive summary ,1993 **The Eastern Fleet and the Indian Ocean, 1942-1944** Charles Stephenson, 2022-04-06 A study of the British Royal Navy s activities in the Indian Ocean during World War II led by Admiral Sir James Somerville The story of the British Eastern Fleet which operated in the Indian Ocean against Japan has rarely been

told Although it was the largest fleet deployed by the Royal Navy prior to 1945 and played a vital part in the theatre it was sent to protect it has no place in the popular consciousness of the naval history of the Second World War So Charles Stephenson s deeply researched and absorbing narrative gives this forgotten fleet the recognition it deserves British pre war naval planning for the Far East is part of the story as is the disastrous loss of the battleship Prince of Wales and battlecruiser Repulse in 1941 but the body of the book focuses on the new fleet commanded by Admiral Sir James Somerville and its operations against the Japanese navy and aircraft as well as Japanese and German submarines Later in the war once the fleet had been reinforced with an American aircraft carrier it was strong enough to take more aggressive actions against the Japanese and these are described in vivid detail Charles Stephenson s authoritative study should appeal to readers who have a special interest in the war with Japan in naval history more generally and Royal Navy in particular Praise for The Eastern Fleet and the Indian Ocean 1942 1944 This meticulously researched outstandingly clear well written and absorbing account is long overdue and will most likely become a standard work The text is most helpfully supported by over 80 pages of detailed end notes referenced to each chapter and a detailed index This is not only a book for naval historians but also for anyone with an interest in the War in the Indian Ocean region Highly recommended Military Historical Society I enjoyed this book it gives us an account of an often neglected part of the war at sea and of the achievements of Admiral Somerville who kept his fleet intact in the face of a potentially overwhelming opponent then was willing to acknowledge that his fleet needed to improve massively before it could take on the Japanese Dr John Rickard author and webmaster of the Military History Encyclopedia on the Web [Circular](#) ,1969 **Grand Strategy** Norman Henry Gibbs, John Ehrman, 1956 **Sealift** ,1973 *Japan's Indian Ocean Raid 1942* Mark Stille, 2023-12-21 An detailed illustrated exploration of the Japanese raid into the Indian Ocean in April 1942 one of the largest operations conducted by the Imperial Navy during the war In the wake of Japan s conquest of Burma in early 1942 plans were formed by the Imperial high command to capture Ceylon modern Sri Lanka to consolidate Japan s defensive perimeter and disrupt British shipping lanes to India Australia and the Middle East The Imperial Japanese Army however could not release sufficient troops for an invasion and so in response the Japanese Navy developed Operation C an aggressive raid by the Combined Fleet into the Indian Ocean The key objective was to destroy the British Eastern Fleet in port Expert naval historian Mark Stille documents the high point of Japanese naval air power as its carriers struck Ceylon the heart of British naval power in the East sinking several Allied ships He describes the Allied air attempts to destroy Admiral Chuichi Nagumo s force and the Japanese attacks against British shipping and the cities along the Indian coast Specially commissioned battlescenes bring to life the sinking of British carrier Hermes the Bristol Blenheim attacks on the Japanese carrier force and a Zero vs Hurricane dogfight over Colombo on 5 April Easy to follow maps and diagrams reveal the strategic situation at the start and end of the campaign and track the movements of the Japanese carrier task force and the British Eastern Fleet throughout Details of weaponry equipment personnel and the events of the fascinating battles that

took place are revealed in over 60 photographs many of which are from Japanese sources

The Dynamics of Coalition Naval Warfare Steven Paget, 2017-09-22 This book examines the dynamics of coalition naval operations Since the end of the Second World War few nations possess the capacity for large scale sustained and independent naval operations and even those that do such as the USA often find it economically militarily and politically expedient to act multilaterally As such coalition naval operations increasingly became the norm throughout the twentieth century and there is little sign of this abating in the twenty first Multinational operations provide a number of benefits but they also present a number of challenges Examining the dynamics of coalition operations involving the Royal Navy RN Royal Australian Navy RAN and the United States Navy USN during the Korean War Vietnam War and the Iraq War this book provides a broad overview of naval interoperability between the three navies Using the naval gunfire support NGS capability as a lens through which to analyse operations the study explores a diverse range of issues including command and control communications equipment standardisation intelligence logistics planning rules of engagement tactics techniques and procedures and training Approaching the subject through both historical and contemporary perspectives not only provides a unique assessment of the variation in the effectiveness of interoperability over time but also offers a platform for better understanding and enhancing the performance of future coalition naval operations Based on extensive archival research in Australia the UK and the US as well as wide ranging interviews this book sheds new light on the dynamics of conducting coalition operations This book will be of great interest to students of naval history strategic studies sea power maritime security military studies and IR in general
