

The background of the slide is a dark, atmospheric painting. The top half shows a castle or fortress perched on a hill, with smoke or mist rising from the sky. The bottom half shows a rocky, desolate shoreline with two small figures standing in the distance, looking out over a body of water under a cloudy sky.

Democracy, Capitalism, and the Welfare State Peter C. Caldwell,2019-03-14 Democracy Capitalism and the Welfare State investigates political thought under the conditions of the postwar welfare state focusing on the Federal Republic of Germany 1949 1989 The volume argues that the welfare state informed and altered basic questions of democracy and its relationship to capitalism These questions were especially important for West Germany given its recent experience with the collapse of capitalism the disintegration of democracy and National Socialist dictatorship after 1930 Three central issues emerged First the development of a nearly all embracing set of social services and payments recast the problem of how social groups and interests related to the state as state agencies and affected groups generated their own clientele their own advocacy groups and their own expert information Second the welfare state blurred the line between state and society that is constitutive of basic rights and the classic world of liberal freedom rights became claims on the state and social groups became integral parts of state administration Third the welfare state potentially reshaped the individual citizen who became wrapped up with mandatory social insurance systems provisioning of money and services related to social needs and the regulation of everyday life Peter C Caldwell describes how West German experts sought to make sense of this vast array of state programs expenditures and bureaucracies aimed at solving social problems Coming from backgrounds in politics economics law social policy sociology and philosophy they sought to conceptualize their state which was now social one German word for the welfare state is indeed Sozialstaat and their society which was permeated by state policies Europe Stefan Elbe,2004-03-01 There has been a deliberative but as yet unsuccessful attempt by scholars and policy makers to articulate a more meaningful idea of Europe which would enhance the legitimacy of the European Union and provide the basis for a European identity Using a detailed analysis of the writings of Nietzsche Elbe seeks to address this problem and argues that Nietzsche s thinking about Europe can significantly illuminate our understanding He demonstrates how Nietzsche s critique of nationalism and the notion of the good European can assist contemporary scholars in the quest for a

vision of Europe and a definition of what it means to be a European citizen

In the House of the Hangman Jeffrey K. Olick, 2005-09 The central question for both the victors and the vanquished of World War II was just how widely the stain of guilt would spread over Germany Political leaders and intellectuals on both sides of the conflict debated whether support for National Socialism tainted Germany's entire population and thus discredited the nation's history and culture The tremendous challenge that Allied officials and German thinkers faced as the war closed then was how to limn a postwar German identity that accounted for National Socialism without irrevocably damning the idea and character of Germany as a whole In the House of the Hangman chronicles this delicate process exploring key debates about the Nazi past and German future during the later years of World War II and its aftermath What did British and American leaders think had given rise to National Socialism and how did these beliefs shape their intentions for occupation What rhetorical and symbolic tools did Germans develop for handling the insidious legacy of Nazism Considering these and other questions Jeffrey K Olick explores the processes of accommodation and rejection that Allied plans for a new German state inspired among the German intelligentsia He also examines heated struggles over the value of Germany's institutional and political heritage Along the way he demonstrates how the moral and political vocabulary for coming to terms with National Socialism in Germany has been of enduring significance as a crucible not only of German identity but also of contemporary thinking about memory and social justice more generally Given the current war in Iraq the issues contested during Germany's abjection and reinvention how to treat a defeated enemy how to place episodes within wider historical trajectories how to distinguish varieties of victimhood are as urgent today as they were sixty years ago and In the House of the Hangman offers readers an invaluable historical perspective on these critical questions

In the Beginning was the Deed Harry Redner, 2024-06-04 Now that the collective death of mankind has become a possibility no other thought can remain unimpaired Harry Redner traces historically the onset of this acute state of Nihilism from what might be called the Faustian revolution symbolized by Faust's pronouncement In the beginning was the Deed Redner reflects on the passage of the three main Fausts from Marlowe's to Goethe's to Thomas Mann's and this reflection serves as the dramatic metaphor for a review of the relationship of Progress to Nihilism in modern civilization Starting with an exposition of the key Faustian thinkers Marx Nietzsche Wittgenstein and Heidegger the book proceeds by examining the dominant modern ideas on Man Time and Nihilism with reference to Foucault Derrida and Althusser It focuses on Language which is a key preoccupation of all these thinkers but has not yet been taken far enough to afford a basis for the explanation of fundamental changes in civilization Language in its creative and destructive functions as constituting both the conscious and unconscious of a culture is reconceived so as to account for the hidden link between Progress and Nihilism The author

then explores sociologically the dominant aspects of Progress in terms of the ideas of Weber Adorno and Marcuse on Technology Subjectivity and Activism Finally an extensive literary study of the three main Fausts concludes with a coda on the future of music In the Beginning Was the Deed is lucid and direct tinged with wry humor Redner represent Man in the nuclear age and reflects on that representation seeking to comprehend our era draw ethical and political conclusions and explore action as a response to the threat of annihilation This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982 *New Paradigm for Understanding Today's World* Alain Touraine,2007-11-05 Touraine is one of the leading social thinkers in the world today and many of his books have been published in English In this book Touraine presents a new theoretical framework for understanding the contemporary world It is a broad theoretical work which seeks to make sense of everyday experience at the beginning of the 21st century This is a major new theoretical work by one of the leading sociologists in the world today A great reference book for those studying sociology and social theory at any level **Architects of the Euro** Kenneth Dyson,Ivo Maes,2017-03-16 Who were key figures in the making of European monetary union Which ideas did they contribute to ensuring that monetary union would be sustainable How prescient were they in identifying the necessary and sufficient foundations of a sustainable monetary union This book provides the first systematic historical examination of key architects of European monetary union in the period before its launch in 1999 Using original archival and interview research it investigates the intellectual and career backgrounds of these architects their networking skills and their own doubts and reservations about the way in which monetary union was being constructed In the light of the later Euro Area Architects of the Euro deals critically with not just their contribution to the making of European monetary union but also their legacy The book brings together a distinguished group of scholars working on the history of Economic and Monetary Union *The Slavonic and East European Review* ,1928 Includes section Reviews *International Politics* Egbert Jahn,2015-11-03 This volume analyses the historical background of violent international conflicts Starting with an analysis of the conflict and cooperation structures in post communist Eastern Europe and the eastern expansion of the European Union the author discusses the problem of acts of intervention in response to severe human rights violations taking Kosovo Libya and in a further text also Darfur as examples To analyse the subject of ethnonational autonomy and independence movements the author presents case studies on Bosnia Herzegovina Belgium Cyprus on the Kurdish areas of Iraq Iran Syria and Turkey on Israel Palestine on China with regard to Tibet and Xinjiang and on the genocide of the Armenians in the Ottoman Empire The classic subjects of inter state security and armament policy include the controversy over the nuclear policies of Iran and North Korea while the analysis of the changes in Russia s political system focuses on their far reaching consequences for
