*Bread and Autocracy* Janetta Azarieva, Yitzhak M. Brudny, Eugene Finkel, Evgeny Finkel, 2023 Food has been crucial to the functioning and survival of governments and regimes since the emergence of early states Yet only in a few countries is the connection between food and politics as pronounced as in Russia Since the 1917 Revolution virtually every significant development in Russian and Soviet history has been either directly driven by or closely associated with the question of food and access to it In fact food shortages played a critical role in the collapse of both the Russian Empire and the USSR Under Putin's watch Russia moved from heavily relying on grain imports to feed the population to being one of the world's leading food exporters In *Bread and*

Autocracy Janetta Azarieva Yitzhak M Brudny and Eugene Finkel focus on this crucial yet widely overlooked transformation as well as its causes and consequences for Russia's domestic and foreign politics The authors argue that Russia's food independence agenda is an outcome of a deliberate decades long policy to better prepare the country for a confrontation with the West Moreover they show that for the Kremlin nutritional self sufficiency and domestic food production is a crucial pillar of state security and regime survival Azarieva Brudny and Finkel also make the case that Russia's focus on food independence also sets the country apart from almost all modern autocracies While many authoritarian regimes have adopted industrial import substitution policies in Putin's Russia it is the substitution of food imports with domestically produced crops that is crucial for regime survival As food reemerges as a key global issue and nations increasingly turn inwards Bread and Autocracy provides a timely and comprehensive look into Russia's experience in building a nutritionally autarkic dictatorship *East Central Europe and the former Soviet Union* Michael Bradshaw, Alison Stenning, 2016-04-15 A comprehensive introduction to the important economic social and political processes and development issues in this increasingly popular area of study Employing a groundbreaking thematic approach the book centres its discussion on the interrelation between contemporary development theories and continuing transition issues in this huge and complex region

Hann, 2003 This is an age of neo liberalism in which the advantages and virtues of private property are often taken for granted Post socialist governments have privatized and broken up state farms and socialist cooperatives However economic outcomes and the social insecurity now experienced by many rural inhabitants highlight the need for a broader anthropological analysis of property relations which go beyond changes of legal form A century after Kautsky addressed The Agrarian Question in Germany it is necessary to address a post socialist Agrarian Question throughout Central and Eastern Europe the former Soviet Union and China The studies collected here derive from the first cycle of projects carried out at the Max Planck Institute for Social Anthropology They are prefaced by a substantial introduction by Chris Hann Chris Hann is Director of the Max Planck Institute for Social Anthropology Halle Saale

**Owning Russia** Andrew S. Barnes, 2018-07-05 During and after the breakdown of the Soviet Union a wide range of competitors fought to build new political and economic empires by wresting control over resources from the state and from each other In the only book to examine the evolution of Russian property ownership in both industry and agriculture Andrew Barnes uses interviews archival research and firsthand observation to document how a new generation of capitalists gained control over key pieces of the Russian economy by acquiring debt ridden factories and farms once owned by the state He argues that although the Russian government made policies that affected how actors battled one another it could never rein in the most destructive aspects of the struggle for property Barnes shows that dividing the spoils of the Soviet economy involved far more than the experiment with voucher privatization or the scandalous behavior of a few Moscow based oligarchs In Russia the control of property yielded benefits beyond mere profits and these

Riedinger, 1995 This book evaluates the capacity of new democratic regimes to promote redistributive agrarian reform an issue of contemporary concern in countries throughout the world Agrarian reform is particularly complex and difficult for new democracies because it curtails the power and privileges of influential elements of society The author analyzes the problems attendant on political liberalization and social and economic reform by examining in detail the formulation and implementation of agrarian reform in the Philippines under the governments of Corazon Aquino and her successor Fidel Ramos The book explores how the interaction between state and society shapes reform policy decisions paying close attention to the role of cultural variables and social organizations It shows that what is needed for successful agrarian reform is a combination of sustained forceful leadership from a disciplined reform oriented political party and grassroots agitation by peasant organizations
