Farmers Benevolent Trust Law And Agricultural Cooperation In Industrial America 1865 1945:

The Farmer's Benevolent Trust Victoria Saker Woeste,1998 The Farmer's Benevolent Trust Victoria Saker

Woeste,2000-11-09 Americans have always regarded farming as a special calling one imbued with the Jeffersonian values of individualism and self sufficiency As Victoria Saker Woeste demonstrates farming s cultural image continued to shape Americans expectations of rural society long after industrialization radically transformed the business of agriculture Even as farmers enthusiastically embraced cooperative marketing to create unprecedented industry wide monopolies and control prices they claimed they were simply preserving their traditional place in society In fact the new legal form of cooperation far outpaced judicial and legislative developments at both the state and federal levels resulting in a legal and political struggle to redefine the place of agriculture in the industrial market Woeste shows that farmers were adept at both borrowing such legal forms as the corporate trust for their own purposes and obtaining legislative recognition of the new cooperative style In the process however the first rule of capitalism every person for him or herself trumped the traditional principle of cooperation After 1922 state and federal law wholly endorsed cooperation s new form Indeed says Woeste because of its corporate roots this model of cooperation fit so neatly with the regulatory paradigms of the first half of the twentieth century that it became an essential policy of the modern administrative state *The Travels of a T-Shirt in the Global Economy* Pietra

Rivoli,2014-11-24 The keys to global business success as taught by a T shirt s journey *The Travels of a T Shirt in the Global Economy* is a critically acclaimed narrative that illuminates the globalization debates and reveals the key factors to success in global business Tracing a T shirt s life story from a Texas cotton field to a Chinese factory and back to a U S storefront before arriving at the used clothing market in Africa the book uncovers the political and economic forces at work in the global economy Along the way this fascinating exploration addresses a wealth of compelling questions about politics trade economics ethics and the impact of history on today s business landscape This new printing of the second edition includes a revised preface and a new epilogue with updates through 2014 on the people industries and policies related to the T shirt s life story Using a simple everyday T shirt as a lens through which to explore the business economic moral and political complexities of globalization in a historical context *Travels* encapsulates a number of complex issues into a single identifiable object that will strike a chord with readers as they Investigate the sources of sustained competitive advantage in different industries Examine the global economic and political forces that explain trade patters between countries Analyze complex moral issues related to globalization and international business Discover the importance of cultural and human elements in international trade This story of a simple product illuminates the many complex issues which businesspeople policymakers and global citizens are touched by every day **American Farming Culture and the History of Technology** Joshua T.

Brinkman,2024-05-06 Presenting a history of agriculture in the American Corn Belt this book argues that modernization occurred not only for economic reasons but also because of how farmers use technology as a part of their identity and culture

Histories of agriculture often fail to give agency to farmers in bringing about change and ignore how people embed technology with social meaning This book however shows how farmers use technology to express their identities in unspoken ways and provides a framework for bridging the current rural urban divide by presenting a fresh perspective on rural cultural practices Focusing on German and Jeffersonian farmers in the 18th century and Corn Belt producers in the 1920s the Cold War and the recent period of globalization this book traces how farmers formed their own versions of rural modernity Rural people use technology to contest urban modernity and debunk yokel stereotypes and women specifically employed technology to resist urban gender conceptions This book shows how this performance of rural identity through technological use impacts a variety of current policy issues and business interests surrounding contemporary agriculture from the controversy over genetically modified organisms and hog confinement facilities to the growth of wind energy and precision technologies Inspired by the author s own experience on his family s farm this book provides a novel and important approach to understanding how farmers culture has changed over time and why machinery is such a potent part of their identity This book will be of great interest to students and scholars of agricultural history technology and policy rural studies the history of science and technology and the history of farming culture in the USA

The Opening of American Law

Herbert Hovenkamp, 2014-09-22 Two Victorian Era intellectual movements changed the course of American legal thought Darwinian natural selection and marginalist economics The two movements rested on fundamentally inconsistent premises Darwinism emphasized instinct random selection and determinism marginalism emphasized rational choice American legal theory managed to accommodate both although to different degrees in different disciplines The two movements also developed mutually exclusive scientific methodologies Darwinism emphasizing external indicators of welfare such as productivity education or health while marginalists emphasized market choice Historians have generally exaggerated the role of Darwinism in American legal thought while understating the role of marginalist economics This book explores these issues in several legal disciplines and time periods including Progressive Era redistributive policies American common law public law and laws regarding corporations and competition One is Progressive Era movements for redistributive policies about taxation and public goods Darwinian science also dominated the law of race relations while criminal law reflected an inconsistent mixture of Darwinian and marginalist incentive based theories The common law including family law contract property and tort moved from emphasis on correction of past harms to management of ongoing risk and relationship A chapter on Legal Realism emphasizes the Realists indebtedness to institutional economics a movement that powerfully influenced American legal theory long after it fell out of favor with economists Five chapters on the corporation innovation and competition policy show how marginalist economics transformed business policy The ironic exception was patent law which developed in relative insulation from economic concerns about innovation policy The book concludes with three chapters on public law emphasizing the role of institutionalist economics in policy making during and after the New Deal A

lengthy epilogue then explores the variety of postwar attempts to reconstruct a defensible and more market oriented rule of law after the decline of Legal Realism and the New Deal **American Fair Trade** Laura Phillips Sawyer,2018-01-11 Shows how in the decades prior to the Great Depression associations of independent proprietors partnered with federal regulators to create codes of fair competition Elgar Encyclopedia on the Economics of Competition, Regulation and Antitrust Michael D. Cruikshank,Arthur W. Schultz,2010-08-12 We live in an age of persuasion Leaders and institutions of every kind public and private large and small must compete in the marketplace of images and messages This has been true since the advent of mass media from broad circulation magazines and radio through the age of television and the internet Yet there have been very few true geniuses at the art of mass persuasion in the last century In public relations Edward Bernays comes to mind In advertising most Hall of Famers J Walter Thomson David Ogilvy Bill Bernbach Bruce Barton Ray Rubicam and others point to one individual as the father of modern advertising Albert D Lasker And yet Lasker unlike Bernays Thomson Ogilvy and the others remains an enigma Now Jeffrey Cruikshank and Arthur Schultz having uncovered a treasure trove of Lasker s papers have written a fascinating and revealing biography of one of the 20th century s most powerful intriguing and instructive figures It is no exaggeration to say that Lasker created modern advertising He was the first influential proponent of reason why advertising a consumer centered approach that skillfully melded form and content and a precursor to the unique selling proposition approach that today dominates the industry More than that he was a prominent political figure champion of civil rights man of extreme wealth and hobnobber with kings and maharajahs as well as with the likes of Albert Einstein and Eleanor Roosevelt He was also a deeply troubled man who suffered mental collapses throughout his adult life though was able fight through and continue his

Canned Anna Zeide, 2018-03-06 2019 James Beard Foundation Book Award winner Reference History and Scholarship A century and a half ago when the food industry was first taking root few consumers trusted packaged foods Americans had just begun to shift away from eating foods that they grew themselves or purchased from neighbors With the advent of canning consumers were introduced to foods produced by unknown hands and packed in corrodible metal that seemed to defy the laws of nature by resisting decay Since that unpromising beginning the American food supply has undergone a revolution moving away from a system based on fresh locally grown goods to one dominated by packaged foods How did this come to be How did we learn to trust that food preserved within an opaque can was safe and desirable to eat Anna Zeide reveals the answers through the story of the canning industry taking us on a journey to understand how food industry leaders leveraged the powers of science marketing and politics to win over a reluctant public even as consumers resisted at every turn

Cooperatives and Local Development Christopher D. Merrett, Norman Walzer, 2016-09-16 First Published in 2004 The market economy has changed profoundly over the past two centuries In the nineteenth century business enterprises were largely single product ventures managed directly by the owners and rooted within national economies In the twentieth century firms employed managers who were not owners Firms also evolved into multiproduct multiunit entities that could employ thousands of workers In the twenty first century many firms operate on a global scale taking advantage of free trade policies and rapidly evolving computer and telecommunications technologies Given this potential it is crucial that producers consumers economic developers and researchers realize how co ops can promote local economic and community development Hence this book includes the perceptions of experts on a variety of cooperative issues including the challenges involved in starting a co op and in understanding its impact on surrounding communities This book can be especially useful because it provides the theoretical foundations and practical applications of cooperative behavior

Supermarket USA Shane Hamilton, 2018-09-18 This cultural history examines the global rise of American style supermarkets during the Cold War era and how they shaped the way we eat today Supermarkets were invented in the United States and from the 1940s on they made their way around the world often explicitly to carry American style economic culture with them This innovative history tells us how supermarkets were used as anticommunist weapons during the Cold War and how their proliferation has shaped our current food system The widespread appeal of supermarkets contributed to a arms race between the United States and the Soviet Union as the superpowers vied to show that their contrasting approaches to food production and distribution were best suited to an abundant future In the aftermath of the Cold War US food power was transformed into a global system of market power laying the groundwork for the emergence of our contemporary world in which transnational supermarkets operate as powerful institutions in a global food economy

Acquired Tastes Benjamin R. Cohen, Michael S. Kideckel, Anna Zeide, 2021-08-17 How modern food helped make modern society between 1870 and 1930 stories of power and

food from bananas and beer to bread and fake meat The modern way of eating our taste for food that is processed packaged and advertised has its roots as far back as the 1870s Many food writers trace our eating habits to World War II but this book shows that our current food system began to coalesce much earlier Modern food came from and helped to create a society based on racial hierarchies colonization and global integration Acquired Tastes explores these themes through a series of moments in food history stories of bread beer sugar canned food cereal bananas and more that shaped how we think about food today Contributors consider the displacement of native peoples for agricultural development the invention of Pilsner the first international beer style the long con of gilded sugar and corn syrup Josephine Baker s banana skirt and the rise of celebrity tastemakers and faith in institutions and experts who produced among other things food rankings and fake meat

Handbook of Agricultural Economics ,2022-06-29 Handbook of Agricultural Economics Volume Six highlights new advances in the field with this new release exploring comprehensive chapters written by an international board of authors who discuss topics such as The Economics of Food Loss and Waste Empowering Communities Using an Integrated Design of Food Networks Concentration in Food and Agricultural Markets Agriculture and trade Producers Consumers and Value Chains in Developing Countries The Multiple Burdens of Malnutrition Dietary Transition and Food System Transformation in Economic Development Psychophysiological Measures and Consumer Food Choice and The Economics of Health and Nutrition Related Food Policies The Effects on the Public Health and Malnutrition Presents the latest release in the Handbook of Agricultural Economics Written and contributed by leaders in the field Covers topics such as Economics on Food Loss and Waste Integrated Design of Food Networks Agriculture and Trade and more While Waiting for Rain John Henry Schlegel,2022-08-02 What might a sensible community choose to do if its economy has fallen apart and becoming a ghost town is not an acceptable option Unfortunately answers to this question have long been measured against an implicit standard the postwar economy of the 1950s After showing why that economy provides an implausible standard made possible by the lack of economic competition from the European and Asian countries winners or losers touched by the war John Henry Schlegel attempts to answer the question of what to do While Waiting for Rain first examines the economic history of the United States as well as that of Buffalo New York an appropriate stand in for any city that may have seen its economy start to fall apart in the 1960s 70s and 80s It makes clear that neither Buffalo nor the United States as a whole has had an economy in the sense of a persistent market structure that is the fusion of an understanding of economic life with the patterns of behavior within the economic political and social institutions that enact that understanding since both economies collapsed Next this book builds a plausible theory of how economic growth might take place by examining the work of the famous urbanist Jane Jacobs especially her book Cities and the Wealth of Nations Her work like that of many others emphasizes the importance of innovation for economic growth but is singular in its insistence that such innovation has to come from local resources It can neither be bought nor given even by well intentioned political actors As a result Americans generally as well

as locally are like farmers in the midst of a drought left to review their resources and wait Finally it returns to both the local Buffalo and the national economies to consider what these political units might plausibly do while waiting for an economy to emerge
