Fashion Classics From Carlyle To Barthes:

Fashion Classics from Carlyle to Barthes Michael Carter, 2003-03-01 With so much focus on contemporary theory it is easy to forget that the serious analysis of clothing and fashion has a long history In fact they have been the subject of intense cultural debate since the nineteenth century Fashion Classics provides an interpretative overview of the groundbreaking and often idiosyncratic writings of eight theorists whose work has profoundly influenced the conceptual and theoretical basis of our contemporary understanding of clothes and the fashion system Carter fully revives early fashion theorists some canonical and others less well known and examines them in light of more recent work From Carlyles fantastical character Professor Teufelsdröckh through the first Freudian analysis of clothes by J C Flugel the pioneering work of Spencer Veblen Simmel Kroeber Laver and finally Barthes monumental work on the modern fashion system this book explores and explains the foundations of fashion theory Not only does it provide an historical outline of Western conceptions of clothes and fashion but it also highlights how ideas intermix and build on one another Carters lively narrative clearly shows that views on fashion have always been impassioned perhaps most notably Carlyles notorious attack on Dandyism and Veblens suggestion that clothes should be made out of old newspaper This book also makes sense of complex theory and is essential reading for anyone seeking an overview of the history of fashion theory

The Aesthetic Economy of Fashion Joanne Entwistle, 2009-10-01 Fashion is bound up with promoting the new concerned with constantly changing aesthetics The favoured styles or looks of a season arise out of the work of a vast range of different actors who collectively produce select distribute and promote the new ideals before moving on to next season How then are fashionable commodities stabilized long enough for them to be selected distributed and sold Since there are few studies that actually examine the work that goes on inside the world of fashion we know little about these processes This book addresses this gap in our knowledge by examining how aesthetic products are defined distributed and valued It focuses attention on the work of some of the market agents particularly model agents or bookers and fashion buyers shaping the aesthetics inside their markets In analysing their work Entwistle develops a theoretical framework for understanding the distinctive features of aesthetic marketplaces and the aesthetic calculations within them

Dress, Fashion and Technology Phyllis G. Tortora, 2015-02-26 Technology has been an essential factor in the production of dress and the cultures of fashion throughout human history Structured chronologically from prehistory to the present day this is the first broad study of the complex relationship between dress and technology Over the course of human history dress making and fashion technology has changed beyond recognition from needles and human hands in the ancient world to complex 20th century textile production machines it has now come to include the technologies that influence dress styles and the fashion industry while fashion itself may drive aspects of technology In the last century new technologies such as the electronic media and high tech manufacturing have helped not just to produce but to define fashion the creation of automobiles prompted a decline in long skirts for women while the beginnings of space travel caused people to radically rethink the function of dress In many ways technology has itself created avant garde and contemporary fashions Through an impressive range of international case studies the book challenges the perception that fashion is unique to western dress and outlines the many ways in which dress and technology intersect Dress Fashion and Technology is ideal reading for students and scholars of fashion studies textile history anthropology and cultural studies
