Smith,2016-04-15 The single most influential culinary trend of our time is fast food It has spawned an industry that has changed eating the most fundamental of human activities From the first flipping of burgers in tiny shacks in the western United States to the forging of neon signs that spell out Pizza Hut in Cyrillic or Arabic scripts the fast food industry has exploded into dominance becoming one of the leading examples of global corporate success And with this success it has become one of the largest targets of political criticism blamed for widespread obesity cultural erasure oppressive labor

practices and environmental destruction on massive scales In this book expert culinary historian Andrew F Smith explores why the fast food industry has been so successful and examines the myriad ethical lines it has crossed to become so As he shows fast food plain and simple devised a perfect retail model one that works everywhere providing highly flavored calories with speed economy and convenience But there is no such thing as a free lunch they say and the costs with fast food have been enormous an assault on proper nutrition a minimum wage labor standard and a powerful pressure on farmers and ranchers to deploy some of the worst agricultural practices in history As Smith shows we have long known about these problems and the fast food industry for nearly all of its existence has been beset with scathing expos s boycotts protests and government interventions which it has sometimes met with real changes but more often with token gestures blame passing and an unrelenting gauntlet of lawyers and lobbyists Fast Food ultimately looks at food as a business an examination of the industry s options and those of consumers and a serious inquiry into what society can do to ameliorate the problems this cheap and tasty product has created

Forum, 2002 Strategic Communication Anthony Dudo, LeeAnn Kahlor, 2016-07-01. The focus of this book is Strategic Communication. Communication can be defined as strategic if its development and/or dissemination is driven by an expected outcome. These outcomes can be attitudinal, behavioral, persuasive, or knowledge related; they can lead to change or engagement, or they can miss their mark entirely. In looking at strategic communication, one is not limited to a specific context or discipline. Many of the scholars in the volume are generating research that covers strategic communication in ways that are meaningful across fields. This volume collects the work and ideas of scholars who cover the spectrum of strategic communication from source to message to audience to channel to effects. Strategic Communication offers new perspectives across contexts and is rooted firmly in the rich research traditions of persuasion and media effects. Spanning multiple disciplines and written to appeal to a large audience, this book will be found in the hands of researchers, graduate students, and students doing interdisciplinary coursework.
