This book explores the representation of the first generations of women who studied at Oxford and Cambridge in popular fiction of the late nineteenth and early twentieth century Familarly termed Girton Girls these women were depicted as intent on overthrowing the ancient universities and by extension English society This study argues that the powerful and influential vision of the Oxbridge woman was both exploited and expanded in novels of the time It shows that this fiction offers not only an informed critical view of this simultaneously anxiety ridden and intermittently hopeful period of English life between 1880 and 1914 but also reveals popular fiction s underexplored contribution to the move towards Modernist themes and literary techniques The book posits that the Girton Girl was not simply a bit part in the sub genre of the university novel or even within the confines of the New Woman fiction but rather her character was rich and malleable enough to animate a variety of plots that respond to readers burgeoning demands for the women who would inhabit their fiction
