*Case Studies on Educational Administration* Theodore J. Kowalski, 2011-01 A collection of case studies for prospective school administrators that emphasizes problem solving, decision making, and effective management. Based on the conviction that effective practice in school administration requires both leadership and management, this text provides a mix of problems that require administrative decisions as presented in 24 open-ended case studies. In today's reform-minded, information-based society, practitioners must be able to frame problems correctly and then make effective decisions to ameliorate them. As leaders, district and school level administrators are expected to focus on what should be done to improve schools; as managers, they are expected to focus on how to do things successfully. The cases in this book are designed to make students think about common problems of practice by encouraging them to bridge theory and practice. Each case provides an active form of learning, allowing students to demonstrate their ability to apply knowledge to common problem situations.

The book considers both sides of the purpose question. Predicting the needs for the future is a difficult matter at best.
