Teacher Education and Cultural Change James Lynch, H. Dudley Plunkett, 2025-09-01 First published in 1973 *Teacher Education and Cultural Change* analyses significant issues in the reform of teacher education on the evidence of up to date official and academic source materials and direct investigation It contributes to the comparative sociology of education by highlighting the question as to whether teacher education policies are geared primarily to educational and social conservation or change Features of teacher education are classified according

to a scheme comprising four linked themes cultural perceptions of teaching the process of becoming a teacher curricula the organization of teacher education Attention is given to cultural and social factors acting to democratize educational philosophies and structures Reform oriented policies are evaluated for their coherence and sociological realism Differences in the three systems are found to reflect their histories and their socio economic and political contexts but a common movement is discerned towards democratic systems responding to person rather than to institution centred values The book should help to fill a serious gap in comparative studies of teacher education and should be of interest to students academics and administrators concerned with the study and development of educational systems *Rethinking Family-school Relations* Maria Eulina de Carvalho,2000-10 This book addresses the complications and implications of parental involvement as a policy through an exploratory theoretical approach including historical and sociological accounts and personal reflection This approach represents the author s effort to understand the origins meanings and effects of parental involvement as a prerequisite of schooling and particularly as a policy solution for low achievement and even inequity in the American educational system Most of the policy and research discourse on school family relations exalts the partnership ideal taking for granted its desirability and viability the perspective of parents on specific involvement in instruction and the conditions of diverse families in fulfilling their appointed role in the partnership De Carvalho takes a distinct stance She argues that the partnership parental ideal neglects several major factors It proclaims parental involvement as a means to enhance and perhaps equalize school outcomes but disregards how family material and cultural conditions and feelings about schooling differ according to social class thus the partnership parental involvement ideal is more likely to be a projection of the model of upper middle class suburban community schooling than an open invitation for diverse families to recreate schooling Although it appeals to the image of the traditional community school the pressure for more family educational accountability really overlooks history as well as present social conditions Finally family school relations are relations of power but most families are powerless De Carvalho makes the case that two linked effects of this policy are the gravest the imposition of a particular parenting style and intrusion into family life and the escalation of educational inequality *Rethinking Family School Relations A Critique of Parental Involvement in Schooling* a carefully researched and persuasively argued work is essential reading for all school professionals parents and individuals concerned with public schooling and educational equality

The State, Schooling and Identity Kari Kantasalmi, Gunilla Holm, 2016-12-22 This

book offers insights into the relationship between nation state and education by problematizing and analyzing the assumed straightforwardness of the role of education and schooling Placing the issue in very contemporary contested nation state structures like Scotland Catalonia Ukraine and Belgium These conflict situations and contested power relations are in a way some of Europe s internal North South struggles In addition the particular Nordic North South example of the Saami with their status as indigenous people recognized in international law is viewed in terms of their educational struggle for better consideration of their cultural features in Saami land crossing the Nordic states The book focuses on the Nordic countries often viewed as globally exemplary in their educational arrangements but casts deeper insight into Nordic education and points to problematic schooling issues in Northern Europe This volume presents somewhat unexpected views on European educational arrangements with regard to the European growing diversity
